ARTICLE 3C. COMMUNITY AND TECHNICAL COLLEGE SYSTEM.
§18B-3C-8. Legislative findings and intent; statewide network of independently accredited community and technical colleges; operations and administration.

(a) Legislative findings. --

(1) The Legislature has enacted legislation, beginning with Enrolled Senate Bill No. 653, passed during the two thousand regular session, and continuing with Enrolled Senate Bill No. 703, passed during the two thousand one regular session, Enrolled House Bill No. 2224, passed during the two thousand three regular session, and Enrolled Senate Bill No. 448, passed during the two thousand four regular session, the purpose of which is to strengthen the state's community and technical colleges, clarify their core mission and establish essential conditions to be met, and ensure the most effective delivery of services to business, industry, and West Virginia citizens in every region of the state.

(2) The primary goal of the Legislature is to create a statewide network of independently accredited community and technical colleges that focuses on technical education, work force training, and lifelong learning for the Twenty-first Century ensure the most effective delivery of services to business, industry, and West Virginia citizens in every region of the state, consistent with the goals, objectives, priorities and essential conditions established in articles one, one d and three c of this chapter §§18B-1-1 et seq., 18B-1D-1, et seq., and 18B-3C-1 et seq. of this code.

(3) A necessary precedent to accomplishing the legislative goal is to change the way that leaders at all levels of education, including institutional governing boards, view community and technical colleges. Specifically, that the mission of community and technical colleges is different from that of traditional four-year colleges in what they seek to accomplish and how they can achieve it effectively and that the state cannot compete successfully in today's information-driven, technology-based economy if community and technical colleges continue to be viewed as add-ons or afterthoughts attached to the baccalaureate institutions.

(b) Legislative intent. --
Therefore, it is the intent of the Legislature that the statewide network of independently-accredited community and technical colleges as a whole and each independent community and technical college individually provide the following types of services as part of the core institutional mission:

(A) Career and technical education certificate, associate of applied science, and selected associate of science degree programs for students seeking immediate employment, individual entrepreneurship skills, occupational development, skill enhancement and career mobility;

(B) Transfer education associate of arts and associate of science degree programs for students whose educational goal is to transfer into a baccalaureate degree program with particular emphasis on reaching beyond traditional college-age students to unserved or underserved adult populations;

(C) Developmental/remedial education courses, tutorials, skills development labs, and other services for students who need to improve their skills in mathematics, English, reading, study skills, computers and other basic skill areas;

(D) Work force development education contracted with business and industry to train or retrain employees;

(E) Continuing development assistance and education credit and noncredit courses for professional and self-development, certification and licensure, and literacy training; and

(F) Community service workshops, lectures, seminars, clinics, concerts, theatrical performances, and other noncredit activities to meet the cultural, civic, and personal interests and needs of the community the institution serves.

It is further the intent of the Legislature that each community and technical college focus special attention on programmatic delivery of their core mission services to unserved and underserved populations to achieve established state objectives. These include the following as highest priorities:

(A) Increasing the number of adults age twenty-five and above who participate in
postsecondary education;

(B) Developing technical programs that meet the documented occupational needs of West Virginia's employers;

(C) Providing workforce development programs by implementing the Adult Career Pathways Model, which provides opportunities for the following:

(i) Adults to earn certifications through the completion of skill-sets;

(ii) Ordered progression from skill-sets and certifications to one-year certificate programs and progression from one-year certificate degrees to Associate of Applied Science Degree programs, and

(iii) Students to exit at any stage of completion in order to enter employment with the option of continuing the pathway progression at a later time and/or on a part-time basis.

(D) Offering programs in various time frames other than the traditional semester delivery model and at different locations, including work sites, convenient to working adults;

(E) Providing technical programs in modules or "chunks," defined in competencies required for employment and tied to certification and licensing requirements.

(F) Entering into collaborative programs that recognize high-quality training programs provided through labor unions, registered apprenticeships, and industry-sponsored training programs with the goal of enabling more adults to earn a college credential;

(G) Developing innovative approaches to improve the basic and functional literacy rates of West Virginians in all regions of the state;

(H) Developing "bridge programs" for disadvantaged youth and adults to enable them to acquire the skills necessary to be successful in education and training programs that lead to high-skills, high-wage jobs; and

(I) Providing access to postsecondary education through the delivery of developmental education for those individuals academically under-prepared for college-level work.

(c) In fulfillment of the purposes and intent defined in subsections (a) and (b) of this
section, there is continued a statewide network of independently accredited community and technical colleges serving every region of the state. Each free-standing and independent community and technical college is strongly encouraged to serve as a higher education center for its region by brokering with other colleges, universities and providers, in-state and out-of-state, both public and private, to afford the most coordinated access to needed programs and services by students, employers and other clients, to achieve the goals, objectives, and essential conditions established in articles one, one-d, and three-c of this chapter §18B-1-1 et seq., §18B-1D-1 et seq., and §18B-3C-1 et seq. of this code, and to ensure the most efficient use of scarce resources.
