A BILL to amend the Code of West Virginia, 1931, as amended, by adding thereto a new section, designated §36-4-19, relating to making covenants and other restrictions that restrict the installation or use of solar energy systems unenforceable; defines terms; and provides exceptions thereto.

Be it enacted by the Legislature of West Virginia:

That the Code of West Virginia, 1931, as amended, be amended by adding thereto a new section, designated §36-4-19, to read as follows:

ARTICLE 4. COVENANTS.

§36-4-19. Solar energy covenants unenforceable; penalty.

(a) It is the policy of the state to promote and encourage the residential and commercial use of solar energy systems and to remove obstacles thereto to promote energy efficiency and pollution reduction. Therefore, upon the effective date of this section any
covenant, restriction, or condition contained in any deed, contract, security instrument, or other instrument affecting the transfer or sale of, or any interest in, real property, and any provision of a governing document of a housing development or association that effectively prohibits or restricts the installation or use of a solar energy system is void and unenforceable: Provided, That in instances involving a housing development or association, an association may, by vote of its members, establish or remove a restriction that prohibits or restricts the installation or use of a solar energy system.

(b) For the purposes of this section:

(1) “Solar energy system” means a system affixed to a building or buildings that uses solar devices, which are thermally isolated from living space or any other area where the energy is used, to provide for the collection, storage, or distribution of solar energy; and

(2) “reasonable restriction” means those restrictions that do not effectually result in a prohibition of their use by eliminating the system’s energy conservation benefits or economic practicality.

(c) This section does not apply to provisions that impose reasonable restrictions on solar energy systems including restrictions for historical preservation, architectural significance, religious or cultural importance to a given community. Nothing in this section precludes the regulation of
solar energy systems by state and local authorities which may establish land use, health and safety standards. Nothing in this section precludes home associations, condominiums or unit properties from restricting or limiting the installation of solar energy systems installed in common areas and common structures.
