§15-2B-2. Policy.			

(a) It is the policy of this state to assist federal, state, and local criminal justice and law-enforcement agencies in the identification, detection, and exclusion of ~~individuals~~ persons who are subjects of the investigation or prosecution of violent crimes, sex-related crimes, and other crimes against the person. DNA records are an important identification tool that can be used to confirm and verify information provided by fingerprints, and to identify additional information on potential criminal activity not available through other means. DNA technology further aids the criminal justice system inasmuch as it may assist persons mistakenly accused of crimes and exonerate persons wrongfully convicted of crimes. In furtherance of ~~such~~ that assistance, the Legislature finds:

(1) That the analysis of DNA contained in biological evidence that may be recovered from a crime scene facilitates such the identification, detection, and exclusion;

(2) That the comparison of DNA data recovered from a crime scene with existing DNA records maintained in a central DNA database further facilitates ~~such~~ the identification, detection, and exclusion; and

(3) That requiring ~~individuals~~ persons who have been indicted by a grand jury for certain offenses, who have filed a waiver of indictment for certain offenses, and persons who have been convicted of a felony offense or other certain offenses to submit to ~~convicted of certain crimes to provide a sample for~~ DNA analysis with the resulting eligible DNA records maintained in a central DNA database will ~~likewise~~ further facilitate the ~~aforementioned~~ identification, detection, and exclusion and may serve to discourage recidivism.
