Welch Emergency Hospital, located in the City of Welch, was established in 1899, on a three-acre tract given to the State by J. J. Perry for this purpose. Its particular service was to miners in that region, but now takes care of a large part of the charity cases from that region. Several new improvements have been made in the past few years on the buildings and grounds also in equipment. An accredited nurses training school is conducted in connection with the hospital.

Superintendent: Dr. J. E. Offner, (\$375 per month). Financial Secretary: J. C. McWhorter. Patients: male, 959; female, 731; total, 1,690. Employees, 175.

Weston State Hospital, located in City of Weston, is West Virginia's oldest State institution and the only tangible property remaining to show for the \$13,000,000 Virginia Debt. Establishment of the institution, to have been known as the Trans-Alleghany Lunatic Asylum, was authorized March 22, 1858, by an act of the Virginia Assembly which appropriated \$25,000 for the purchase of land and materials. Work was delayed due to the outbreak of the war between the states. Funds for the continuance of the work were provided by the Restored Government of Virginia and later by the new State of West Virginia. The hospital was opened formally November 12, 1864. The hospital and its outlying farms occupy more than 500 acres of ground in Lewis County. The hospital holds a grade A rating with the American Hospital Association and the West Virginia Hospital Association. Of particular note in the past three years was the greatly increased use of the medical center clinic by pay patients.

CONSTITUTIONAL

Declaration of Independence

United States Constitution

Constitution of West Virginia

THE DECLARATION OF INDEPENDENCE

MADE BY THE ORIGINAL THIRTEEN STATES IN CONGRESS
AT PHILADELPHIA

UNANIMOUSLY ADOPTED JULY 4, 1776

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the Powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: that all men are created equal, that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security.—Such has been the patient sufferance of these colonies; and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these States. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accomodation of large districts of people, unless those people would relinquish the right of representation in the legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing, with manly firmness, his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the State remaining, in the meantime, exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harass our people and eat out their substance.

He has kept among us, in times of peace, standing armies without the consent of our legislatures.

He has affected to render the military independent of and superior to the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock trial, from punishment for any murders which they should commit on the inhabitants of these States:

For cutting off our trade with all parts of the world:

For imposing taxes without our consent:

For depriving us, in many cases, of the benefits of trial by jury:

For transporting us beyond seas to be tried for pretended offenses:

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries, so as to render at once an example and fit instrument for introducing the same absolute rule into these colonies:

For taking away our charters, abolishing our most valuable laws, and altering fundamentally the forms of our government:

For suspending our own legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his protection, and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns, and destroyed the lives of our people.

He is, at this time, transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes, and conditions.

In every state of these oppressions we have petitioned for redress in the most humble terms: our repeated petitions have been answered only by repeated injuries. A prince, whose character is thus marked by every act which may define a tyrant, is unfit to be the ruler of a free people.

Nor have we been wanting in attention to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and holds them, as we hold the rest of mankind, enemies in war, in peace friends.

We, therefore, the Representatives of the United States of America, in general Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name, and by authority of the good people of these colonies, solemnly publish and declare, That these United Colonies are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain is, and ought to be, totally dissolved; and that, as free and independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent States may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor.

**In order to clarify sections of the Constitution which seemed insufficiently explicit with reference to individual and State rights, Congress, at its first session in the City of New York, September 25, 1789, submitted to the States twelve proposed amendments. Ten of the amendments were ratified by a sufficient number of the states, such ratification being completed on December 15, 1791. Two of the amendments failed of ratification. The first ten amendments printed herewith constitute the ten original amendments, popularly known as "A Bill of Rights."

†Brackets enclosing an amendment number indicate that the number was not specially assigned in the resolution proposing the amendment. It will be seen, accordingly, that only amendments XIII, XIV, XV, and XVI were thus technically ratified by number.

Internal Government and Police

2. The government of the United States is a government of enumerated powers, and all powers not delegated to it, nor inhibited to the States, are reserved to the States or to the people thereof. Among the powers so reserved by the States is the exclusive regulation of their own internal government and police; and it is the high and solemn duty of the several departments of government, created by this Constitution, to guard and protect the people of this State from all encroachments upon the rights so reserved.

Continuity of Constitutional Operation

3. The provisions of the Constitution of the United States, and of this State, are operative alike in a period of war as in time of peace, and any departure therefrom, or violation, thereof, under the plea of necessity, or any other plea, is subversive of good government, and tends to anarchy and despotism.

For the election of representatives to congress, the State shall be divided into districts, corresponding in number with the representatives to which it may be entitled; which districts shall be formed of contiguous counties, and be compact. Each district shall contain, as nearly as may be, an equal number of population, to be determined according to the rule prescribed in the Constitution of the United States.

ARTICLE II

The counties of Barbour, Berkeley, Boone, Braxton, Brooke, Cabell, Calhoun, Clay, Doddridge, Fayette, Gilmer, Grant, Greenbrier, Hampshire, Hancock, Hardy, Harrison, Jackson, Jefferson, Kanawha, Lewis, Lincoln, Logan, Marion, Marshall, Mason, McDowell, Mercer, Mineral, Mingo, Monongalia, Monroe, Morgan, Nicholas, Ohio, Pendleton, Pleasants, Pocahontas, Preston, Putnam, Raleigh, Randolph, Ritchie, Roane, Summers, Taylor, Tucker, Tyler, Upshur, Wayne, Webster, Wetzel, Wirt, Wood and Wyoming. The State of West Virginia includes the bed, bank and shores of the Ohio River, and so much of the Big Sandy River as was formerly included in the Commonwealth of Virginia; in all territorial rights and property in, and jurisdiction over the same, heretofore reserved by, and vested in, the Commonwealth of Virginia, are vested in and shall hereafter be exercised by the State of West Virginia. And such parts of the said beds, banks and shores as lie opposite, and adjoining the several counties of this State, shall form parts of said several counties respectively.

[All of the territory of West Virginia was taken from the Commonwealth of Virginia and in the first constitution forty-four of the above named counties were designated as forming the State of West Virginia, and in addition the counties of Berkeley, Hampshire, Hardy, Jefferson, Morgan and Pendleton were to be admitted should the constitution be adopted by a vote of the people of the districts comprising the counties. The districts adopted the constitution and these six counties became a part of the State.

The remaining five counties were created by acts of the legislature as follows: Mineral County, from Hampshire County, on February 1, 1866; Grant County, from Hardy County, on February 14, 1866; Lincoln County, from parts of Cabell, Putnam, Kanawha and Boone Counties, on February 23, 1867; Summers County, from parts of Greenbrier, Monroe, Mercer and Fayette Counties, on February 27, 1871; and Mingo County, from Logan County, on February 23, 1895.]

6. Treason against the State shall consist only in levying war against it, or in adhering to its enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or on confession in open court. Treason shall be punished according to the character of the acts committed, by the infliction of one, or more, of the penalties of death, imprisonment or fine, as may be prescribed by law.

“Montani Semper Liberi”—State Seal

7. The present seal of the State, with its motto, “*Montani Semper Liberi*,” shall be the great seal of the State of West Virginia, and shall be kept by the Secretary of State, to be used by him officially, as directed by law.

Writs, Commissions, Official Bonds—Indictments

8. Writs, grants and commissions, issued under the authority of this State, shall run in the name of, and official bond shall be made payable to the State of West Virginia. Indictments shall conclude, “Against the peace and dignity of the State.”

ARTICLE III

Bill of Rights

1. All men are, by nature, equally free and independent, and have certain inherent rights, of which, when they enter into a state of society, they cannot by any compact, deprive or divest their posterity, namely: the enjoyment of life and liberty, with the means of acquiring and possessing property, and of pursuing and obtaining happiness and safety.

Magistrates Servants of People

2. All power is vested in, and consequently derived from the people. Magistrates are their trustees and servants, and at all times amenable to them.

Rights Reserved to People

3. Government is instituted for the common benefit, protection and security of the people, nation or community. Of all its various forms, that is the best which is capable of producing the greatest degree of happiness and safety, and is most effectually secured against the danger of maladministration; and when any government shall be found inadequate or contrary to these purposes, a majority of the community has an indubitable, inalienable and indefeasible right to reform, alter or abolish it in such manner as shall be judged most conducive to the public weal.

Writ of Habeas Corpus

4. The privilege of the writ of *habeas corpus* shall not be suspended. No person shall be held to answer for treason, felony or other crime, not cognizable by a justice, unless on presentment or indictment of a grand jury. No bill of attainder, *ex-post facto* law, or law impairing the obligation of a contract, shall be passed.

Excessive Bail Not Required

5. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishment inflicted. Penalties shall be proportioned to the character and degree of the offense. No person shall be transported out of, or forced to leave the State for any offense committed within the same; nor shall any person, in any criminal case, be compelled to be a witness against himself, or be twice put in jeopardy of life or liberty for the same offense.

Freedom of Speech and Press Guaranteed

7. No law abridging the freedom of speech, or of the press, shall be passed; but the Legislature may, by suitable penalties, restrain the publication or sale of obscene books, papers, or pictures, and provide for the punishment of libel, and defamation of character, and for the recovery, in civil actions, by the aggrieved party, of suitable damages for such libel, or defamation.

Relating to Civil Suits for Libel

8. In prosecutions and civil suits for libel, the truth may be given in evidence; and if it shall appear to the jury, that the matter charged as libelous is true, and was published with good motives, and for justifiable ends, the verdict shall be for the defendant.

Private Property, How Taken

9. Private property shall not be taken or damaged for public use, without just compensation; nor shall the same be taken by any company, incorporated for the purposes of internal improvement, until just compensation shall have been paid, or secured to be paid, to the owner; and when private property shall be taken, or damaged, for public use, or for the use of such corporations, the compensation to the owner shall be ascertained in such manner as may be prescribed by general law: *Provided*, That when required by either of the parties, such compensation shall be ascertained by an impartial jury of twelve freeholders.

Safeguards for Life, Liberty and Property

10. No person shall be deprived of life, liberty, or property, without due process of law, and the judgment of his peers.

Political Tests Condemned

11. Political tests, requiring persons, as a prerequisite to the enjoyment of their civil and political rights, to purge themselves by their own oaths, of past alleged offenses, are repugnant to the principles of free government, and are cruel and oppressive. No religious or political test oath shall be required as a prerequisite or qualification to vote, serve as a juror, sue, plead, appeal, or pursue any profession or employment. Nor shall any person be deprived by law of any right, or privilege, because of any act done prior to the passage of such law.

The military shall be subordinate to the civil power; and no citizen, unless engaged in the military service of the State, shall be tried or punished by any military court, for any offense that is cognizable by the civil courts of the State. No soldier shall, in time of peace, be quartered in any house, without the consent of the owner, nor in time of war, except in the manner to be prescribed by law.

Dividing the population of every Delegate District, and of every county not included in a delegate district, by the ratio thus ascertained, there shall be assigned to each a number of Delegates equal to the quotient obtained by this division, excluding the fractional remainder. The additional Delegates necessary to make up the number of which the House is to consist, shall then be assigned to those Delegate Districts, and counties not included in a Delegate District, which would otherwise have the largest fractions unrepresented; but every Delegate District and county not included in a Delegate District shall be entitled to at least one Delegate.

Designation of Delegate Districts

8. Until a new apportionment shall be declared, the counties of Pleasants and Wood shall form the first Delegate District, and elect three Delegates; Ritchie and Calhoun the second, and elect two Delegates; Barbour, Harrison and Taylor the third, and elect one Delegate; Randolph and Tucker the fourth, and elect one Delegate; Nicholas, Clay and Webster the fifth, and elect one Delegate; McDowell and Wyoming the sixth, and elect one Delegate.

To Barbour, Boone, Braxton, Brooke, Cabell, Doddridge, Fayette, Hampshire, Hancock, Jackson, Lewis, Logan, Greenbrier, Monroe, Mercer, Mineral, Morgan,

Grant, Hardy, Lincoln, Pendleton, Putnam, Roane, Gilmer, Taylor, Tyler, Upshur, Wayne, Wetzel, Wirt, Pocahontas, Summers and Raleigh counties, one Delegate each.

To Berkeley, Harrison, Jefferson, Marion, Marshall, Mason, Monongalia and Preston counties, two Delegates each.

To Kanawha County, three Delegates.

To Ohio County, four Delegates.

[Many changes have been made in this apportionment. Kanawha County, the largest in population, now has eight delegates.]

Arrangement of Senatorial and Delegate Districts

10. The arrangement of the Senatorial and Delegate Districts, and apportionment of Delegates, shall hereafter be declared by law, as soon as possible after each succeeding census, taken by authority of the United States. When so declared they shall apply to the first general election for members of the Legislature, to be thereafter held, and shall continue in force unchanged, until such Districts shall be altered, and Delegates apportioned, under the succeeding census.

Additional Territory May Be Admitted Into State

11. Additional territory may be admitted into, and become part of this State, with the consent of the Legislature and a majority of the qualified voters of the State, voting on the question. And in such case provision shall be made by law for the representation thereof in the Senate and House of Delegates, in conformity with the principles set forth in this Constitution. And the number of members of which each house of the Legislature is to consist, shall thereafter be increased by the representation assigned to such additional territory.

Whenever the words, “a majority of the members elected to either House of the Legislature,” or words of like import, are used in this Constitution, they shall be construed to mean a majority of the whole number of members to which each house is, at the time, entitled, under the apportionment of representation, established by the provisions of this Constitution.

The only change made in section 33 was to strike out the words "four dollars per day" and insert "five hundred dollars per annum." *The Budget System

51. The Legislature shall not appropriate any money out of the treasury except in accordance with the following provisions:

Sub-Section A

Every appropriation bill shall be either a budget bill, or a supplementary appropriation bill, as hereinafter mentioned.

Sub-Section B

First: Within ten days after the convening of the Legislature, unless such time shall be extended by the Legislature for the session at which the budget is to be submitted, the Board of Public Works, which shall consist of the Governor, Secretary of State, Auditor, Treasurer, Attorney General, Superintendent of Free Schools and Commissioner of Agriculture, shall submit to the Legislature two budgets, one for each of the ensuing fiscal years. Each budget shall contain a complete plan of proposed expenditures and estimated revenues for the particular fiscal year to which it relates; and shall show the estimated surplus or deficit of revenues at the end of such year. Accompanying each budget shall be a statement showing: (1) the revenues and expenditures for each of the two fiscal years next preceding; (2) the current assets, liabilities, reserves and surplus or deficit of the State; (3) the debts and funds of the State; (4) an estimate of the State's financial condition as of the beginning and end of each of the fiscal years covered by the two budgets above provided; (5) any explanation the Board of Public Works may desire to make as to the important features of any budget and any suggestion as to methods for the reduction or increase of the State's revenue.

Second: Each budget shall be divided into two parts, and the first part shall be designated "Governmental Appropriations" and shall embrace an itemized

*This section, known as "The Budget Amendment," added to Article VI, was proposed by Senate Joint Resolution No. 1, adopted May 23, 1917, (Acts 1917, Extraordinary Session), and was ratified at the general election in 1918. Vote on the amendment: For ratification, 51,405; against ratification, 26,651; majority, 24,754.

estimate of the appropriations: (1) for the Legislature as certified to the Board of Public Works in the manner hereinafter provided; (2) for the Executive Department; (3) for the judicial department, as provided by law, certified to the Governor by the Auditor; (4) to pay and discharge the principal and interest of any debt of the State of West Virginia hereafter created in conformity with the Constitution and all laws enacted in pursuance thereof; (5) for the salaries payable by the State under the Constitution and laws of the State; (6) for the aid of the public schools in conformity with the laws of the State; (7) for such other purposes as are set forth in the Constitution and laws made in pursuance thereof.

Third: The second part shall be designated "General Appropriations," and shall include all other estimates of appropriations.

The Board of Public Works shall deliver to the presiding officer of each House the budgets and a bill for all proposed appropriations of the budgets clearly itemized and classified; and the presiding officer of each House shall promptly cause said bill to be introduced therein, and such bill shall be known as the "Budget Bill." The Board of Public Works may, before final action thereon by the Legislature, amend or supplement either of said budgets to correct an oversight or in case of an emergency, with the consent of the Legislature by delivering such an amendment or supplement to the presiding officers of both Houses; and such amendment or supplement shall thereby become a part of said budget bill as an addition to the items of said bill or as modification of or a substitute for any item of said bill such amendment or supplement may affect.

The Legislature shall not amend the budget bill so as to create a deficit but may amend the bill by increasing or diminishing the items therein relating to the Legislature, and by increasing the items therein relating to the judiciary, but except as hereinbefore specified, may not alter the said bill except to strike out or reduce items therein: *Provided, however,* That the salary or compensation of any public officer shall not be increased or diminished during his term of office; and such bill when and as passed by both Houses shall be a law immediately without further action by the Governor.

Fourth: The governor and such representatives of the boards, officers and commissions of the State expending or applying for State's money as have been designated by the Board of Public Works for this purpose, shall have the right, and when requested by either House of the Legislature it shall be their duty to appear and be heard with respect to any budget bill during the consideration thereof, and to answer inquiries relative thereto.

Sub-Section C—Supplementary Appropriation Bills

Neither House shall consider other appropriations until the budget bill has been finally acted upon by both Houses, and no such other appropriations shall be valid except in accordance with the provisions following:

(1) Every such appropriation shall be embodied in a separate bill limited to some single work, object or purpose therein stated and called herein a supplementary appropriation bill; (2) each supplementary appropriation bill shall provide the revenue necessary to pay the appropriation thereby made by a tax direct or indirect, to be laid and collected as shall be directed in said bill unless it appears from such budget that there is sufficient revenue available; (3) no supplementary appropriation bill shall become a law unless it be passed in each House by a vote of a majority of the members present, and the yeas and nays recorded on its final passage. Each supplementary appropriation bill shall be presented to the Governor of the State as provided in section fourteen of article seven of the Constitution and thereafter all the provisions of said section shall apply.

Nothing in this amendment shall be construed as preventing the Legislature from passing in time of war an appropriation bill to provide for the payment of any obligation of the State of West Virginia within the protection of section ten of article one of the Constitution of the United States.

Sub-Section D—General Provisions

First: If the "Budget Bill" shall not have been finally acted upon by the Legislature three days before the expiration of its regular session, the Governor may, and it shall be his duty to issue a proclamation extending the session for such further period as may, in his judgment, be necessary for the passage of such bill; but no other matter than such bill shall be considered during such extended session except a provision for the cost thereof.

Second: The Board of Public Works for the purpose of making up its budgets shall have the power, and it shall be its duty, to require from the proper State officials, including herein all executive departments, all executive and administrative officers, bureaus, boards, commissions and agencies expending or supervising the expenditure of, and all institutions applying for state monies and appropriations, such itemized estimates and other information, in such form and at such times as said board shall direct. The estimates for the legislative department, certified by the presiding officer of each House, of the judiciary, as provided by law, certified by the Auditor, and for the public schools, as provided by law, shall be transmitted to the Board of Public Works, in such form and at such times as it shall direct, and shall be included in the budget.

The Board of Public Works may provide for public hearings on all estimates and may require the attendance at such hearings of representatives of all agencies, and all institutions applying for state monies. After such public hearings, it may, in its discretion, revise all estimates except those for the legislative and judiciary departments, and for the public schools as provided by law.

Third: The Legislature may, from time to time, enact such laws, not inconsistent with this section, as may be necessary and proper to carry out its provisions.

Fourth: In the event of any inconsistency between any of the provisions of this section and any of the other provisions of the Constitution, except amendments thereto heretofore made and ratified by the people, the provisions of this section shall prevail. But nothing herein shall be construed as preventing the Governor from calling extraordinary sessions of the Legislature, as provided by section seven of article seven, or as preventing the Legislature at such extraordinary sessions from considering any emergency appropriation or appropriations.

If any item of any appropriation bill passed under the provisions of this section shall be held invalid upon any ground, such invalidity shall not affect the legality of the bill or of any other item of such bill or bills.

ARTICLE VII

The person having the highest number of votes for either of said offices, shall be declared duly elected thereto; but if two or more have an equal and the highest number of votes for the same office, the Legislature shall, by joint vote, choose one of such persons for said office. Contested elections for the office of Governor shall be determined by both Houses of the Legislature by joint vote, in such manner as may be prescribed by law.

The effect of the amendment was to strike out the following at the end of the original section: "The Secretary of State shall be appointed by the Governor, State Superintendent of Free Schools, Auditor, Treasurer, nor Attorney in office, unless sooner removed, until the expiration of the official term of the Governor by whom he shall have been appointed." For the vote on the adoption of the amendment, see note following section 2.]

4. None of the executive officers mentioned in this article shall hold any other office during the term of his service. The Governor shall not be eligible to said office for the four years next succeeding the term for which he was elected.

[The amendment of this section was proposed by House Joint Resolution of February 15, 1901 (Acts 1901, p. 460) and ratified at the general election in 1902. The section, prior to being amended, read as follows: "Neither the Governor, State Superintendent of Free Schools, Auditor, Treasurer, nor Attorney General, shall hold any other office during the term of his service. The Governor shall be ineligible to said office for the four years next succeeding the term for which he was elected." For the vote on the adoption of the amendment, see note following section 2.]

6. The Governor shall at the commencement of each session, give to the Legislature information by message, of the condition of the State, and shall recommend such measure as he shall deem expedient. He shall accompany his message with a statement of all money received and paid out by him from any funds, subject to his order, with vouchers therefor; and at the commencement of each regular session, present estimates of the amount of money required by taxation for all purposes.

Extraordinary Legislative Sessions

7. The Governor may on extraordinary occasions convene, at his own instance, the Legislature; but when so convened it shall enter upon no business except that stated in the proclamation by which it was called together.

8. The Governor shall nominate, and by and with the advice and consent of the Senate, (a majority of all the Senators elected concurring by yeas and nays) appoint all officers whose offices are established by this Constitution, or shall be created by law, and whose appointment or election is not otherwise provided for, and no such officer shall be appointed or elected by the Legislature.

Recess Vacancies—How Filled

9. In case of a vacancy, during the recess of the Senate, in any office which is not elective, the Governor shall, by appointment, fill such vacancy, until the next meeting of the Senate, when he shall make a nomination for such office, and the person so nominated, when confirmed by the Senate (a majority of all the Senators elected concurring by yeas and nays) shall hold his office during the remainder of the term, and until his successor shall be appointed and qualified. No person, after being rejected by the Senate, shall be again nominated for the same office, during the same session, unless at the request of the Senate; nor shall such person be appointed to the same office during the recess of the Senate.

How Bills Become Laws

14. Every bill passed by the Legislature shall, before it becomes a law, be presented to the Governor. If he approve, he shall sign it, and thereupon it shall become a law; but if not, he shall return it, with his objections, to the

House in which it originated, which House shall enter the objections at large upon its journal, and proceed to reconsider it. If, after such reconsideration, a majority of the members elected to that House agree to pass the bill, it shall be sent, together with the objections to the other House, by which it shall likewise be reconsidered, and if approved by a majority of the members elected to that House, it shall become a law, notwithstanding the objections of the Governor. But in all such cases, the vote of each House shall be determined by yeas and nays to be entered on the journal. Any bill which shall not be returned by the Governor within five days (Sundays excepted) after it shall have been presented to him, shall be a law, in like manner as if he had signed it, unless the Legislature shall, by their adjournment, prevent its return, in which case it shall be filed with his objections in the office of the Secretary of State within five days after such adjournment, or become a law.

Respecting Appropriations of Monies

15. Every bill passed by the Legislature making appropriations of money, embracing distinct items, shall before it becomes a law, be presented to the Governor; if he disapproves the bill, or any item or appropriation therein contained, he shall communicate such disapproval with his reasons therefor to the House in which the bill originated; but all items not disapproved shall have the force and effect of law according to the original provisions of the bill. Any item or items so disapproved shall be void, unless re-passed by a majority of each House according to the rules and limitations prescribed in the preceding section in reference to other bills.

In case of the death, conviction or impeachment, failure to qualify, resignation, or other disability of the Governor, the President of the Senate shall act as Governor until the vacancy is filled, or the disability removed; and if the President of the Senate, for any of the above named causes, shall become incapable of performing the duties of Governor, the same shall devolve upon the Speaker of the House of Delegates; and in all other cases where there is no one to act as Governor, one shall be chosen by joint vote of the Legislature. Whenever a vacancy shall occur in the office of Governor before the first three years of the term shall have expired, a new election for Governor shall take place to fill the vacancy.

Vacancies in Other Executive Departments

17. If the office of Secretary of State, Auditor, Treasurer, State Superintendent of Free Schools, or Attorney General, shall become vacant by death, resignation, or otherwise, it shall be the duty of the Governor to fill the same by appointment, and the appointee shall hold his office until his successor shall be elected and qualified in such manner as may be prescribed by law. The subordinate officers of the executive department and the officers of all public institutions of the State shall keep an account of all monies received or disbursed by them, respectively, from all sources, and for every service performed, and make a semi-annual report thereof to the Governor under oath or affirmation; and any officer who shall wilfully make a false report shall be deemed guilty of perjury.

[The amendment of this section was proposed by House Joint Resoution of February 15, 1901 (Acts 1901, p. 460) and ratified at the general election in 1902. The only change in the original section was the insertion of the words "Secretary of State" in the first line and by substitution of the words "prescribed" for the word "provided." For the vote on the adoption of the amendment, see note following section 2 of this article.]

Executive Heads to Make Reports

18. The subordinate officers of the Executive Department and the officers of all the public institutions of the State, shall, at least ten days preceding each regular session of the Legislature, severally report to the Governor, who shall

transmit such report to the Legislature; and the Governor may at any time require information in writing, under oath, from the officers of his department, and all officers and managers of State institutions, upon any subject relating to the conditions, management and expenses of their respective offices.

Salaries of Officials

19. The officers named in this article shall receive for their services a salary to be established by law, which shall not be increased or diminished during their official terms, and they shall not, after the expiration of the terms of those in office at the adoption of this amendment, receive to their own use any fees, costs, perquisites of office, or other compensation, and all fees that may hereafter be payable by law, for any service performed by any officer provided for in this article of the Constitution, shall be paid in advance into the State treasury.

[This section, prior to amendment, read as follows: "The Governor shall receive for his services a salary of twenty-seven hundred dollars per annum and no additional emolument, allowance or perquisite shall be paid or made to him, on any account. 3. It shall have original jurisdiction in cases of *habeas corpus*, *mandamus*, and prohibition. It shall have appellate jurisdiction in civil cases where the matter in controversy, exclusive of costs, is of greater value or amount than one hundred dollars; in controversies concerning the title or boundaries of land, the probate of wills, the appointment or qualification of a personal representative, guardian, committee or curator; or concerning a mill, road, way, ferry or landing; or the right of a corporation or county to levy tolls or taxes; and, also in cases of *quo warranto*, *habeas corpus*, *mandamus*, *certiorari*, and prohibition, and in cases involving freedom or the constitutionality of a law.

Writ of Error, Supersedeas and Appeal

6. A writ of error, *supersedeas*, or appeal shall be allowed only by the Supreme Court of Appeals, or a judge thereof, upon a petition assigning error in the judgment or proceedings of the inferior court and then only after said court or judge shall have examined and considered the record and assignment of errors, and is satisfied that there is error in the same, or that it presents a point proper for the consideration of the Supreme Court of Appeals.

Forfeited Lands

3. All title to lands in this State heretofore forfeited, or treated as forfeited, waste and unappropriated, or escheated to the State of Virginia, or this State, or purchased by either of said States at sales made for the non-payment of taxes and become irredeemable, or hereafter forfeited, or treated as forfeited, or escheated to this State, or purchased by it and become irredeemable, not redeemed, released or otherwise disposed of, vested and remaining in this State, shall be, and is hereby transferred to, and vested in any person (other than those for whose default the same may have been forfeited or returned delinquent, their heirs or devisees), for so much thereof as such person has, or shall have had, actual continuous possession of, under color or claim of title for ten years, and who, or those under whom he claims, shall have paid the State taxes thereon for any five years during such possession; or if there be no such person, then to any person (other than those for whose default the same may have been forfeited, or returned delinquent, their heirs or devisees), for so much of said land as such person shall have title or claim to, regularly derived, mediately or immediately from, or under a grant from the Commonwealth of Virginia, or this State, not forfeited, which but for the title forfeited would be valid, and who, or those under whom he claims has, or shall have paid all State taxes charged or chargeable thereon for five successive years, after the year 1865, or from the date of the grant, if it shall have issued since that year; or if there be no such person, as aforesaid, then to any person (other than those for whose default the same may have been forfeited, or returned delinquent, their heirs or devisees), for so much of said land as such person shall have had claim to and actual continuous possession of, under color of title for any five successive years after the year 1865; and have paid all State taxes charged or chargeable thereon for said period.

Waste and Unappropriated Lands

4. All lands in this State, waste and unappropriated, or heretofore or hereafter for any cause forfeited, or treated as forfeited, or escheated to the State of Virginia, or this State, or purchased by either and become irredeemable, not redeemed, released, transferred or otherwise disposed of, the title whereto shall remain in this State till such sale as is hereinafter mentioned, be made, shall by proceedings in the circuit court of the county in which the lands, or a part thereof, are situated, be sold to the highest bidder.

Former Owner's Privilege

5. The former owner of any such land shall be entitled to receive the excess of the sum for which the land may be sold over the taxes charged and chargeable thereon, or which, if the land had not been forfeited, would have been charged or chargeable thereon, since the formation of this State, with interest at the rate of twelve per centum per annum, and the costs of the proceedings, if his claim be filed in the circuit court that decrees the sale within two years thereafter.

Land Books—Taxes

6. It shall be the duty of every owner of land, or of an undivided interest therein, to have such land, or such undivided interest therein, entered on the land books of the county in which it, or a part of it, is situated, and to cause himself to be charged with taxes legally levied thereon and pay the same. When, for any five successive years, the owner of any tract of land, or undivided interest therein, shall not have been charged on such land books with state, county and district taxes thereon, then, by operation hereof, the land, or undivided interest therein, shall be forfeited and title vested in the State. But if, for any one or more of such five years, the owner of such land, or of any undivided interest therein, shall have been charged with state, county and district taxes on any part of such land, such part thereof, or undivided interest therein, shall not be forfeited for such cause. And any owner of land so forfeited, or of any interest therein, at the time of the forfeiture thereof, who shall then be an infant, married woman, or insane person, may, until the expiration of three years after the removal of such disability, have the land, or such interest, charged on such land books, with all state and other taxes that shall be, and but for the forfeiture would be, chargeable on the land, or interest therein, for the year one thousand eight hundred sixty-three, and every year thereafter, with interest at the rate of ten per centum per annum, and pay all taxes and interest thereon for such years, and thereby redeem the land or interest therein: *Provided*, That such right to redeem shall in no case extend beyond twenty years from the time such land was forfeited.

[This section, prior to its amendment, read as follows: "It shall be the duty of every owner of land to have it entered on the land books of the county in which it, or a part of it, is situated, and to cause himself to be charged with the taxes thereon, and pay the same. When for any five successive years after the year 1869, the owner of any tract of land containing one thousand acres or more, shall not have been charged on such books with State tax on said land, then by operation hereof, the land shall be forfeited and the title thereto vested in the State. But if, for any one or more of such five years, the owner shall have been charged with State tax on any part of the land, such part thereof shall not be forfeited for such cause. And any owner of land so forfeited, or of any interest therein at the time of the forfeiture thereof, who shall then be an infant, married woman, or insane person, may, until the expiration of three years after the removal of such disability, have the land, or such interest charged on such books, with all State and other taxes that shall be, and but for the forfeiture would be, chargeable on the land, or interest therein for the year 1863, and every year thereafter with interest at the rate of ten per centum per annum; and pay all taxes and interest thereon for all such years and thereby redeem the land or interest therein: *Provided*, Such right to redeem shall in no case extend beyond twenty years from the time such land was forfeited."

The amendment as set forth above was proposed by House Joint Resolution No. 4, adopted January 22, 1934 (Acts Second Ex. Sess. 1933, p. 583) and was ratified at the general election in 1934. Vote on the amendment: For ratification, 257,090; against ratification, 177,796; majority, 79,294.]

WEST VIRGINIA

By COL. LOUIS A. JOHNSON
Vice Chairman, State Council of Defense

H. G. Wells said that ours is a generation which has an appointment with destiny. Few will doubt that statement—only the foolish will contend we can avoid that destiny.

In one of Somerset Maugham's books is the story of Sammara. A merchant from Baghdad sent his servant to the market place to purchase the day's supplies. In a little while the servant returned, white and trembling. He said: "Master, may I borrow your horse that I may ride away?" The master replied: "What has happened?" The servant said: "I went to the market place, as you ordered, and there I saw an old woman and she was Death and she made a threatening gesture at me. Now I want to borrow your horse and ride to Sammara that I may avoid my destiny."

The merchant gave the servant his horse and the servant rode away as fast as he could to Sammara. A little later, the merchant, curious as to what had happened, went down to the market place and there he saw the old woman who was Death. He approached her and said: "Why did you threaten my servant?" The old woman answered: "I did not threaten your servant. When I saw him I made a gesture—it was a gesture of surprise, because I had an appointment with him in Sammara tonight and I wondered what he was doing in Baghdad."

Wendell Willkie said recently: "The world cannot live without the United States of America."

Let's go a step further and remember that the United States of America cannot live without the rest of the world!

America is the living shrine of human freedom. America is God's pledge to civilization of the dignity and freedom of the human soul.

The United States was founded and a war was fought because our forefathers believed tremendously in freedom. We have enjoyed that freedom—that great freedom. And today, in this beautiful and progressive State—our West Virginia—may I suggest that the freedom we have enjoyed connotes and implies great responsibilities!

A State is something more than a mere geographic division with beautiful scenery, natural resources and mineral wealth. It takes men and women to make a great commonwealth and we, in West Virginia, are singularly blessed.

The motto of our State represents our spirit—"Montani Semper Liberi"—Mountaineers always freemen.

The State motto was proposed by Joseph H. Diss DeBar, a native of Switzerland, who came to the United States in 1842. This motto was familiar to him. He had heard it all his life in Switzerland, where for centuries it had expressed the spirit of freedom of the hardy mountaineers of that country. The motto typifies the spirit of West Virginia, of the mountain men of today, who love freedom and preach and practice tolerance.

It was on the soil of West Virginia that the earliest blows for American freedom were struck. Here the last battle of the American Revolution and the first battle between the States were fought. Sons of West Virginia have fought in every war in which the United States has engaged. It is recorded that when Washington was asked what would have been the consequences had the patriots failed at Yorktown, he replied:

"With but a banner left and the means to reach West Augusta (now West Virginia), I would have rallied around me the men who would lift their bleeding country from the dust and set her free."

West Virginians of today understand that the "wave of the future" is the wave of destruction that must be curbed if the world of free men is to survive. We of West Virginia know there are many reasons why America cannot sit idly by and see freedom pass from the rest of the world. One of these reasons is very selfish—for if freedom passed from the rest of the world, then it would surely pass from this, its last and greatest stronghold. And if freedom passed, so would pass the civilization that our fathers and forefathers and all West Virginians have known and fought for.

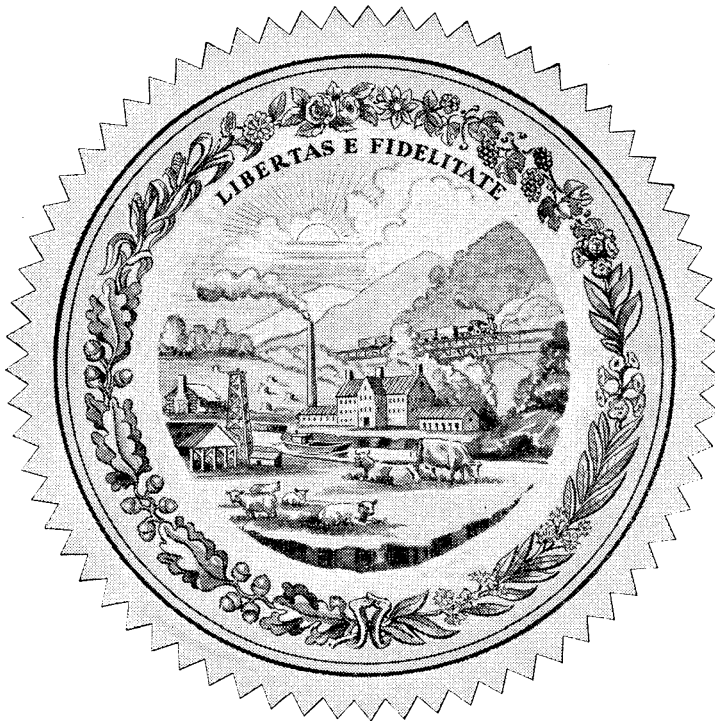

West Virginia, under sound leadership, will continue to do its part that this nation of free men shall fulfill its high destiny.

THE GREAT SEAL AND COAT-OF-ARMS OF WEST VIRGINIA

(Obverse of Seal on front cover; reverse on this page)

The Great Seal and Coat-of-Arms of West Virginia, adopted by the Legislature on September 26, 1863, was designed by Joseph H. Diss Debar, of Saint Clara, Doddridge County, who served as Commissioner of Immigration under Governor Boreman and who was a member of the Legislature of 1864.

Most accurate description of the Seal is gleaned from the report of the legislative committee made September 23, 1863, based on suggestions and designs of Mr. Debar. That report follows:

"The disc of the Great Seal is to be two and one-half inches in diameter; the *obverse* to bear the legend, 'The State of West Virginia,' the constitutional designation of our Republic, which with the motto, 'Montani Semper Liberi—Mountaineers always free'—is to be inserted in the circumference. In the center a rock with ivy, emblematic of stability and continuance, and on the face of the rock the inscription, 'June 20, 1863', the date of our foundation, as if graven with a pen of iron in the rock forever. On the right of the rock a farmer clothed in the traditional hunting garb, peculiar to this region, his right arm resting on the plow handles, and his left supporting a woodman's axe, indicating that while our

territory is partly cultivated, it is still in the process of being cleared of the original forest. At his right hand a sheaf of wheat and a cornstalk on the left hand of the rock, a miner, indicated by a pick-axe on his shoulder, with barrels and lumps of mineral at his feet. On his left an anvil, partly seen, on which rests a sledge hammer, typical of the mechanic arts, the whole indicating the principal pursuits and resources of the State. In front of the rock and the hunter, as if just laid down by the latter and ready to be resumed at a moment's notice, two hunters' rifles, crossed and surmounted at the place of contact by the Phrygian cap, or cap of liberty, indicating that our freedom and liberty were won and will be maintained by the force of arms.

"The reverse of the Great Seal is to be encircled by a wreath composed of laurel and oak leaves, emblematical of valor and strength, with fruits and cereals, productions of the State. For device, a landscape. In the distance, on the left of the disc, a wooded mountain, and on the right a cultivated slope with the log farmhouse peculiar to this region. On the side of the mountain, a representation of the viaduct on the line of the Baltimore and Ohio Railroad in Preston County, one of the great engineering triumphs of the age, with a train of cars about to pass over it. Near the center a factory, in the front of which a river with boats, on the bank and to the right of it nearer the foreground, a derrick and a shed, appertaining to the production of salt and petroleum. In the foreground a meadow with cattle and sheep feeding and reposing, the whole indicating the leading characteristics, productions and pursuits of the State at this time. Above the mountain, etc., the sun merging from the clouds, indicating that former obstacles to our prosperity are now disappearing. In the rays of the sun the motto 'Libertas et Fidelitate'—Freedom and Loyalty—indicating that our liberty and independence are the result of faithfulness to the Declaration and the National Constitution."

The Constitution of West Virginia, Article II, Section 7, provides that: "The present seal of the State, with its motto 'Montani Semper Liberi,' shall be the Great Seal of the State of West Virginia, and shall be kept by the Secretary of State, to be used by him, officially as directed by law."

The reverse of the Great Seal has not been in use in recent years.

WEST VIRGINIA STATE FLAG

The present design for the West Virginia State Flag was adopted by the Legislature on March 7, 1929. The proportions are the same as those of the United States ensign.

The field is pure white, upon the center of which is emblazoned in proper colors the coat-of-arms of the State, upon which appears the date of the admission of West Virginia into the Union and the motto "Montani Semper Liberi" (Mountaineers Always Freemen).

Above the coat-of-arms of the State of West Virginia there is a ribbon lettered, "State of West Virginia," and a wreath of *rhododendron maximum* in proper colors is arranged appropriately around the lower part thereof. The field of pure white is bordered by a strip of blue on four sides.

THE STATE FLOWER

The rhododendron, or big laurel (*rhododendron maximum*), was named as the official State Flower under the provisions of a joint resolution adopted by the Legislature of West Virginia on January 23, 1903, during the administration of Governor Albert Blakeslee White.

AGRICULTURE

TEST-TUBE FARMING

Legislative recognition of the importance of science in agriculture has set up a strong protective wall around many divisions of West Virginia's farm enterprise. It is doubtful, however, if even the principal beneficiaries realize how for this safeguard extends to the many familiar and essential things which they must buy or produce to operate their farms.

Nearly all the homely machinery of the farm is affected. For instance, a farmer buys a package of vegetable seeds in the spring. The label, according to West Virginia law, must tell the buyer the percentage of pure seed contained in the package, the percentage of weed seeds, the kind and number per ounce of all noxious weeds present, the guaranteed percentage of germination, and the month and year in which the seed was tested. The name and address of the company preparing the package must be shown.

But, the layman may ask, what is to prevent an unscrupulous seedsman from falsifying his labels?

The answer is that the State law provides for a laboratory examination to assist enforcement. Inspectors of the State Department of Agriculture pick up samples of field and vegetable seeds everywhere in the State, and send their samples to the Department's seed laboratory at Charleston where the claims made on the label are checked and counter-checked. If violations are found, the seeds are removed from the market until properly labeled. Occasionally, persistent violations lead to the revocation of the license of a seed company to do business in the State.

To support the enforcement of the State agricultural law, as well as to advance its various programs, the State Department of Agriculture operates laboratories at Charleston and at Martinsburg, the latter in the heart of the commercial apple-producing belt.

Hundreds of Seed Samples Tested

In the seed laboratory at Charleston, hundreds of seed samples are tested annually. Tests are not confined to seed samples submitted by inspectors of the department engaged in regulatory work. Some are sent in by individual farmers. Frequently farm organizations engaged in cooperative programs submit samples for analysis. Other tests are made at the request of Federal and State institutions, and at the request of seed dealers themselves.

Side by side with the seed laboratory, the State Department of Agriculture operates a chemistry laboratory where thousands of samples of feeds, fertilizers, lime, butter, milk, cream, and other agricultural products are analyzed every year.

It is impossible for a farmer without specialized knowledge and without suitable equipment to look at a commercial fertilizer and tell what plant foods it contains and in what amounts. It is equally impossible to tell by looking at a commercial livestock feed how much protein, fat and fiber it contains. In the same way, the value of lime cannot be known except by actual test. Setting up an added safeguard for the farmer, therefore, the State Legislature has directed the Commissioner of Agriculture to protect the buyer against improper labeling of commercial feed and commercial fertilizers, and to check also on the value of agricultural line offered for sale in the State.

In a normal year, well over a thousand samples of commercial feeds will be analyzed in connection with the State Department's regulatory work. In addition, the Department's laboratory regularly analyzes feed samples for millers, manufacturers, farmers, and state institutions. Several hundred samples of commercial fertilizers will be analyzed in the course of a biennial period.

Complete Tests on Dairy Products

Tests made on butter, cream, and other dairy products include analyses for the percentage of fat in butter, a determination of the nature of the fat itself, and an examination for the presence of foreign matter.

In the Department's laboratory at Martinsburg, apples are tested for spray residue. In the production of apples, the orchardist uses a spray mixture to control insect pests. The laboratory examination is to determine whether a residue of this spray remains in excessive amounts. Thousands of apple samples are tested annually in the Martinsburg laboratory.

The Department's animal pathology laboratory is an important scientific division operating at Charleston. This laboratory runs nearly a quarter of a million tests a year on animals and poultry owned by West Virginia farmers. The work consists principally of serum tests on cattle, both dairy and beef breeds, for the detection of Bang's disease, and tests on chicken blood serum to detect the carriers of Pullorum disease.

Indicating the extent of this work, in the past year over 116,000 blood samples taken from cattle in West Virginia were tested for the detection of Bang's disease. In the same period 113,000 samples were examined in connection with the poultry program. Records of the animal pathology laboratory show that demands for its services have increased 100 per cent in four years.

111,000 Birds Pass Examination

As a practical demonstration of the value of the laboratory program, 111,000 birds passed the test for Pullorum disease the past season and their eggs, therefore, are eligible for sale to the numerous West Virginia hatcheries which sell baby chicks labeled as originating from officially blood-tested stock.

Aside from its heavy routine duties, the animal pathology laboratory provides other services for West Virginia farmers. Included is much post-mortem diagnostic work on animals and poultry and other tissue examinations.

Frequently the service thus rendered becomes personal, extending outside the walls of the laboratory. For example, upon receiving a diagnostic report on the cause of illness among his poultry flock, a Raleigh county farmer declared he couldn't see how his birds possibly were infected. They were in battery brooders which have a wire floor, and their feed and water was on the outside, the birds reaching it through holes constructed for such a purpose in the sides of the battery. An investigation being in order, a member of the laboratory staff traced the source of the birds' water back to a perfectly sealed cistern. Apparently there was no opportunity for infection between the cistern and the battery.

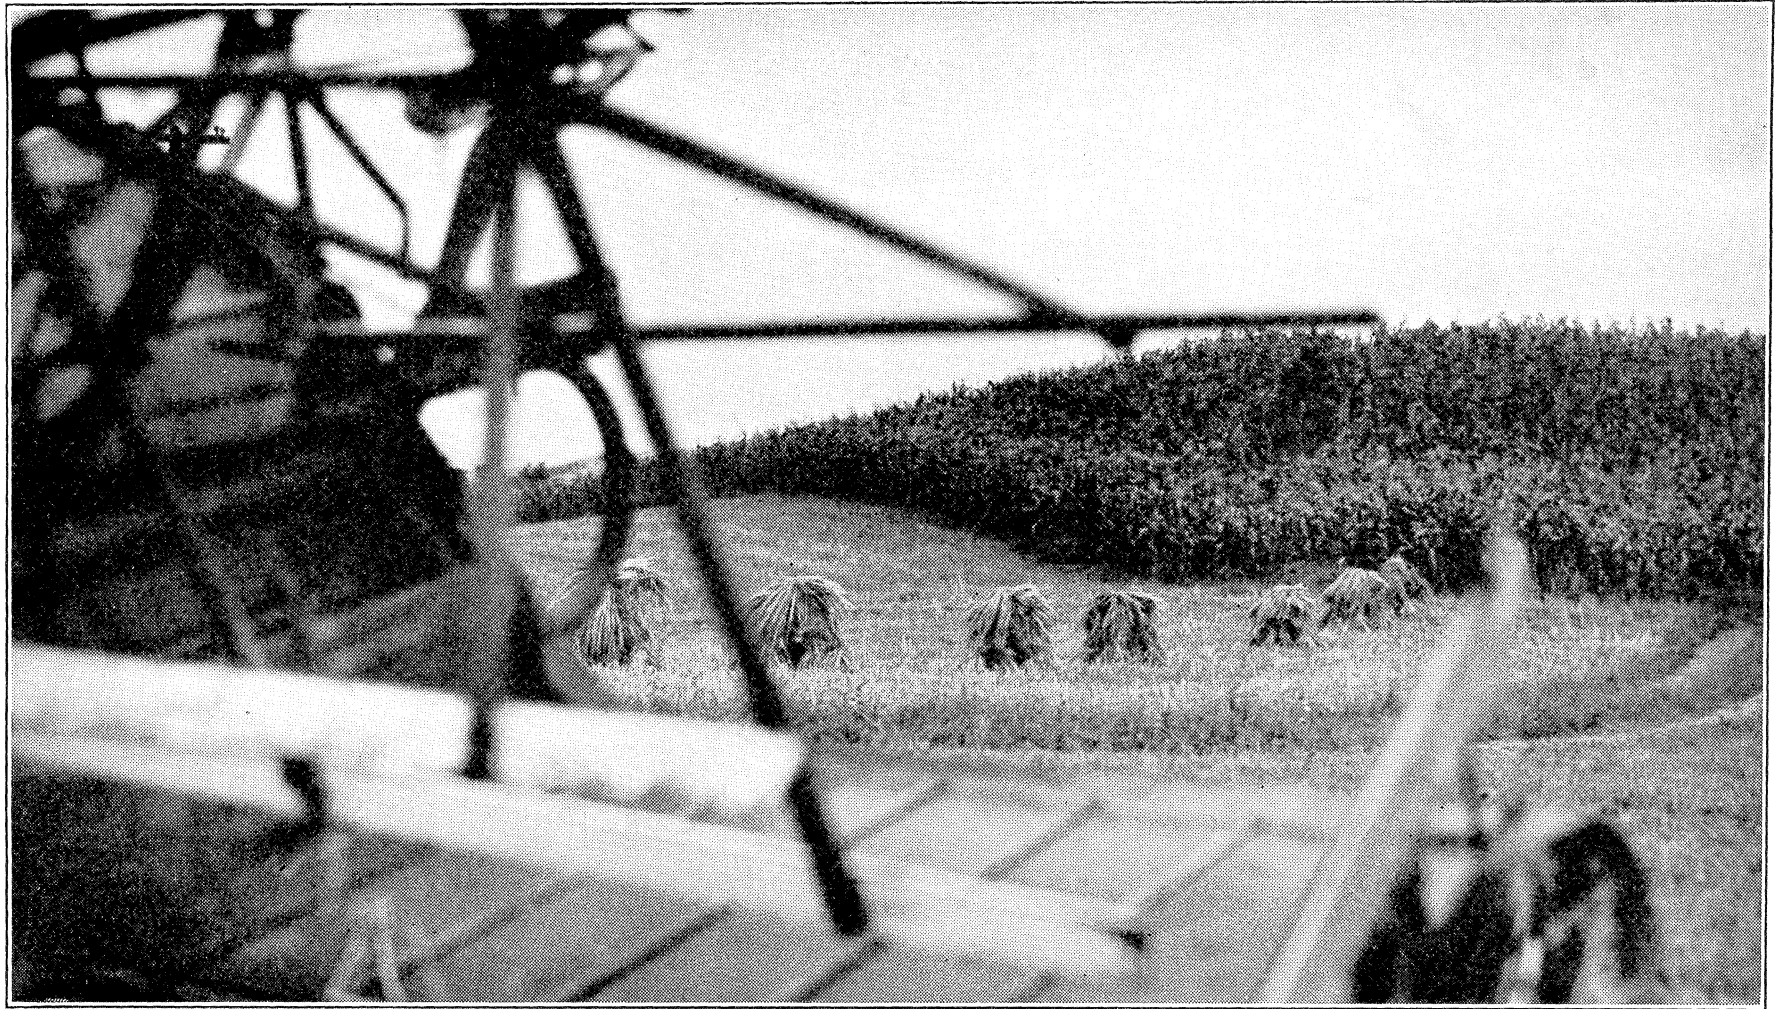

The laboratory worker asked the source of the water in the cistern and was told it was pumped directly from a spring some distance away. Had there ever been poultry kept near the spring? Yes, the farmer said, some years ago poultry had ranged near the spring. There was the source of infection.

Ailing Gold Fish Under Microscope

On another occasion, a worried owner brought a bowlful of ailing gold fish to the laboratory. An examination disclosed some type of parasite on the scales of the fish. The parasite was unknown to the members of the laboratory staff and a sample was sent to the United States Department of Agriculture at Washington for examination. The parasite was identified as a rare tropical variety previously unreported in the United States.

Extra-curricular duties are not confined to the animal pathology laboratory. Not so many months ago uniformed officers of the law called at the chemistry laboratory and asked that a species of plant be identified. It was marijuana.

Agricultural research in recent years has produced many new discoveries. Almost invariably the announcement of a new discovery in an agricultural process prompts firms and individuals to attempt to capitalize on the development, and new "magic" products appear on the market in wide and marvelous variety. Frequently the Department of Agriculture's laboratory finds it necessary to check upon these new offerings. If they are worthless, the public is informed.

THE AMERICAN'S CREED

I believe in the United States of America as a Government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice, and humanity for which American patriots sacrificed their lives and fortunes.

I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag; and to defend it against all enemies.—*William Tyler Page.*

THE PLEDGE TO THE FLAG

I pledge allegiance to the Flag of the United States of America.
 And to the Republic for which it stands,
 One Nation, indivisible,
 With liberty and justice for all.

CONSERVATION

WHAT THE CONSERVATION COMMISSION IS DOING

The Conservation Commission was created by the Legislature of West Virginia in 1933 to provide an organization for the protection, beautification, development and use of lands, forests, fish, game, waters, plant and animal life, and the natural and scenic resources of the State. It also serves as an agency for the use of forest lands and other natural resources for projects to relieve unemployment. The following article, prepared by the Commission, describes its achievements.

In the work of regulating the use of certain renewable natural resources so that the public interest will benefit and intelligent measures concerning game and fish, forests, waters and scenery can be adopted, the Commission has followed a long-view program. A conservation project by its very nature is something which must usually operate over a period of years before results can be seen.

Nevertheless, statistics and reports on various activities will give a reasonable idea of what is being accomplished.

With the full cooperation of the State Legislature and Governor, and the active support of thousands of public-spirited men and women, the Conservation Commission's financial resources since 1933 have been greatly strengthened. Since all activity costs something, this improvement in conservation funds is significant. Revenues accrue from these sources: (1) hunting and fishing licenses, (2) legislative appropriations for forest fire protection, for operation and maintenance of State parks and State forests, for fish stocking, and (3) allocations by the Federal Government for forest fire suppression, game restoration and land purchases. In some the use of funds is quite involved, but all uses are properly defined by law, and a strict accounting is given to the public each year, with the secretary of the commission acting as chief fiscal officer. Although the various sums vary from year to year, on an average the Commission, for all purposes, has a total of \$600,000 annually.

The steadily increasing sale of hunting and fishing licenses reflects the response of the public to improved opportunities for outdoor recreation.

With the expansion and establishment of new fish hatcheries, greater efforts are possible in producing game fish. At present more than 2,000,000 fish are released each year. Even more significant is the fact that in 1941 the Commission planted approximately 100,000 legal size trout for anglers before the open season. Since the number of fishermen is estimated at well over 100,000 and the water area is limited (West Virginia has 148 square miles of water area, making it 44th among all states in this respect), placing legal size fish makes it possible for more persons to catch their favorite species. In addition, the Commission conducts stream investigations and surveys, and devises improvement methods so that more fish can be produced naturally in a given stream. Highly trained technical experts are used for this purpose.

The same application of technical help is made to game problems. Experts study food and cover conditions and work out improvement practices which will permit various types of game to thrive and multiply in number. Numerous game refuges supplement this work. The deer herd in the State is an example of how

the combination of technical improvement and stocking works. It is easier to make comparison with deer since rather complete records are available. The legal deer kill in the State has increased from 315 in 1933 to 1,110 in 1940. The deer herd now is estimated at 32,000.

When climatic and other factors deplete a species of game, restocking is resorted to. The Commission has planted more than 30,000 cottontail rabbits, 31,000 bobwhite quail, 600 deer, 800 raccoon, 300 wild turkeys, and 200 pheasants since 1933.

The Commission further protects the supply of both game and fish by setting hunting and fishing seasons in accordance with the wildlife supply available each year, as determined by extensive investigations, and in accordance with biological factors so that all species will have a chance to produce a new crop before being taken. Extensive surveys of wildlife habitat and game population have been started recently in cooperation with the Federal Government.

In forestry, the Commission now gives fire protection to more than 9,000,000 acres of timber land, or roughly two-thirds of the State's area. It operates 52 fire towers and 150 ranger stations. To reforest denuded areas, a forest tree nursery can produce 4,000,000 trees each year. Approximately 75,000 acres of forest lands have been purchased by the State and are operated as state forests and gam refuges, with recreational facilities for the public as well as timber management areas. Sustained yield practices in forestry, game and fish are favored.

A system of state parks has been developed since 1933 so that some 32,000 acres of scenic woodlands are devoted to public recreation on 12 different parks. More than 90 log cabins, 4 swimming areas, two artificial lakes, several hundred picnic tables and benches, and stoves have been constructed. More than 50 miles of motor roads carry traffic over the parks. Last year more than 500,000 persons used the parks for picnics and vacations.

Along with all these phases of work, the Commission conducts an extensive educational program to enlighten the public on conservation subjects and activities. With the cooperation of the State Department of Education and the various colleges and the University, an educational program is conducted in the schools so that all living in this State in the future will know more what conservation means to their welfare, and how to practice conservation intelligently. Behind the entire program is this thought:

Conservation is the wise use of natural resources so that present and future generations may enjoy their fullest benefits.

FISHING STREAMS AND SPECIES

(Compiled by J. W. Hesen, Jr., Fish Technician, Conservation Commission)

For the benefit of anglers who desire information relative to stocked fishing streams and nearest towns in which hotel accommodations can be found, the following list has been prepared. Numerous other streams and tributaries other than these listed have received substantial stockings of fish. These, however, are the largest, most important and probably the most capable of supporting extra heavy angling pressure. It must be understood that the order in which they are listed does not indicate the number of fish placed in the stream, or the anglers chances of catching fish. Fishing in any of these streams does not necessarily indicate that the Conservation Commission promises the limit of fish to each fisherman. It is intended merely as a guide.

EDUCATION

VOCATIONAL EDUCATION FOR NATIONAL DEFENSE

By WILLIAM A. WILLIAMS
Supervisor of Trade & Industrial Education,
State Department of Education

Vocational Education for National Defense has for its controlling purpose the development of trained personnel for employment adequate to meet the needs of the industries essential to or allied with the National Defense of our Country. All instruction must be under public supervision and control and must be of less than college grade level. The State Board for Vocational Education, with the same personnel as the State Board of Education, acts as trustee of Federal money appropriated by Congress for the Vocational Education Program for National Defense. These funds are not matched by any State or local funds and are used to reimburse the local school boards and State institutions where actual expenses are incurred in accordance with provisions of a particular plan under which courses are organized and operated.

The type of instruction provided for in these plans follows:

Vocational Education for Defense Workers

On Thursday, June 27, 1940, President Roosevelt signed the Appropriation Act. On July 15, 1940, the Program of Vocational Education for Defense Workers began operation in West Virginia. During the year ending July 31, 1941, there were enrolled in 19 training centers in this State a total of 11,139 students with 159 teachers operating 155 courses. These courses offer about 19 different subjects and are of two types:

1. Supplementary Courses. In supplementary courses, instruction is offered to employed persons who are engaged in an occupation essential to National Defense or in an allied occupation for the purpose of extending their skill and knowledge in such essential or allied occupations. The trainees must be recommended for the training by the local representative advisory committees and employers and must be American citizens, 18 years of age or over. Such courses are offered in local communities as evening and part-time trade extension classes and no fees are charged. Classes are conducted for any length or period of time found necessary to meet the needs of the workers in the industries concerned, but are usually from four to ten clock hours per week.

During the period July 15, 1940 to July 31, 1941, 4,712 supplementary students were enrolled in 12 training centers in the State of West Virginia. Sixty-nine supplementary courses which include Arc Welding, Oxy-acetylene Welding, Wood Trades, Electrical Work, Sheet Metal Pattern Drafting, Machine Operation, Combination Welding, Metallurgy, Machine Shop Practice, and Internal Combustion Engines are now being offered in the following centers: Benwood, Charleston, Huntington, Martinsburg, Parkersburg, Wheeling, Williamson, West Virginia Institute of Technology, West Virginia University, Weirton, Webster Springs, and Elkins.

2. Pre-employment Refresher Courses. In pre-employment courses specific instruction is given to persons of legally employable age, 18 years of age or over at the time of completion of the course, selected from the Public Employment registers, who upon completion of the training course will be qualified for employment in occupations essential to the National Defense. Wherever possible, approximately 50 per cent of the refresher course trainees are selected from the local WPA rolls by agreement with the Work Projects Administration. The

students remain on the WPA while studying. All students must be American citizens and must prove their ability to profit by the instruction offered. Pre-employment courses run six or eight hours per day for five days per week and are conducted at any time during the 24-hour period. By July 31, 1941, 6,427 pre-employment students were enrolled in 19 training centers in the State. Eighty-six pre-employment courses which include Arc Welding, Oxy-acetylene Welding, Wood Trades, Electrical Work, Drafting, Metal Work, Airplane Engine Mechanics, Machine Operation, Combination Welding, Internal Combustion Engines, Diesel Engines, Foundry, and Pattern Making are being offered at Benwood, Bluefield, Charleston, Elkins, Fairview, Huntington, Madison, Martinsburg, Morgantown, Parkersburg, Webster Springs, Weirton, Wheeling, Williamson, St. Marys, Sistersville, West Virginia Institute of Technology, West Virginia State College, and West Virginia University.

Placements from pre-employment courses in West Virginia have reached a total of 1,664 by July 31, 1941. Approximately 80 per cent of these men have found work in industries directly essential to the National Defense. Others found work in employment not directly essential. Many of these young men have gone to various other states in the Union and have found work in aviation industries, shipbuilding industries, ordnance plants, and other defense industries.

Vocational Education of Out-of-School Rural and Non-Rural Youth

Courses for Vocational Education of Out-of-School Rural and Non-Rural Youth that began operation in January, 1941, included two types:

1. **General Pre-employment.** These courses offer basic vocational instruction designed to meet the needs of out-of-school youth to increase their employability as defense workers. The approved courses provided instruction in the following subjects: Operation, Care, and Repair of Tractors, Trucks, or Automobiles, including both gas and Diesel engines; Metal Work, including simple welds, tempering, drilling, shaping, and machinery repair; Woodworking; and Elementary Electricity, including operation, care, and repair of electrical equipment. These courses were offered in established school farm shops and industrial arts shops throughout the State. Enrollees included youth from rural areas, youth from non-rural areas, CCC boys, and NYA project workers. Sixty-five per cent of the enrollees came from rural areas, while the remaining 35 per cent came from communities of more than 2,500 inhabitants. Courses of instruction were offered for not less than 15 clock hours per week and were offered at any time during the 24 hours per day when facilities were available. Youths were defined as individuals between the age of 17 and 25 years. By July 31, 1941, 6,617 students were enrolled in 303 courses in West Virginia.

2. **Specific Pre-employment Preparatory Courses.** These courses provided training for specific jobs and included the following subjects: Riveting; Welding; Machine Shop Occupations, such as related work, drill press operation, and bench work; Aircraft Sheet Metal Work; and Radio Service and Repair. This instruction was designed to meet the needs of out-of-school youth for whom training was not feasible under the provisions of the Plan of Vocational Education for Defense Workers in order to prepare them for employment in occupations essential to National Defense. Instruction in this type of course was set up for not less than 30 hours per week and the trainees were to meet the same conditions as under the general pre-employment plan. Under the new Act, the specific pre-employment preparatory courses are now to be operated under the Program of Vocational Education for Defense Workers known as the No. 1 Program. By July 31, 1941, 421 trainees were enrolled in specific courses in West Virginia.

Vocational Education for Youth Employed on NYA Work Projects

Courses for Vocational Education of Youth Employed on NYA Work Projects which began in January included three types:

1. **Supplementary Training.** These courses were designed to give extension training supplementary to the work experience provided by the NYA work projects.

2. **Preparatory Training.** These courses were organized to give preparatory training as an aid in the occupational adjustment of NYA workers.

3. **Other Instruction.** Other necessary instruction designed to enlarge the civic or vocational intelligence of young people employed on NYA work projects was offered under this subdivision.

Courses under these three subdivisions were offered to workers on resident work projects for at least 15 clock hours per week and for workers on non-resident work projects for a pre-determined number of hours per week which was set by the needs or interests of the group to be served. Up to July 31, 1941, 4,905 trainees were enrolled in courses under this division.

NEW SCHOOL LEGISLATION

By F. RAY POWER
Assistant State Superintendent of Schools

Quality as well as quantity distinguished the work of the 45th Legislature in behalf of education. Nineteen separate bills and two Senate concurrent resolutions were enacted into law, and a survey of those measures reveals that the legislation is unusually constructive, for the most part, designed to solve major educational problems, many of which were badly in need of solution.

No attempt will be made in this report to discuss all the provisions enacted into law. They include an actuarially sound teacher retirement system; a provision for the non-partisan nomination and election of county boards of education; a revised classification of teachers certificates; a liberalized plan for providing free textbooks; an increase in basic salaries for teachers having two or more years of college training; an amended formula for distributing State aid to the counties; a limitation on the employment of teachers by counties to the number approved by the State Board of School Finance; a revision in the professional requirements and terms of assistant superintendents and an increase in the annual travel allowance of superintendents and assistant superintendents; a provision for increasing the levy rates allocated for current expenses by the amount not required for debt purposes; an additional requirement concerning the teaching of the harmful effects of alcohol and narcotics; a revision of the compulsory attendance law; a provision for the use of a mechanical or electrical check signing device in counties having a population in excess of 50,000; a provision outlawing intimidation and coercion for political ends of non-elective public employees including teachers; a provision authorizing a municipality with a population of 50,000 or more to issue bonds to acquire land and construct a building or buildings for a college; a change in the name of New River State College to West Virginia Institute of Technology; a provision for the employment of a county music director for a twelve month term; an annual appropriation of \$25,000 for use in the education of crippled children; and an increase in the total biennial appropriation of state aid for support of county school systems by \$2,400,000.

A number of the measures referred to in the above paragraph are of major importance because they are destined to decidedly affect certain fundamental policies of school administration and to influence the development of the entire State educational system.

The Teacher Retirement Law is based upon the principal of joint contributions. Under it, teachers contribute four per cent of their salaries not in excess of \$2,500 and the State contributes an equal amount making a total of eight per cent for retirement. Upon retirement at age 60 or after 35 years of service the teacher receives the total of these contributions plus interest. In addition a pension is granted for teaching in the State prior to the establishment of the retirement system and ex-teachers who have 30 years of service in West Virginia may receive pensions. The law is administered by a board composed of seven members with the Governor as chairman.

The new retirement law in its broad structural outline is believed to be one of the best to be found in any state of the nation. By providing the necessary funds to put the act into immediate force, the Legislature made the retirement system a going concern which is already serving superannuated teachers. The plan will undoubtedly raise the morale of teachers by adding to their financial security and thereby contribute to the improvement of teaching throughout the schools.

Through the enactment of the law providing for the non-partisan nomination and election of members of county boards of education the Legislature committed the State to the policy of removing the administration of county school systems from partisan politics. The act provides that the ballots in the primary and general election shall be arranged so as to eliminate party designation of candidates for county boards of education. No person is eligible for membership on a board if he holds membership in any political party executive committee, or

becomes a candidate for or is appointed to any public office. A member is also ineligible for nomination for or appointment to any public office, other than to succeed himself unless and until his membership on the board has been terminated. The term of any member ceases upon determination of ineligibility.

The strict observance of the non-partisan board of education law will undoubtedly result in more efficient administration of county school systems. It is generally conceded that the education of youth is a public service which should operate free from the blighting influences of partisan politics. The new law is a definite step toward the accomplishment of this objective.

In revising the classification of teachers' certificates the Legislature took appropriate action to bring the certifying of teachers in step with educational progress. The act provides for the abolishment of uniform examinations, discontinues the issuance of the second grade certificate, provides for the issuance of five types of elementary certificates, two types of high school certificates, five types of certificates valid in both elementary and high school, three types of administrative certificates, and permits the issuance of other certificates with the approval of the State Board of Education. It also amends the law governing the granting of life certificates.

The new certificate law is progressive and forward looking. It simplifies and rationalizes the procedure for certifying teachers. It requires higher standards of teacher education. It should result in raising the professional level of teachers and contribute directly toward the improvement of instruction.

By increasing the basic minimum pay of teachers having two or more years of college training the Legislature recognized the need of higher salaries for better prepared teachers. The increases range from \$45 to \$135 annually depending on the type of certificate and affects approximately 90 per cent of the teachers of the State. Aside from the increases referred to above other changes included in the act are: (1) Establishment of a basic minimum salary for teachers holding a certificate based upon three years of college training; (2) Elimination of any salary provision for second grade certificates; (3) Authorization for boards of education to pay, if they desire, salaries higher than the new basic salary for teachers of one-room schools.

The increase in salaries will boost the morale of teachers and retain in the profession many capable persons who would otherwise accept positions in other lines of work. This additional expenditure for teachers' salaries may be regarded as a sound investment by the State which can reasonably be expected to result in the better education of youth.

A further detailed discussion of the educational measures enacted by the Forty-fifth Legislature cannot be made in this brief article. The ones discussed are believed to be of major importance in their influence upon the school system. A failure to discuss other measures does not mean that they are not of real worth or that they do not make a substantial contribution to the improvement of education.

It is generally agreed by those who are aware of the major problems affecting public education in West Virginia that the Governor and Legislature rendered an outstanding service to the schools by placing upon the statute books during the 1941 session a number of sound progressive laws. This new school legislation places West Virginia in a position to go forward in developing an improved educational system.

GEOGRAPHICAL CENTER OF WEST VIRGINIA

The geographical center of the state is $4\frac{3}{4}$ miles southeast of Sutton, 6 miles south of Flatwoods, and 4 miles west of Centralia.

DEPTH AVAILABLE FOR NAVIGATION

(Data Furnished by the War Department—Revised to July 1, 1941)

Ohio River—Improvement of the Ohio River, as authorized by Congress in the River and Harbor Act of June 25, 1910, provides for a channel depth of 9 feet in the entire 981 miles of the river by the construction of locks and dams and open channel work. The system of locks and dams throughout the river provides a navigable depth of 9 feet at ordinary river stage. New dams of modern design have been completed near Hogsett, West Virginia (Gallipolis Lock and Dam), and at Montgomery Island, 32 miles below Pittsburgh.

Monongahela River, West Virginia and Pennsylvania—The existing project provides for improvement of the river by 13 locks and dams to afford slack-water navigation from Pittsburgh, Pennsylvania, to 4 miles above Fairmont, a distance of 131 miles. The project is approximately complete and the controlling depth between Pittsburgh and Point Marion, Pa., 90.6 miles above the mouth is 9 feet, and above Point Marion 7 feet to the upper limits of the project.

Kanawha River, West Virginia—The existing project provides for the construction of 3 modern dams on the Kanawha River, with twin locks at London, Marmet and Winfield, and the Gallipolis lock and dam on the Ohio River, near Hogsett, West Virginia, to furnish a 9-foot navigable depth from the Ohio to a point 90.57 miles above the mouth. The dams at London and Marmet were completed in 1934, and the Winfield dam in 1937. The Gallipolis lock and dam was completed in October, 1937, thus making available a channel depth of 9 feet from the mouth of the river to the head of navigation.

Big Sandy River, West Virginia and Kentucky, Including Levisa and Tug Forks—The existing project provides for 3 locks and dams on the main river, 2 locks and dams each on Levisa Fork and Tug Fork, and regulating works below Lock No. 1, reaching to the Ohio River. The 3 locks and dams on the main river and the lower lock and dam on each fork have been constructed, providing a slack-water depth of 6 feet from the Ohio River to Louisa, Kentucky, 27 miles, and thence to Cox Branch on Levisa Fork and to Bear Branch on Tug Fork, 17.5 and 12.5 miles, respectively, above Louisa.

Tygart River Reservoir Project—The Tygart River Dam, located on the Tygart River $2\frac{1}{4}$ miles upstream from Grafton, as authorized by the Public Works Administration January 11, 1934, and approved by Congress in the River and Harbor Act of August 30, 1935, provides for a dam 1,880 feet long and 207 feet high for the storage of 290,000 acre-feet of water to control floods and aid navigation in the Monongahela River. The dam has been completed and is now in operation as a unit in the reservoir system for the protection of Pittsburgh and the upper Ohio Valley generally.

Bluestone Reservoir Project—The proposed Bluestone Reservoir, located on the New River, $2\frac{1}{2}$ miles above Hinton, was authorized by Executive order dated September 12, 1935, and approved by Congress in the Flood Control Act of June 22, 1936. The project, designed to afford flood control in the Kanawha and Ohio Valleys, for the development of power, and as an aid to navigation, provides for a concrete gravity type dam 165 feet high and 2,060 feet long, and a reservoir with a storage capacity of 610,000 acre-feet, extending approximately 36 miles up stream from the dam. Congress in the Flood Control Act of June 28, 1938, modified the provisions of the act of June 22, 1936, and authorized the acquisition of all necessary lands, easements and rights-of-way by the Federal Government. Funds are available to initiate construction as soon as steps for the acquisition of lands for the dam site are completed.

INDUSTRY

A QUARTER-CENTURY OF INDUSTRIAL PROGRESS IN WEST VIRGINIA

By EARLE L. ELMORE

Director of Research, West Virginia Chamber of Commerce

A survey of industrial West Virginia made during the summer of 1941 reveals developments during the past quarter of a century which are very gratifying to those concerned with the State's progress. The advances made have not been featured so much by the enlargement of the industrial establishment as by the nature of the changes which have been made in existing industries. The chemical industry is practically the only substantial and completely new line of activity that has developed during the past 25 years. It is notable that the great chemical plants which now use West Virginia coal, natural gas, and other natural resources in the making of products unknown a quarter of a century ago have, in a relatively short time, made our chemical development one of the wonders of the modern industrial world.

Almost as striking, and certainly of great industrial importance, has been the recent transformation in the methods of mining our bituminous coal. Coal mining has become virtually a factory process as a result of the introduction of mechanical mining equipment. Our reserves of natural gas and petroleum, the exhaustion of which was predicted by eminent authorities "within ten years," in 1914, have been immensely enlarged by new and scientific methods of well-location, re-pressuring, and by the development of improved deep-well drilling methods. The number of factories engaged in making glass has been very much reduced, but the value of our glass products has materially increased, and the tonnage, or numbers of tumblers, bottles, or other glass containers, has been multiplied four-fold, by reason of the introduction of machinery, and mass production methods during the past 25 years. Technological improvements in the manufacture of steel, with incidental expansion of our steel plants; the establishment of new, or the amplification of old, textile and other plants, has been only slightly less notable than the changes made in the gas-making industry, or the establishment of the chemical industry which has drawn world-wide attention.

West Virginia has not been behind the procession in the matter of adopting new methods of highway construction, in air-conditioning, in the use of labor-saving machinery in homes and factories generally, nor in the development of radio, or the expanded use of electrical power. The State's agriculture, too, is feeling the impact of soil conservation, better marketing, and a growing realization on the part of economists, statesmen, and farmers, that one of the most fertile and profitable fields for expansion is in the business of producing more of the things West Virginians eat.

To relate the complete story of the changes that have featured the enterprise system in West Virginia since 1915 would take more space than is available here, and we therefore shall mention briefly only a few of the outstanding developments.

The Bituminous Coal Industry

The production of bituminous coal, West Virginia's largest industry, has been strongly influenced in recent years by many technological changes in both production and utilization of this most important fuel. The introduction of mechanical equipment into our mines makes the mining of coal virtually a factory-process.

In 1940, 30,249,989 tons, or 23.9 per cent of the total of 126,619,825 tons mined in the State were loaded wholly or in part by the use of mechanical loading equipment. About half of the mechanically loaded coal was hand-loaded on conveyors. Two hundred and twenty-seven of the 541 commercial mines used mechanical loading equipment in 1940. Most of the mechanization in West Virginia's mines has occurred since 1932.

Logan County led in coal produced mechanically in 1940 with a total production of 7,897,573, or 46 per cent of the total coal produced in the County; Monongalia County was second with 6,940,724 tons, which was 87.7 per cent of a total output of 7,918,789; and Marion County was third with 3,524,642 tons of mechanically loaded coal out of a total of 9,039,387 tons.

The use of machinery in mining naturally results in fewer men being needed to produce a given amount of coal. In Monongalia County, for example, there was produced in 1930 a total of 7,099,887 tons of coal with average employment of 5,259 men, while in 1940 the production was 7,918,789 tons with employment of 3,972 men, or a reduction of 24.5 per cent in total employment. However, the workers who operate the machines must be more skilled, and hence command higher rates of pay.

If the present trend away from hand loading toward mechanical loading continues the major share of bituminous tonnage in West Virginia will probably be produced by machines at the end of the next decade. This is especially true of new mines which usually are equipped with the latest labor-saving devices. Many of the older mines are becoming "worked out" and must be replaced by new mines, all of which speeds up the transformation of our mining methods.

Great improvement has been made in the preparation of coal for the market. Most commercial mines have tipples equipped to furnish any size of coal desired, and at many mines the coal is washed free of dust, while slate and other impurities are removed at the picking table.

In some consuming centers, coal is now marketed in boxes convenient for the customer to carry home. More and more coal burning homes have furnaces equipped with automatic stokers, which operate with very little care and attention. Research and advertising have joined forces in an effort to retain and expand the markets for coal.

Technological improvements in coal utilization since 1918 have been responsible for an appreciable reduction in the demand for coal for industrial purposes. Although the effect is cumulative, the changes have been taking place at a much lower rate in recent years. Electric power plants consumed 7.05 pounds of coal per kilowatt hour in 1899, and are consuming only about 1.4 pounds of coal per kilowatt hour at the present time, and the coal industry has answered the challenge of competing fuel as well as the cry for conservation of our reserves.

Petroleum and Natural Gas

Great advances have been made in recent years in location, recovery, and utilization of West Virginia's petroleum and natural gas. The first oil wells were sunk where the presence of oil was evident on the surface. As these wells were exhausted, and the difficulty of finding oil increased, more refined methods of discovery were employed. After the industry had grown in its modern form for about 50 years, the application of the extreme refinements of the science of physics to the discovery of oil was begun. During the past 20 years, the development of methods has been most rapid, and the experiences in the Louisiana, Texas, and California fields have been the basis of West Virginia procedure, while the progressive companies operating here have also contributed their fair share of experimentation and research.

The problem of the prospector for petroleum is to locate layers of rocks under the surface of the earth which may contain oil. The geologist is often able to tell him whether the rocks in a locality may contain oil, but there are many occasions when he is unable from studies of the rocks on the surface to suggest with precision how they will lie at considerable depths.

Drilling is the most certain method of finding what sort of rocks exist at great depths, but it is expensive. Less expensive methods of probing the earth are

required. Nowadays, exploratory earthquake waves are made by exploding charges of dynamite about 50 feet below the surface of the ground. These waves proceed through the stratum until they reach a new stratum. If they are reflected at the surface of the new stratum they may be sent back to the earth's surface. The detection of the returning waves is made with electrical seismographs. These consist of wires suspended in a magnetic field. The returning waves make the wires tremble in the field. This produces a current in the wire, through electro-magnetic induction, which may be recorded by a galvanometer which throws a spot of light on a moving cinema film. By placing the seismographs at different distances from the charge, and by spacing the charges, the underlying strata may be mapped and the depth recorded to within 10 to 20 feet. Wells are then drilled only where the contour of the underlying strata indicates that a source of petroleum or natural gas exists.

The old type of percussion drilling in West Virginia has been largely replaced by rotary drilling, especially in the deeper wells drilled for gas in the Oriskany sand. The bit of the rotary drill is carried at the end of a strong pipe. The top end of the pipe is gripped by a large horizontal wheel or circular table at the bottom of the derrick, and the pipe is rotated by rotating the table. As the bit rotates on the surface at the bottom of the hole, it grinds and scraps the earth and rock to powder. This is washed out of the hole by water which is pumped down the inside of the piping which carries the bit. The water issues through an opening in the bit and comes up between the piping and the casing of the hole. Sometimes an artificial mud is used instead of water because it fills up the hole with a heavy column of fluid which prevents the escape of oil and gas, and also prevents the wall of the hole from caving in.

Great progress has been made in the efficiency of oil and gas production, especially by means of chemical treatment and repressuring. Hydrochloric and other acids are used to dissolve strata which contain limestone, and thus the space at the bottom of the well is enlarged and more oil obtained. In repressuring, gas is forced into the porous oilbearing sands, and the oil is forced out.

The industrial synthesis of alcohols and many other hydrocarbons from petroleum and natural gas is the basis for a whole new chemical process industry. Until 1923 virtually all methyl alcohol was prepared from wood alcohol, the raw spirit obtained by distilling wood in air tight iron stills. Methyl alcohol and a host of other compounds are easily made synthetically from petroleum or natural gas.

Storage of natural gas in liquid form under high pressures and low temperatures has been put on a commercial basis by a progressive West Virginia firm within recent months. Natural gas stored in this manner is available to meet peak consumption demands. For many years West Virginia produced and marketed commercially more natural gas than any other state in the Union. The peak of her gas production was reached in 1917 when the State produced 308,617,000,000 cubic feet. Production then steadily declined for several years and reached a low point of 100,540,000,000 cubic feet in 1932 partially due to the lack of demand but due also to diminished reserves. The output has gradually increased to an estimated 180,000,000,000 cubic feet in 1940 and the 1941 production will probably exceed 200 billion cubic feet. Geologists estimate that natural gas will be produced in West Virginia for at least 50 additional years.

The production of petroleum has been one of the leading industries of West Virginia for many years. Production is gradually decreasing and it is unlikely that any large new fields will be discovered unless it is by deeper drilling. In 1940 the production of high quality "Pennsylvania grade" crude petroleum was 3,444,000 barrels. This compares to 14,177,126 barrels in 1901. It is estimated that by the use of modern recovery methods the State will still produce petroleum 60 years hence.

Agriculture

The basic industry known as farming has changed very slowly, but there are some developments worthy of mention. The most obvious changes have been in the marketing of farm products. Local livestock auctions have succeeded in bringing buyers from far and near. Cooperative groups of farmers now sell their wool, potatoes, buckwheat, apples, and other farm products under a special band

or trademark. The State Department of Agriculture assists in the grading of products so that rigid standards are maintained.

The Upper Monongahela Valley Association has secured good results in marketing Randolph and Preston County potatoes, Preston County buckwheat, Upshur County strawberries, and other products under the "Upper 10" trademark. Standards of quality are maintained to insure a steady market for the region's products. As a result of this marketing program many farmers are receiving increased cash income.

More care is being taken in the conservation of the soil. Government payments for use of lime and fertilizer have aided in the trend toward conservation of the soil's fertility.

Soybean acreage in the State almost doubled during the past decade. In 1939 the harvested area for this crop amounted to 47,490 acres. During the same crop year, West Virginia farmers received \$467,069 from 6,460 acres of vegetables, exclusive of Irish and sweet potatoes, harvested for market. The most important vegetables based on dollar volume of sales were, in order; tomatoes, string beans, sweet corn, cabbage, green lima beans, cucumbers, and watermelons.

In 1940 the total cash farm income of West Virginia farmers was \$43,643,000, of which \$12,572,000 was derived from sale of crops; \$29,151,000 from the sale of livestock and livestock products; and \$1,920,000 from government payments.

Manufacturing

The value of the products of all West Virginia manufacturing plants in 1940 according to preliminary estimates was \$624,000,000, an increase of 16 per cent over the 1929 production of \$538,000,000. These values are given in dollars of constant purchasing power (1926 dollars) in order to indicate the change in output regardless of the change in price levels. On the same basis the 1940 factory output exceeded the 1919 production of \$340,000,000 by 83 per cent.

Because of price changes from year to year the physical output of the manufacturing industries cannot be satisfactorily compared by means of the value of products in terms of current dollars. The most trustworthy measure of the trend of manufacturing production would be provided by statistics of the actual physical quantities of the products finished within a year. While it might be possible to measure the output of steel mills in tons of ingots, castings, billets, slabs, tinplate bars, bars, rails, bolts, wire, nails, et cetera, it would be difficult to compare such production to the myriads of products of chemical plants, glass plants, textile mills, and the many other items which make up our diversified manufacturing industry. Because of the changes in methods of reporting commodities, the lack of qualitative comparability, and the fact that quantitative statistics are not available for all industries, it is necessary to resort to the change of value of production in current dollars to dollars of constant purchasing value by use of a wholesale price index.

The following table gives a vivid picture of the growth of manufacturing output in West Virginia as measured in dollars of constant purchasing power:

1919	\$340,000,000
1925	455,000,000
1929	538,000,000
1932	346,000,000
1936	560,000,000
1939	573,000,000
1940	624,000,000

While all manufacturing has had a steady growth perhaps the greatest changes have been made in the individual manufacturing processes. This is illustrated by a short sketch which outlines some of the changes that have taken place in the glass industry in West Virginia.

The Glass Industry

Glass making is one of the oldest of the industrial arts. It is a known fact that the Egyptians knew the art of blowing glass 4,000 years ago. It is evident that at the time of the destruction of Pompeii something was known

about the manufacture of plate glass, because the windows in the excavated homes were made of thick glass.

The first glass factory in the area that is now West Virginia was established at Wellsburg in 1813 by a company organized by Isaac Duvall. Factories were located at Wheeling in 1820 and 1821 for the manufacture of window glass and bottles. Year by year plants were started in other parts of the State, where materials and fuel were available. The most important raw materials, of course, are silica sand, limestone, coal, and natural gas. The silica used in the manufacture of the finest tableware and cut glass is extraordinarily pure quartz sand mined in the mountains of West Virginia.

In 1923 glass was manufactured in 17 of the 55 counties of West Virginia, and approximately 100 plants had an aggregate output valued at \$50,211,000. At that time West Virginia ranked second in the production of glass in the United States and maintains that position at the present time. After 1923, however, the number of individual plants decreased until less than half that number were in production in 1941. With the decrease in number of manufacturing units there has been no corresponding reduction in the value of glass produced, but the actual physical output of glass has been increased many times. The 1940 value of glass products in West Virginia was more than \$52,000,000. Reduction of the price of all glass products has tended to conceal the increased volume of physical production of glass. Such increased production at reduced prices was possible only by mass production methods and hence larger manufacturing units were established. Some of the largest and most modern glass plants in the World are now found in this State.

The \$3,000,000 fluorescent lamp plant recently completed at Fairmont will soon be augmented by a new plant for the manufacture of glass tubes to be used in the production of fluorescent lighting equipment. For the time being the glass tubes are being obtained from an outside source. The glass tubes to be made from silica sand obtained in this State will be coated on the inside with phosphor, a substance which reacts with the ultra-violet rays to make the soft glowing light so much in demand for industrial as well as domestic lighting.

Many technological changes have made increased production of glass possible and have resulted in lower prices for all types of glass articles. After the invention of the continuous melting tank in 1872 the introduction of machinery was made possible. It is impossible to mention all of the machines invented. The Owens automatic machine for the production of jars and bottles was one of the important aids to mass production and this invention is credited to a pioneer in West Virginia glass industry.

Until recently, window glass was made by blowing the glass into a long cylinder which after cooling was cut and the glass reheated and flattened into sheets. It was practically impossible to remove all of the curvature. This problem was solved by the invention of the glass making machine which makes a continuous sheet of glass from the molten glass by pressing it to the proper thickness between rollers. As the glass moves along it is continuously and gradually cooled.

Glass cutting has withstood mechanical inroads longer than any other phase of the glass making process. The highly skilled glass cutter is nevertheless now being replaced by machine cutting. At Charleston, machine cutting on large quantity orders is the established practice, and the prospect is that it will supercede hand cutting to a large degree because of the machine's greater accuracy.

Chemical Industry

The output of West Virginia's chemical industry was valued at \$85,000,000 in 1939 and in 1941 is operating at a rate which insures the production of goods worth considerably more than 100 million dollars. The value of the current year's coal production in the state will probably equal \$280,000,000. Chemical and chemical-process industries rank second only to the great steel industry in West Virginia at the present time and are expanding at a faster pace than any other type of manufacturing. It is natural that this should be true because of the abundance of coal, gas, oil, and brines which serve as basic raw materials.

Coal is the most important natural resource in West Virginia. Excellent by-product coking coals produced from many seams furnish an important raw material used in the manufacture of synthetic ammonia and methanol. From the coking process phenol, cresols, ammonia, oils, tar and many other products are obtained. Aliphatic organic chemicals are synthesized from simpler hydrocarbons obtained from natural gas. Important products are ethylene glycol, acetone, synthetic butanol, acetic anhydride, and a long list of related compounds and derivatives.

One of the most recent developments is the introduction of synthetic plastic materials as substitutes for a long list of products, Nylon hosiery appeared on the market in 1940 and met with enthusiastic approval by women everywhere. Now that war conditions have interrupted the flow of raw silk from Japan, Nylon will probably gain such a large share of the hosiery market that silk will be permanently displaced. The basic materials for Nylon are made in West Virginia from the raw materials of coal, air, and water.

"Liveglas," a vinylite plastic material made in West Virginia, also appeared first in 1940 in the form of men's suspenders, wallets, belts, heels for women's shoes and other products, and may appear as women's hosiery and compete with Nylon and rayon substitutes for silk.

Space will permit the listing of only a few of the important chemicals and allied products produced in West Virginia, such as ammonia, sulphuric acid, chlorine, caustic soda, acetone, methanol, ethanol, bromine, salt, barium compounds, carbon tetrachloride, lead oxide, rayon, and many other chemical compounds and derivatives.

While not so important as coal, gas and oil to the chemical industry the occurrence of deposits of entrapped salt brines of about 8 per cent concentration found lying at depths of 900 to 1200 feet throughout the southern part of the State are utilized as a source of salt, chlorine, caustic soda, bromine, and bromides.

Construction

In the field of residential construction in West Virginia, great progress has been made within a relatively short time. Many new materials are being used in modern residences. Laminated plywood panels are taking the place of plaster, glass bricks provide light and afford ample protection, while rock wool and other types of insulation, and many other innovations, are rapidly becoming the accepted thing in home construction. Introduction of air conditioning has been an outstanding feature of both commercial and residential building. Air conditioning is fast becoming a "must" for the State's best stores and shops.

Industrial construction in West Virginia has been featured by the reconditioning and great expansion by the Federal Government of the South Charleston Naval Ordnance plant at a cost of 50 million dollars and by the construction of the Morgantown Ordnance plant by the duPont Company at a cost of more than 30 million dollars. In the field of private industry, there has been great expansion such as the increased capacity of the Weirton Steel Company at Weirton, the Union Carbide Chemical plants at South Charleston and Clarksburg, the plant of the duPont Company at Belle, the new lamp plant of the Westinghouse Electric Company at Fairmont, the International Nickel Company's plant at Huntington, as well as many other less extensive plant expansions which are too numerous to be listed here.

Transportation

From 1910 until 1941, more than \$600,000,000 has been expended on roads in West Virginia, and as a result we have more than 34,000 miles of highways, of which about 13,000 miles have been surfaced.

There was a total of 302,558 motor vehicles registered in West Virginia in 1940, composed of 250,294 passenger automobiles (including taxicabs); 744 buses; and 51,520 trucks and tractor-trucks. There was a total of 221,005,000 gallons of gasoline consumed in 1940, of which 6,022,000 gallons was tax-free consumption on farms and by airplanes. The State realized \$10,981,000 in gasoline taxes to be utilized in the construction and upkeep of the highways and debt service on outstanding debt.

Nearly every West Virginia city is constructing an airport or has already built one, and the emphasis of war on aviation has spurred defense-minded officials to redouble their efforts in the interest of better flying fields. Most of the larger cities now have regular passenger and air mail service. Air mail pickup service now brings speedy mail service to a score of West Virginia cities.

The foregoing narrative has mentioned only a few of the many important and interesting industrial changes which have taken place in West Virginia during the past quarter of a century. Many industries not mentioned have made spectacular progress and have been omitted only because of the limited available space.

COAL MINE SAFETY

By N. P. RHINEHART
Chief, Department of Mines

Mining has long been classed among the most hazardous of occupations and considerable effort has been directed towards making it safer. Almost as soon as the industry began to attain its importance, legislation was enacted for the protection of the employees and the preservation of mine property. Such legislation was first enacted in West Virginia in 1883 and is under the administration of the Department of Mines.

Accidents in the mines have been so commonplace that public opinion is seldom aroused except when a spectacular mine explosion adds another catastrophe to the many which have occurred in the industry. Then, and then only, is public opinion aroused and a demand is made that mines must be made safer.

The generally accepted public ideas of coal mine safety are centered about mine explosions and how to prevent them. The daily toll of accidents from other causes, although much more disastrous in their accumulative effects, are almost unnoticed. And yet, if coal mine safety is to be attained, the greater portion of the efforts of the inspection bodies must be directed towards the reduction of these latter types of accidents. Since state inspection of mines was started in 1883, mine explosions have caused less than 14 per cent of the total fatalities and over 55 per cent of this 14 per cent occurred during a ten year period, 1906-1915, inclusive. Mine explosions occurred in the mines in this State during that period, at the rate of about 12 each year, and as but little rock dust was used some of them were wide-spread and extremely destructive.

For a period of several years after that disastrous decade, mine explosions were materially reduced and their destructive effects were even more greatly reduced. During the period 1923-1932, inclusive, however, mine explosions again became more frequent, averaging about six a year and accounted for another 25 per cent of the total fatalities from this cause. Since 1932 and through 1940, mine explosions occurred at the rate of $3\frac{1}{2}$ per year and in most instances were confined to small local areas because of the use of rock dust.

In the past, the most common causes of coal mine explosions were: open lights and nonpermissible explosives. In recent years open lights have been largely replaced by permissible electric cap lamps and permissible explosives have almost entirely taken the place of nonpermissible explosives, and explosions from these sources now are very rare. However, the increasing use of electricity has introduced another source of ignition, which, if not properly controlled, is equally if not more dangerous than those eliminated.

For many years the generally accepted method of detecting gas was by means of the lighted flame safety lamp. As less than one per cent of gas could not readily be detected by this means, many mines were thought to be nongassy until an explosion proved them to be gassy. In recent years, methane detectors have been perfected which can detect the presence of even small amounts of gas and which can be used in places not accessible to the flame safety lamp. The presence of gas shows that gas is being liberated and many mines, which only a few years ago were thought to be nongassy, are now classified as gassy and are required to be examined periodically for gas.

The present requirements of the Department of Mines for a more thorough examination for gas, more adequate ventilation, proper rock dusting, allaying dust by sprinkling and the proper maintenance of electrical equipment should have a tendency not only to reduce the number of explosions but also to keep their effects confined to limited areas except in such cases where carelessness is still predominating practice.

In general, coal mine accidents should be divided into two main groups: those from explosions and those from the regularly recurring type of accidents which have caused over 86 per cent of all coal mine fatalities. In this latter group, 60 per cent are caused by falls of roof and coal, 24 per cent by haulage, 5 per cent by electricity, $3\frac{1}{2}$ per cent by explosives, and the remaining $7\frac{1}{2}$ per cent by the other hazards connected with coal mining.

When we consider that one or more of these hazards are present in every part of the mine, we can readily realize the magnitude of the problem of mine safety. Some of the existing hazards may not be recognized as such until too late, but in the great majority of instances they can be detected by systematic inspection and the danger can be eliminated.

The primary approach to mine safety is frequent and systematic inspections. Every condition of roof, timbering, gas, dust, ventilation, track, clearance, machinery, electrical appliances, and maintenance must be appraised separately for the potential hazard. The practices used for discipline, inspections, haulage, blasting, and maintenance must be investigated. Each separate dangerous condition and practice must be corrected before mines will be reasonably free of accidents.

By far, the greatest hazard and the one most difficult to remove is the habit of carelessness. Even this can be overcome, however, by a more rigid discipline and by requiring a more thorough observation of the fundamentals of safety.

The methods of removing the dangers that cause mine accidents are known. It only remains to practice these methods within the mines to make a decrease in mine accidents. Safety practices must be systematized and made a part of the daily routine in each mine. The dangers are so diversified and so wide-spread that it is not possible to establish the habit of safety by any quick or easy method. Recent legislation has provided for more frequent inspections but further legislation is required to clarify controversial questions of authority and practice. A substantial start has already been made to make mine inspections in a more uniform manner and in accordance with established mining practice, and judging from the results so far it appears certain that the tendency is steadily towards a degree of safety that once was thought to be impossible.

The following table shows the trend of the regularly recurring types of coal mine accidents based on the tons of coal produced per fatality, since 1883.

TAXATION AND FINANCE

THE FINANCIAL POSITION OF THE STATE

By CLEVELAND M. BAILEY
Acting Director of the Budget

When the voters of West Virginia, in 1932, approved a constitutional limitation on tax levies they forced a revision of the State's basic tax structure. Prior to 1932 the State's largest source of operating revenue came from a direct property levy which netted more than \$2,000,000.

When the limited levies were allocated by legislative action it was found that neither State, county nor municipal units could raise sufficient funds to defray the ordinary functions of government. School, road, and other major needs were of such urgency that the State, acting through its duly elected legislators, was forced to construct an entirely new tax basis.

Indirect taxes, in the form of imposts on business, levies on personal incomes and inheritances, net earnings on liquor sales, and a modified consumers sales tax, produce an ever-flowing source of revenue far in excess of the direct tax once collected from the then over-burdened owner of real estate and other tangible and intangible properties.

Comparative Figures

The picture presented prior to 1932, interpreted in tax dollars on a state-wide basis, follows:

Direct State Levy (10¢).....	\$ 1,930,921.67
Indirect State Taxes (including limited gross sales).....	7,653,108.25
County, school, road, and municipal direct property levies	50,657,489.00
	<hr/>
Total state tax load in 1931.....	\$60,241,518.92

The decade just past has seen some notable changes as is evidenced by the figures for 1940, which follow:

Direct State levy (1¢).....	\$ 169,159.31
Indirect taxes (including gross, consumers, income, liquor, and inheritance taxes).....	33,326,500.79
County, school, and municipal direct property levies ...	28,206,139.00
	<hr/>
Total state tax load in 1940	\$61,701,799.10

The above compilations do not include gasoline tax or auto license fees which are payable into the State Road Fund. Nor does it include capitation tax payable into the General School Fund and State Road Fund.

No picture of the State fiscal structure will be complete without a brief outline of how these tax moneys were disbursed. State expenditures for 1931 were:

State Grants (aid to schools).....	\$ 800,000.00
State governmental costs	10,491,297.86
	<hr/>
Total State Expenditures	\$11,291,297.86

The discrepancy in expenditures for 1931 over receipts is explained by the State borrowing in anticipation of future revenue. A net amount of \$955,000 was secured in this way during the year.

The 1940 picture shows the state having assumed full responsibility for all highway costs, the major part of all direct relief and public assistance and better than one-half of the tax burden to support the schools, as follows:

State Grants (other units):	
Schools	\$13,300,000.00
Relief	3,150,000.00
Public Assistance	3,100,000.00
Secondary Roads	1,900,000.00
Reemployment	45,000.00
Teachers Retirement	50,000.00
Free Textbooks	150,000.00
Governmental Costs:	
Operations	8,797,822.62
Building Program (Surplus Revenue)	1,337,500.00
Debts—Service Refunding Bonds	385,938.00
<hr/>	
Total Expenditures, 1940.....	\$32,216,260.62

The State's Financial Position

The State can well be proud of its excellent financial standing. It is one of three states in the Nation that did not permit a default in its bonded indebtedness during the depression. Its state road bonds sold recently at an interest rate of 1.28 per cent, the lowest in the State's history.

This situation is all the more pleasing since the State had, at the close of the fiscal year 1940-1941, cash balances in its operating fund in excess of \$6,000,000, and an over-all cash balance in all its funds of better than \$27,000,000.

The State has not operated "in the red" since September 1935 when the last of some \$6,000,000 in deficits were written off the books. The State can now pay its obligations promptly, take its discounts, and render added services to its citizens that were not possible in depression days.

Only within the last two years has the State had a surplus of revenues. These surpluses have been wisely used by the Board of Public Works by launching a much needed building program at State schools and institutions that will total more than \$5,000,000. This policy, so strongly advocated by our present Governor, will provide added hospitalization for hundreds of insane and tubercular patients now denied such service because of lack of adequate facilities.

WEST VIRGINIA ANSWERS THE CALL

When the President of the United States called for an adequate Army and Navy, and a nation prepared for any eventuality of these critical times, West Virginia answered in a strong voice.

Industry responded with a hum of machinery. The Great Kanawha Valley, chemical center of the world, entered upon a period of greater productive activity than it ever before knew. Coal mines responded to the demand for fuel. Electric power supplies were made more adequate. Glass, steel and aluminum rolled from West Virginia's factories in increasing volume. New industry, war-time and peace-time, moved in, lured by West Virginia's natural resources, facilities and the protection this part of interior America, with its mountain ranges, afforded against coastal sections now conscious of the growing menace of foreign air power.

But none answered more strongly nor more willingly than Youth.

In less than a year, from the date of the first call for registrants between the ages of 21 and 35, to July 15, 1941, a total of 250,925 men registered, and by July 15, 1941, a total of 8,847 of that number had been inducted through the Selective Service System and sent to training camps. A great many of them didn't wait for the draft; they enlisted before they were called.

The West Virginia National Guard, called to colors ahead of all others, gave its members opportunity to resign, but in December and January the 150th Infantry moved into Camp Shelby, Miss., with practically its entire peace-time personnel and the 201st Infantry counted very few noses missing as it settled down to serious training at Fort Benjamin Harrison, Ind., and later shipped to Alaska. Together, their personnel totalled 2,707 men.

Other agencies of the armed services found equally hearty response. In a year's period, 6,387 men enlisted for the regular three-year term in the Regular Army; approximately 2,500 from West Virginia chose the Navy; and even the U. S. Marine Corps, much more limited in size than the Army and Navy, drew 600 recruits from West Virginia, to serve four-year terms in that service.

By the middle of July, 1941, a total of 590 Reserve Officers had been called into service for extended duty, with more to come.

During the period of the World War, the total number of Americans registered was 323,383, of whom 45,648 entered active service. On August 1, 1941, there were approximately 22,000 West Virginians in actual service, despite the fact that married men and all over 28 were being deferred by Selective Service.

Executive, Legislative Action

The Executive and Legislative branches answered the call, too. A "State Council of Defense" was authorized by an act of the Legislature and the Governor immediately named a group of prominent citizens to that council. Purpose of the council is to assist in the coordination of state and local activities related to national and state defense. The act also provides for the creation of local defense councils.

The Legislature also passed an act securing the office or position of any person employed by the State who might enter the military, naval, marine or coast guard service.

An Act was passed authorizing the Governor to create a "West Virginia State Guard" for service within the State during periods when the West Virginia National Guard is on active federal service.

150th Organized in 1777

The National Guard entered into the Army expansion program with definite assets. Both the 150th and 201st boasted praiseworthy records of peace-time achievement as well-trained military units. And both claim long and colorful histories.

Date of the formation of the 150th goes back to 1777 when it was organized as a part of the Greenbrier (Va.) County Militia and furnished personnel for units which served in the Continental Army during the Revolutionary War. It was redesignated the 79th Regiment in 1792. That same year the Kanawha County Militia was designated the 80th Regiment. Subsequently, subdivisions of the Greenbrier County Militia were made and, by 1812, Mason County had become the 106th Regiment and Cabell County the 120th Regiment.

Units from the 79th, 80th, 106th and 120th Regiments, Virginia State Militia, served as a part of the land forces of the United States during the War of 1812. Cabell County, represented by the 120th, recruited a company which served with the 11th U. S. Infantry in the War with Mexico. Greenbrier, Kanawha, Mason and Cabell furnished troops for both the Federal and Confederate forces during the Civil War.

After West Virginia's admission as a separate State, all militia organizations were redesignated as West Virginia Militia. The State's forces were reorganized into two regiments in 1878 and designated as the First Regiment of Infantry (now the 201st) and the Second Regiment of Infantry (now the 150th). In May, 1898, the First and Second Regiments were consolidated and redesignated as the First West Virginia Volunteer Infantry, for service in the Spanish-American War. This regiment was mustered into the federal service in May, 1898, but did not serve outside the continent. Mustered out February 4, 1899, the status of First and Second Infantries, West Virginia National Guard, was reassumed.

The Second Infantry was mustered into the Federal Service on July 17, 1916, for Mexican border service and was stationed at Fort Sam Houston, Texas, until mustered out in March, 1917. On September 19, 1917, the Second Infantry was designated as the 150th Infantry of the 38th Division and served in France during the World War. The regiment was reorganized and federally recognized as the 150th Infantry, West Virginia National Guard on July 13, 1922.

201st Second Oldest in Nation

Birth of the 201st goes back even farther. Historians list that organization as the second oldest military organization in the United States. From 1735 to 1775 it was a part of the British Colonial Militia in Virginia. From 1775 until 1792 the various units served as American Continental troops; from 1792 until 1861 their regimental designation was the 67th Virginia Regiment, but during the Civil War the regiment's units separated between the Union and Confederate forces.

From 1865 until 1878 the regiment was continued as the 67th, but from the latter year until 1898 it was designated the First West Virginia Infantry. Consolidated with the Second West Virginia Infantry at the time of the Spanish-American War, it also failed to see service beyond continental borders. After the war it again became the First West Virginia Infantry.

After its World War mobilization the regiment was broken up into units and assigned to various branches of the service and bore numerous designations. Some units were transferred to the 113th Engineers, others to transport battalions and the remainder were held as replacements for the 150th Infantry, the other West Virginia National Guard regiment.

From 1923 to 1926 it was the First West Virginia Infantry, but in that year it was again federalized and became the 201st Infantry, West Virginia National Guard.

OFFICIAL MUNICIPAL REGISTER

(Corrected to August 1, 1941)

CLASS I, II AND III CITIES

Under the provisions of Chapter 56, Acts of the Legislature, regular session, 1939, municipal corporations are classified by population as follows: (1) Population in excess of 50,000, Class I city; population more than 10,000 and not more than 50,000, Class II city; and population more than 2,000 and not more than 10,000, Class III city. Municipal corporations not included in these classifications are known as towns or villages.

Transition from one to another class of municipal corporation occurs automatically when the requisite population qualification has been met. Population is determined on the basis of the last preceding census taken under the authority of the Congress of the United States or the Legislature of West Virginia. Census of 1940 is used as basis in determining class of cities listed in Register.
