Occupational Pneumoconiosis Board

Overview

The Occupational Pneumoconiosis Board schedules examinations for all persons filing occupational pneumoconiosis claims with the Insurance Commission. The Board makes impairment determinations based on available claim related medical evidence.

The Board obtains a complete medical history of the claimant, including any treatment for heart and lung disorders and other conditions that restrict the persons' activity. The medical history includes current and past tobacco use and to what extent. Clinical members of the Board conduct a physical examination of the claimant, giving special attention to heart and lungs, as well as any disabling injuries. Under close supervision, claimants able to exercise safely, perform a simple, standardized exercise test.

Chest X-rays are made under the supervision of the radiologist members of the Board, following film quality and technical standards established by the *Federal Coal Mine Health and Safety Act of 1969* to detect even minute changes possibly due to pneumoconiosis.

Board members are thoroughly familiar with identifiable diagnostic changes shown by X-rays of the claimant for evidence of changes occurring over time.

The Occupational Lung Center at Charleston Area Medical Center performs pulmonary diagnostic testing for the Board and reports on loss of lung function and to the extent to which lost lung function impairs the claimant's ability to work.

The 2017 / 2018 Occupational Pneumoconiosis Board Annual Report

Activity	July 1, 2016 to June 30, 2017	July 1, 2017 to June 30, 2018
Total Number of Claimants Examined	882	778
First Time Claimants	473 (54%)	415 (53%)
First Time Claimants Receiving No Diagnosis	241 (51%)	211 (51%)
First Time Claimants Receiving Initial Award	232 (49%)	204 (49%)
Total Number of Cancels / No Shows	154	156
First Time Claimants Receiving OP/O (no award)	52	46
Repeat Claimants Receiving OP/O (first time-no award)	16	14
Total Claimants Receiving OP/O	68	60
Claimants Receiving Repeat Examination	409 (46%)	363 (47%)
Repeat Exam of Claimants Receiving No Additional Award	230 (56%)	219 (60%)
Repeat Exam of Claimants Receiving Additional Award	179 (44%)	144 (40%)
Total Number of Fatal Claims Reviewed	46	50
Fatal Claims Due to Occupational Pneumoconiosis	14 (30%)	15 (30%)
Fatal Claims Not Due to Occupational Pneumoconiosis	32 (70%)	35 (70%)
Out of Town Reviews Examined	1	4
Out of Town Reviews Receiving No Diagnosis	1	4
Out of Town Reviews Receiving an Award	0	0

Physicians at the Occupational Lung Center in Charleston, West Virginia examined **778** occupational pneumoconiosis claimants during the reporting period. There were an additional **50** fatal claims and **4** out of town reviews.

The Insurance Commissioner was updated on the status of Progressive Massive Fibrosis cases for this year. There were **20** new cases of PMF seen during the report period.
