

# **WEST VIRGINIA LEGISLATURE**

## **2026 REGULAR SESSION**

**Introduced**

### **Senate Bill 51**

By Senator Rucker

[Introduced January 14, 2026; referred

to the Committee on Education]

1 A BILL to amend and reenact §18-2-9 of the Code of West Virginia, 1931, as amended; and to  
2 amend the code by adding a new section, designated §18-2-47, relating to the State Board  
3 of Education and required courses of education; providing that a course on human growth  
4 and development related to pregnancy and human development inside the womb be  
5 mandatory from grade three; clarifying methods of instruction; providing that this  
6 curriculum be known as the Baby Olivia Act; creating rule-making authority; authorizing the  
7 Attorney General to enforce the Baby Olivia Act; and creating civil penalties.

*Be it enacted by the Legislature of West Virginia:*

**ARTICLE 2. STATE BOARD OF EDUCATION.**

**§18-2-9. Required courses of instruction.**

1 (a) (1) In all public, private, parochial, and denominational schools located within this state  
2 there shall be given prior to the completion of the eighth grade at least one year of instruction in the  
3 history of the State of West Virginia. The schools shall require regular courses of instruction by the  
4 completion of the 12th grade in the history of the United States, in civics, in the Constitution of the  
5 United States, and in the government of the State of West Virginia for the purpose of teaching,  
6 fostering, and perpetuating the ideals, principles, and spirit of political and economic democracy in  
7 America, and increasing the knowledge of the organization and machinery of the government of  
8 the United States and of the State of West Virginia. The required courses shall include instruction  
9 on the institutions and structure of American government, such as the separation of powers, the  
10 Electoral College, and federalism. The required courses shall include instruction that provides  
11 students an understanding of American political philosophy and history, utilizing writings from  
12 prominent figures in Western civilization, such as Aristotle, Thomas Hobbes, John Locke, and  
13 Thomas Jefferson. The courses of instruction shall offer an objective and critical analysis of  
14 ideologies throughout history including, but not limited to, capitalism, republicanism, democracy,  
15 socialism, communism, and fascism. The required courses shall emphasize the use of primary  
16 sources and interactive learning techniques, such as mock scenarios, debates, and open and

17 impartial discussions.

18 (2) The state board shall, with the advice of the state superintendent, and after consultation  
19 with other entities, prescribe the courses of study, including the basic course requirements for  
20 middle school and high school, and the academic standards listed in subdivision (1) of this  
21 subsection for these courses of study covering these subjects for the public schools, and publish  
22 an approved list of instructional resources pursuant to §18-2A-1 *et seq.* of this code. The  
23 curriculum used in the delivery of instruction shall cover the standards adopted for such courses.  
24 The other entities for consultation may include such organizations as the Florida Joint Center for  
25 Citizenship, the College Board, the Bill of Rights Institute, Hillsdale College, the Gilder Lehrman  
26 Institute of American History, the Constitutional Sources Project, educators, school administrators,  
27 postsecondary education representatives, elected officials, business and industry leaders,  
28 parents, and the public. Officials or boards having authority over the respective private, parochial,  
29 and denominational schools shall prescribe courses of study for the schools under their control  
30 and supervision similar to those required for the public schools.

31 (3) The state board shall provide testing or assessment instruments for the history and  
32 civics courses of instruction required by this section. These testing instruments shall:

33 (A) Be aligned with the academic standards required by this section;  
34 (B) Be mandatory for students enrolled in those courses of instruction;  
35 (C) Be cumulative by including questions about knowledge learned in prior history and  
36 civics courses; and  
37 (D) Measure students' factual and conceptual knowledge including how the facts  
38 interrelate and the reasons behind historical documents and events.

39 (4) To further this study, every high school student eligible by age for voter registration shall  
40 be afforded the opportunity to register to vote pursuant to §3-2-22 of this code.

41 (b) The state board shall cause to be taught in all public schools of this state the subject of  
42 health education, including instruction in any of the grades six through 12 as considered

43 appropriate by the county board, on: (1) The prevention, transmission, and spread of acquired  
44 immune deficiency syndrome and other sexually transmitted diseases; (2) substance abuse,  
45 including the nature of alcoholic drinks and narcotics, tobacco products, and other potentially  
46 harmful drugs, with special instruction as to their effect upon the human system and upon society  
47 in general; (3) the importance of healthy eating and physical activity in maintaining healthy weight;  
48 and (4) education concerning cardiopulmonary resuscitation and first aid, including instruction in  
49 the care for conscious choking, and recognition of symptoms of drug or alcohol overdose. The  
50 course curriculum requirements and materials for the instruction shall be adopted by the state  
51 board by rule in consultation with the Department of Health and Human Resources. The state  
52 board shall prescribe a standardized health education assessment to be administered within  
53 health education classes to measure student health knowledge and program effectiveness; and  
54 (5) Education concerning human growth and development by means of an oral, written, or digital  
55 lesson, lecture, or presentation about human biology related to pregnancy and human  
56 development inside the womb. Human growth and development instruction shall commence in  
57 grade three. Beginning the 2026-2027 school year, the course curriculum materials, as adopted by  
58 the state board by legislative rule, shall include:

59       (A) A high-definition ultrasound video, at least three minutes in duration, showing the  
60 development of the brain, heart, sex organs, and other vital organs in early fetal development; and  
61       (B) The *Meet Baby Olivia* video developed by Live Action, showing the process of  
62 fertilization and every stage of human development inside the uterus, noting significant markers in  
63 cell growth and organ development for every significant marker of pregnancy until birth.

64       (c) An opportunity shall be afforded to the parent or guardian of a child subject to instruction  
65 in the prevention, transmission, and spread of acquired immune deficiency syndrome and other  
66 sexually transmitted diseases to examine the course curriculum requirements and materials to be  
67 used in the instruction. The parent or guardian may exempt the child from participation in the  
68 instruction by giving notice to that effect in writing to the school principal.

(d) After July 1, 2015, the required instruction in cardiopulmonary resuscitation in subsection (b) of this section shall include at least 30 minutes of instruction for each student prior to graduation on the proper administration of cardiopulmonary resuscitation (CPR) and the psychomotor skills necessary to perform cardiopulmonary resuscitation. The term "psychomotor skills" means the use of hands-on practicing to support cognitive learning. Cognitive-only training does not qualify as "psychomotor skills". The CPR instruction shall be based on an instructional program established by the American Heart Association or the American Red Cross, or another program which is nationally recognized and uses the most current national evidence-based emergency cardiovascular care guidelines and incorporates psychomotor skills development into the instruction. A licensed teacher is not required to be a certified trainer of cardiopulmonary resuscitation to facilitate, provide, or oversee such instruction. The instruction may be given by community members, such as emergency medical technicians, paramedics, police officers, firefighters, licensed nurses, and representatives of the American Heart Association or the American Red Cross. These community members are encouraged to provide necessary training and instructional resources such as cardiopulmonary resuscitation kits and other material at no cost to the schools. The requirements of this subsection are minimum requirements. A local school district may offer CPR instruction for longer periods of time and may enhance the curriculum and training components, including, but not limited to, incorporating into the instruction the use of an automated external defibrillator (AED): *Provided*, That any instruction that results in a certification being earned shall be taught by an authorized CPR/AED instructor.

89 (e) A full week of classes during the week selected by the county board of education shall  
90 be recognized as Celebrate Freedom Week. The purpose of Celebrate Freedom Week is to  
91 educate students about the sacrifices made for freedom in the founding of this country and the  
92 values on which this country was founded.

93           Celebrate Freedom Week shall include appropriate instruction in each social studies class  
94        which:

(1) Includes an in-depth study of the intent, meaning, and importance of the Declaration of Independence, the Emancipation Proclamation, and the Constitution of the United States with an emphasis on the amendments that are crucial to the survival of democracy and freedom, such as the Bill of Rights and the thirteenth, fourteenth, fifteenth, and nineteenth amendments:

99 (2) Uses the historical, political, and social environments surrounding each document at  
100 the time of its initial passage or ratification; and

101 (3) Includes the study of historical documents to firmly establish the historical background  
102 leading to the establishment of the provisions of the constitution and Bill of Rights by the founding  
103 fathers for the purposes of safeguarding our constitutional republic.

104 The requirements of this subsection are applicable to all public, private, parochial, and  
105 denominational schools located within this state. Nothing in this subsection creates a standard or  
106 requirement subject to state accountability measures.

107 (f) Beginning the 2018-2019 school year, students in public schools shall be administered  
108 a test the same as or substantially similar to the civics portion of the naturalization test used by the  
109 United States Citizenship and Immigration Services between their ninth and 12th grade years as  
110 an indicator of student achievement in the area of civics education. The test results may be  
111 reported in the aggregate to the county board for evaluation by the board's curriculum director and  
112 reported to the board members. Nothing in this subsection creates a standard or requirement  
113 subject to state accountability measures.

114 (g) Beginning with the entering ninth grade class in the 2027-2028 school year, a public  
115 high school student shall be required to earn one unit of credit in a high school computer science  
116 course before the student graduates. "Computer science" means the study of computers,  
117 programming, and algorithms, including their principles, their hardware and software designs,  
118 their implementation, and their impact on society. Computer science does not include the study of  
119 everyday uses of computers and computer applications, such as keyboarding, word processing,  
120 digital literacy, or accessing the internet.

123 (2) A computer science course offered by a public high school shall:

124 (A) Be of high quality;

125 (B) Meet or exceed the curriculum standards established by the State Board of Education;

126 and

127 (C) Be made available in a traditional classroom setting. Only if a traditional classroom  
128 setting is not feasible shall a school offer the course in a blended learning environment or an  
129 online-based or other technology-based format that is tailored to meet the needs of each  
130 participating student: *Provided*, That the intent of (C) shall not interfere with the schedule of  
131 homeschool students or virtual students.

134 (4) The one credit shall be approved for one credit in Career Technical Education (CTE):  
135 *Provided*, That the credit shall be relevant to the program of study.

136 (5) If a student uses a computer science course to fulfill a math, the school district shall  
137 denote that computer science course as equivalent to a high school math course, on the student's  
138 transcript for the purpose of admission to a higher education institution in this state.

139 (6) The state board shall adopt rules detailing how credit fulfillment under paragraph (3) of  
140 this subsection shall be granted. The rules shall ensure maximum flexibility for students.

141 (7) Beginning in August of 2026, the State Board of Education shall make available to all  
142 public schools a list of course options that can meet the requirements for this credit. The state  
143 board shall update the list as often as necessary: *Provided*, That the state board shall create an  
144 approved list of courses that may be substituted.

145 (8) The state board may adopt rules to administer this subsection, including rules for  
146 flexible options to license computer science teachers, which may include without limitation,

147 approval codes, technical permits, ancillary licenses, and standard licenses. In adopting such  
148 rules, the board shall consider policy that ensures teacher subject area certification does not  
149 restrict the ability of students to earn a math or other substitution credit for a computer science  
150 course taken under this section.

**§18-2-47. Human growth and development curriculum; the "Baby Olivia Act".**

1       (a) This section shall be known and cited as the "Baby Olivia Act".

2       (b) As used in this section, a "human growth and development discussion" means an oral,  
3 written, or digital lesson, lecture, or presentation about human biology related to pregnancy and  
4 human development inside the womb.

5       (c) Beginning the 2025-2026 school year, each public school, including each public charter  
6 school, shall incorporate a human growth and development discussion into its curriculum, in  
7 grades three, five, and eight. The human growth and development discussion must include:

8           (1) A high-definition ultrasound video, at least three minutes in duration, showing the  
9 development of the brain, heart, sex organs, and other vital organs in early fetal development; and  
10           (2) The *Meet Baby Olivia* video developed by Live Action, showing the process of  
11 fertilization and every stage of human development inside the uterus, noting significant markers in  
12 cell growth and organ development for every significant marker of pregnancy until birth.

13           (d) The state board shall promulgate a legislative rule pursuant §29A-3B-1 *et seq.* to  
14 implement this section.

15           (e) Enforcement—

16           (1) Acknowledging the state's interest in safeguarding the health and well-being of its  
17 residents and citizens, the attorney general of the state of West Virginia shall have a cause of  
18 action to enforce this section on behalf of any or all residents or citizens of West Virginia.

19           (2) The attorney general of the state of West Virginia shall have a cause of action to sue for  
20 damages and injunctive relief on behalf of any or all residents or citizens of West Virginia against  
21 any person or entity that violates this section.

NOTE: The purpose of this bill is to amend required courses of education to include human growth and development related to pregnancy and human development inside the womb; required methods of presenting this instruction and adding a human growth and development curriculum to be known as the "Baby Olivia Act"; and to authorize the Attorney General to sue for any violation of the "Baby Olivia Act".

Strike-throughs indicate language that would be stricken from a heading or the present law and underscoring indicates new language that would be added.
