28 under the provisions of this article may be used for
29 compilation of educational, scholarly or statistical pur-

ARTICLE 10. METHAMPHETAMINE LABORATORY ERADICATION ACT.

§60A-10-1. Short title.

1 The provisions of this article shall be known and re-
2 ferred to as the Methamphetamine Laboratory Eradication
3 Act.

§60A-10-2. Purpose; findings.

1 The Legislature finds:

2 (a) That the illegal production and distribution of
3 methamphetamine is an increasing problem nationwide
4 and particularly prevalent in rural states such as West
5 Virginia.

6 (b) That methamphetamine is a highly addictive drug
7 that can be manufactured in small and portable laborato-
8 ries. These laboratories are operated by individuals who
9 manufacture the drug in a clandestine and unsafe manner,
10 often resulting in explosions and fires that can injure not
11 only the individuals involved, but their families, neigh-
12 bors, law-enforcement officers and firemen.

13 (c) That use of methamphetamine can result in fatal
14 kidney and lung disorders, brain damage, liver damage,
15 blood clots, chronic depression, hallucinations, violent and
16 aggressive behavior, malnutrition, disturbed personality
17 development, deficient immune system and psychosis.
18 Children born to mothers who are abusers of methamphet-
19 amine can be born addicted and suffer birth defects, low
20 birth weight, tremors, excessive crying, attention deficit
21 disorder and behavior disorders.

22 (d) That in addition to the physical consequences to an
23 individual who uses methamphetamine, usage of the drug
24 also produces an increase in automobile accidents, explo-
25 sions and fires, increased criminal activity, increased
26 medical costs due to emergency room visits, increases in
27 domestic violence, increased spread of infectious diseases
28 and a loss in worker productivity.

29 (e) That environmental damage is another consequence
30 of the methamphetamine epidemic. Each pound of
31 methamphetamine produced leaves behind five to six
32 pounds of toxic waste. Chemicals and byproducts that
33 result from the manufacture of methamphetamine are
34 often poured into plumbing systems, storm drains or

35 directly onto the ground. Clean up of methamphetamine
36 laboratories is extremely resource-intensive, with an
37 average remediation cost of five thousand dollars.

38 (f) That it is in the best interest of every West Virginian
39 to develop a viable solution to address the growing
40 methamphetamine problem in the State of West Virginia.
41 The Legislature finds that restricting access to over-the-
42 counter drugs used to facilitate production of metham-
43 phetamine is necessary to protect the public safety of all
44 West Virginians.

45 (g) That it is further in the best interests of every West
46 Virginian to create impediments to the manufacture of
47 methamphetamine by requiring persons purchasing
48 chemicals necessary to the process to provide identifica-
49 tion.
