WEST VIRGINIA
BOARD OF TREASURY INVESTMENTS
Investing Local, County and State Funds for West Virginia

August 28, 2026

To: Members of the West Virginia Board of Treasury Investments,
Honorable Members of the Legislature,
And the Citizens of West Virginia

I am pleased to present you with the June 30, 2026, Annual Comprehensive Financial Report ("ACFR") for the West Virginia Board of Treasury Investments (the "BTI"). The report is a review of the financial and investment conditions of the State of West Virginia's Consolidated Fund. Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, rests with the management of the BTI. An independent certified public accounting firm has audited the basic financial statements contained in this report.

The BTI was created to oversee and manage the state's operating funds, also known as the Consolidated Fund. Significant achievements for the year included reaffirmation of the AAAm rating by Standard & Poor's for the WV Money Market and WV Government Money Market pools, continued outperformance of select pools versus their peer groups, and operating under budget. The ACFR demonstrates the BTI's commitment to financial accountability and conformity to the highest standards for preparation of state and local government financial reports.

The report is designed to provide a general overview of the State of West Virginia's Consolidated Fund investments. It was prepared by the Chief Financial Officer and staff of the BTI. These individuals are committed to providing reliable and credible information in conformity with accounting principles generally accepted in the United States of America.

Sincerely,

Larry Pack
State Treasurer
Chairman of the Board

315 70th Street SE • Charleston, WV 25304

WEST VIRGINIA
BOARD OF TREASURY
INVESTMENTS
Investing Local, County and State Funds for West Virginia

August 28, 2026

Members of the West Virginia Board of Treasury Investments

Honorable Members of the West Virginia Legislature

Participants in the State of West Virginia's Consolidated Fund

Citizens of West Virginia

Ladies and Gentlemen:

I am pleased to present you with the June 30, 2026, Annual Comprehensive Financial Report ("ACFR") for the West Virginia Board of Treasury Investments (the "BTI"). The report is a complete review of the financial status of the State of West Virginia's short-term operating funds (the "Consolidated Fund"). Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, rests with the management of the BTI. The BTI's financial statements have been audited by Maher Duessel CPAs. The independent audit provides reasonable assurance that the financial statements for the fiscal year ended June 30, 2026, are free of material misstatement, whether due to fraud or error. The independent audit involved performing procedures to obtain evidence about amounts and disclosures in the financial statements; comprehensive risk assessment as well as assessing the accounting principles used and the reasonableness of significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor rendered an unmodified opinion that the BTI's financial statements for the fiscal year ended June 30, 2026, are fairly presented in all material respects in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The independent auditor's report is presented as the first component of the financial section of this report.

Management is responsible for establishing and maintaining internal control designed to ensure that the investments of the Consolidated Fund are protected from loss, theft or misuse and that the preparation of the financial statements is in conformity with GAAP. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived from it, and (2) the evaluation of costs and benefits requires estimates and judgments by management. Management of the BTI has established a comprehensive internal control framework that is designed to provide a reasonable basis for making representations concerning the finances of the BTI. Because the cost of internal control should not outweigh its benefits, the BTI's comprehensive framework of internal control has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis ("MD&A"). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. BTI's MD&A can be found immediately following the report of the independent auditor in the Financial Section.

Profile of the West Virginia Board of Treasury Investments

The West Virginia Legislature established the BTI, effective July 8, 2005, as a public corporation of the State of West Virginia, to make short-term operating funds of the state more accessible to state government.

The West Virginia State Treasurer's Office provides a full-time staff for the BTI as well as various supplementary administrative services. A five-member Board of Directors governs the BTI. The State Governor, State Treasurer, and State Auditor serve as ex officio members of the Board. The Governor appoints the two remaining members subject to the advice and consent of the State Senate. Of the two members appointed by the Governor, one shall be a certified public accountant and one shall be an attorney, and both shall have experience in finance, investing and management. The State Treasurer is Chairman of the Board. The Board was established by the Legislature to provide prudent fiscal administration, investment, and management for the short-term operating funds of the State of West Virginia.

The Consolidated Fund provides for the investment of moneys not currently needed to fund state governmental operations, as well as providing the opportunity for local governments to participate in large investment pools, and for those funds statutorily required to be invested in the Consolidated Fund. As of June 30, 2026, the Consolidated Fund had approximately $9.5 billion in total net position. The Consolidated Fund is made up of six legally separate investment pools and accounts: three external investment pools, one special-purpose internal investment account, and two individual investment accounts. A more detailed description of the investment pools and accounts that make up the Consolidated Fund are found in Note 1 of the Notes to the Financial Statements.

In order to properly carry out the investment policy, as described in detail in the Investment Section, the Board has hired various outside service providers. Their roles as fiduciaries are clearly identified in the investment policy to ensure operational efficiency, clear lines of communication, and accountability in all aspects of operations. The Board contracts with Capital Cities, LLC, as the investment consultant. The Board requires the consultant to employ a chartered financial analyst or a certified treasury manager to work directly with the BTI. The consultant is responsible for performing investment manager evaluations, suggesting modifications to the investment policy, and performing other services requested by the Board. The Board also hires investment managers who have complete discretion over the timing, selection, and execution of investment trades. The managers are provided explicit written instructions detailing their particular duties and administer the portfolio consistent with the investment policy. The BTI currently contracts with UBS Asset Management (Americas), Federated Hermes and Sterling Capital Management as the investment managers.

In accordance with *WV State Code §12-6C-19*, the Board may charge fees, which are subtracted from the total return on investments, for the reasonable and necessary expenses incurred by the Board in rendering services. All fees collected are deposited in a special account in the State Treasury. The Board annually adopts a budget and fee schedule, which describes how fees are charged to each pool.

Investment Activities

The investment policies and strategies for the Consolidated Fund can be found in the Investment Section of this report. The policies are designed to provide safeguards on assets while optimizing return based on each fund's risk parameters.

The return information presented in the Investment Section is calculated by the BTI with the assistance of our consultant, Capital Cities, LLC, and the individual investment managers. The investment return calculations were prepared using a monthly time-weighted rate of return methodology.

Economic Review & Other Financial Information

The U.S. economy continued to show resilience in fiscal year 2026 despite a series of disruptions that threatened growth, unsettled markets, and altered the trajectory of monetary policy. Gross Domestic Product ("GDP") rebounded in the first quarter of the fiscal year, recovering from tariff-related uncertainty and market volatility that marked the last half of fiscal year 2025. At the end of fiscal year 2025, the Federal Reserve Bank of Atlanta's GDPNow estimated annualized quarterly growth at 2.9%. Actual GDP reported by the U.S. Bureau of Economic Analysis ("BEA") was stronger, with a quarter-over-quarter annualized increase of 3.8%, driven primarily by continued strength in consumer spending and a sharp downturn in imports. This momentum carried into the first quarter of fiscal year 2026, as the economy expanded at an annualized rate of 4.4%.

Consumer spending remained strong, with higher outlays on automobiles and recreational goods supporting growth. Exports rebounded during the quarter, rising at an annualized rate of 9.6%, led primarily by expenditure on capital goods and nondurable consumer goods. Business investment was also supportive, with notable increases in spending on equipment and artificial intelligence infrastructure.
Growth slowed significantly in the second quarter, falling to an annualized rate of 0.5%. The decline was attributed to weaker exports, which fell at an annualized rate of 0.9% for the quarter, and a forty-three-day shutdown of the U.S. government. The shutdown, which began on October 1, resulted from Congress failing to pass an annual budget or continuing resolution due to disagreements over federal spending limits, foreign aid cuts, and expiring subsidies under the Affordable Care Act. With the federal government closed, key reports from the U.S. Bureau of Labor Statistics ("BLS") and the BEA, including employment figures and inflation data, were delayed or postponed. Without these data, the Federal Open Market Committee ("FOMC") relied more heavily on private-sector sources, regional Federal Reserve business surveys, and financial market indicators to assess economic conditions.

The economy bounced back in the third quarter, growing at an annualized rate of 2.1%. Increases in consumer spending, a rebound in government outlays, and higher investment and exports supported the pickup. Consumer spending, while still a positive contributor, was more subdued than in prior quarters, rising at an annualized rate of 0.5%.

Heading into the final quarter of fiscal year 2026, GDP was expected to slow because of supply shocks from rising energy costs related to the U.S.–Iran war, a decrease in government spending, and a widening trade deficit. Increases in consumer spending and business investment, particularly technology and AI infrastructure, were expected to be the primary drivers of growth in the final quarter. As of fiscal year-end 2026, GDPNow estimated annualized quarterly growth at only 1.2%. GDPNow is not an official estimate; it is a running estimate of current-quarter GDP based on available data and can fluctuate significantly over a quarter, gaining accuracy as underlying data become more complete.

West Virginia's economy rebounded as expected in the fourth quarter of fiscal year 2025, increasing at an annualized rate of 4.1% for the quarter, outpacing the U.S. economy's 3.8% growth. The state continued to

outperform the nation and most other states in the first quarter of fiscal year 2026, rising at an annualized rate of 4.9% versus 4.4% for the U.S. Key drivers included gains in mining and oil and gas extraction, durable goods manufacturing, and healthcare.

Growth slowed in the second quarter and fell behind the national pace as West Virginia's economy contracted 1.0% for the quarter versus U.S. growth of 0.5%. The decline reflected weakness in agriculture, mining and oil and gas extraction, construction, manufacturing, and government services. Because mining and oil and gas extraction and government services are dominant sectors in the state, declines in these areas have an outsized impact on overall growth.

Growth rebounded in the third quarter, with the state economy expanding at an annualized rate of 1.4%, though it lagged the performance of 24 other states and the nation overall. Increases in government, mining, and healthcare were the largest contributors to third-quarter GDP.

Overall, positive growth supported general revenue tax collections. Total collections exceeded estimated revenues of $5.3 billion by more than $370 million. General revenue fund tax collections for fiscal year 2026 exceeded fiscal year 2025 levels by approximately 3%. The biggest contributors were consumer sales and use taxes, personal income tax ("PIT"), and severance taxes. While growth in PIT collections is a positive signal of wage gains, year-over-year growth fell below the rate of inflation. The implementation of near 5.9% tax rate cuts in 2025 were primarily responsible for growth falling below the rate of inflation. The state may experience lower PIT growth in fiscal year 2027 and beyond as a result of an additional 5% across-the-board tax cut passed during the 2026 regular session. Severance taxes were nearly 22% above estimates for the year and are showing a positive trend leading into the next fiscal year, primarily due to firmer energy prices. Consumer sales and use tax collections grew 7.2% over fiscal year 2025, exceeding official estimates by $41.5 million. As with PIT collections, rising wages and consumer spending are encouraging signs for the state's economic health, especially as the year-over-year growth rate exceeded inflation.

Heading into fiscal year 2026, many forecasters expected continued softening in labor markets. A Federal Reserve Bank of Philadelphia survey in May 2025 indicated forecasters expected the unemployment rate to end calendar year 2025 at 4.5%, an increase of 0.3 percentage points from then-current levels. This projection proved broadly accurate: the rate ticked up to 4.5% by November 2025 before ending the year at 4.4%. The increase was driven by sluggish job growth, federal policy shifts related to immigration and tariffs, and rising long-term unemployment.

For calendar year 2025, average monthly job creation fell to approximately 49 thousand, down sharply from 186 thousand per month in 2024. In February 2026, the BLS released its annual revision of sample-based job creation numbers to near-universe actual employment counts for 2025. The revised figures painted a weaker picture: total new jobs for 2025 were revised down from 584 thousand (an average of 49 thousand per month) to just 181 thousand for the year (an average of 15 thousand per month). Job creation in January 2026 suggested potential improvement, with roughly 160 thousand new jobs added. However, the February 2026 report dashed those hopes, showing a reduction of 92 thousand jobs versus consensus expectations for an increase of about 50 thousand. The BLS also reported that the labor force participation rate slipped to 62%, its lowest level since December 2021.

The next three reports, covering March through May 2026, came in higher than expected, indicating a possible rebound as reported job gains averaged roughly 190 thousand per month. Still, underlying trends were mixed: the share of individuals out of work for 27 weeks or more increased, while overall hiring and layoff rates were depressed or frozen. The participation rate fell to around 61.8% over this period, a decline of 0.5 percentage points from fiscal year-end 2025.

A key factor behind the participation decline was the annual benchmarking the BLS performs on the Current Population Survey ("CPS"). In January 2026, the BLS updated population controls to reflect the latest Census Bureau demographic data, raising the 65-and-older share by 0.61 percentage points and lowering the estimated prime-working-age population (25 to 54 years) by 0.51 percentage points. Because individuals 65 and older have a much lower participation rate (about 19% versus about 84% for prime-age workers), these compositional shifts mechanically lowered the overall participation rate. The adjustment reflected methodological changes that left the total population unchanged but shifted its age composition, partly due to updated information showing that net international migration—concentrated among prime-age individuals—had declined. Other contributors to the decline included the ongoing aging of the U.S. population (about 16% of the decline) and changes in participation within age groups (about 41%). Overall, labor markets were softer over fiscal year 2026, prompting three successive rate cuts by the Federal Reserve. By fiscal year-end, however, sticky inflation was viewed by the Fed as a more pressing issue than labor-market weakness.

Employment is closely tied to general revenue tax collections, as approximately 73% of general revenue is derived from taxes on the earnings and expenditures of state residents. Because the Board of Treasury Investments (BTI) is the primary investment vehicle for the general revenue fund, changes in tax collections affect the balances invested on the general revenue fund's behalf.

West Virginia's preliminary, seasonally adjusted unemployment rate was 4.2% in June 2026, ranking 28th across the 50 states plus the District of Columbia—an increase of 0.2 percentage points from the revised June 2025 rate of 4.0%. In April 2026, the BLS released its annual benchmark revision to state employment data for 2025, which resulted in higher reported unemployment rates due to changes in population and participation rates. A positive note in the revisions was an increase of 3,800 jobs in estimated total nonfarm payrolls for 2025, one of only a handful of states with an upward employment revision.

While West Virginia's ranking slipped from 21st to 28th compared with other states, this still represents an improvement over pre-pandemic relative rankings, when the state typically ranked around 48th. West Virginia's unemployment rate remained ahead of Kentucky (4.7%) and Maryland (4.3%) but trailed Ohio (3.6%), Virginia (3.7%), and Pennsylvania (4.1%). The labor force participation rate ("LFPR") edged down from 54.4% at fiscal year-end 2025 to 53.9% at fiscal year-end 2026. Part of the decline reflects the CPS revisions described above, which contracted the prime-age cohort and increased the 65-and-older cohort. Over the past decade, West Virginia has nonetheless made progress relative to the national LFPR. In June 2014, West Virginia's LFPR stood at 53.7% compared with the national rate of 62.7%. Since then, the national rate has fallen 0.9 percentage points to 61.8%, while West Virginia's has risen 0.2 percentage points. Despite challenges related to the opioid crisis and demographics, the state has managed to grow participation against a declining national trend.

Wage growth is another important component of labor-market health. From the first quarter of calendar year 2025 to the first quarter of 2026, the BEA estimates that West Virginia's personal income increased at a 5.1% annualized rate—faster than the national average of 3.9% and 11th-best in the country. West Virginia also outpaced all neighboring states: Kentucky (3.9%), Maryland (1.5%), Ohio (3.2%), Pennsylvania (3.4%), and Virginia (2.6%).

Inflation, as measured by Core Personal Consumption Expenditures excluding food and energy ("Core PCE"), remained elevated and above the Fed's 2% target throughout the fiscal year. Core PCE is the Fed's preferred longer-run measure for tracking inflation trends. After ending fiscal year 2025 at 2.8%, Core PCE hovered between 2.7% and 2.8% over the first five months of fiscal year 2026 before accelerating in December 2025. The December report was higher than expected, with month-over-month Core PCE rising 0.4% versus a 0.3% expectation and the year-over-year rate increasing to 3.0%. This unexpected pickup in

inflation suggested building price momentum that would likely keep the Fed on hold over the first few meetings of calendar year 2026.

Spending on goods, which had been flat to deflationary over the first half of the year, unexpectedly increased by 0.4% in December. This was attributed, in part, to the lag between the announcement of tariffs and their full pass-through to final prices. Although tariffs were announced in April 2025, effects were delayed as firms sold off pre-tariff inventories, retailers sought to rebuild profit margins after absorbing tariff costs, and frequent adjustments and exemptions created uncertainty around final tariff liabilities. The abrupt shift in inflation led to a change in the interest-rate outlook, as the prevailing view moved from two potential cuts in the first half of 2026 to just one.

Inflation prints in January and February 2026 were in line with expectations but continued to show price pressures in goods due to lingering tariff pass-through effects. The outbreak of war between the U.S. and Iran in late February disrupted energy markets as oil and petroleum-related product shipments from the region dropped significantly. The energy shock and ongoing tariff effects resulted in a surge in inflation from March to May, with year-over-year Core PCE rising to 3.4% by May 2026. Although Core PCE excludes volatile energy components, petroleum-related inputs affect a wide array of products and services. Higher fuel costs raise transportation expenses, which are passed through to consumers. Industries reliant on plastics and chemicals derived from petroleum face increased input costs, which may also be passed on. While food is excluded from Core PCE, higher petroleum costs increase production, processing, refrigeration, and transportation expenses for food products. The inflation surge in the last half of the fiscal year effectively ended expectations that the FOMC would resume cutting rates soon. As of fiscal year-end, the inflation outlook remained cloudy as the U.S.–Iran war persisted. Most projections suggested inflation would likely continue to rise in June before beginning to level off.

After remaining on hold for most of calendar year 2025, the FOMC began cutting rates again in September 2025. The Fed had paused after its December 2024 cut, as policy was viewed as significantly less restrictive following a cumulative 100 basis points of easing over the final months of 2024. With risks roughly balanced, the Fed remained patient, assessing incoming data to determine the need for further action. Tariffs enacted in early 2025 also kept the Fed on the sidelines as it evaluated the effects on inflation and employment. By September 2025, slowing monthly job growth and some easing in inflation prompted a 25-basis-point cut. Fed Chair Jerome Powell characterized the move as a "risk-management cut," aimed at protecting a softening labor market while balancing persistent inflation pressures amid higher uncertainty. The U.S. government shutdown that began in October 2025 disrupted the flow of key economic reports, including monthly employment and inflation estimates. Prior to the shutdown, jobs data had indicated a clear downward trend. With official data unavailable, the Fed turned to private sources such as the ADP Employment Report, third-party sentiment surveys, and internal field reporting to assess conditions. ADP's data, used as a proxy for official nonfarm payrolls, appeared to confirm a broader deceleration in private-sector hiring across late summer and early fall, reinforcing the narrative of a cooling labor market. Consumer confidence indicators from the Conference Board and University of Michigan showed slipping confidence and fading belief that inflation would return to 2% in the near term. Despite the upward drift in long-term inflation expectations, which would typically argue for tighter policy, the Fed opted for another 25-basis-point cut at its October 2025 meeting.

The decision was not unanimous: two voting members dissented, one favoring a larger 50-basis-point cut and the other preferring no change. Minutes released after the meeting indicated a significant internal divide, with many participants arguing that rates should remain unchanged for the rest of 2025. The Fed cut rates one last time in December 2025, easing by 25 basis points. With economic reports still delayed by the shutdown, most participants favored cutting rates to help insulate employment from further downside risks. Dissent widened, with three voting members opposing the move: two favoring no cut and one advocating a larger reduction. Several regional Federal Reserve Bank presidents, though non-voting, also

voiced opposition. The Summary of Economic Projections released after the meeting revealed a near-even split among members, with seven projecting no cuts in 2026 and eight projecting two or more.

The first three meetings of calendar year 2026 resulted in no rate actions. The January statement noted solid expansion and signs of labor-market stabilization, while acknowledging that inflation remained somewhat elevated. Notably, the Committee removed language suggesting greater risk from labor-market weakness than from higher inflation. Energy supply shocks and rising geopolitical conflict kept the Fed on hold in March, as the economic implications of Middle East developments were uncertain. In April 2026, the last meeting chaired by Jerome Powell, the Committee again paused. With the war dragging on and inflation rising, the meeting was more contentious, featuring four dissents. Minutes released in May confirmed a deeply divided central bank, with a majority prepared to hike if inflation remained sticky. A substantial number of the 19 participants, including voting members and non-voting regional presidents, expressed concern that financial conditions were not restrictive enough.

At the June 2026 meeting, the Fed, as widely expected, left rates unchanged at a range of 3.50% to 3.75%. The first meeting under new Chair Kevin Warsh surprised markets in other ways. The statement's brevity was notable, at just 114 words compared with 244 in April (excluding vote-count language). The balance-of-risks statement that had prompted several April dissents was dropped entirely. A stark line in the statement underscored the inflation mandate: "the Committee will deliver price stability." In addition to trimming forward guidance and emphasizing price stability, Chair Warsh announced five task forces to review communications, the balance sheet, data, productivity and jobs, and the inflation framework. Absent major changes in the outlook, near-term policy shifts could be limited as the Committee awaits recommendations before making substantial adjustments to interest rates.

Front-end markets saw significant developments over the fiscal year, from Fed easing in the first half, to Middle East conflict, to a new FOMC chair. Yields in the Treasury bill curve declined over the first half, primarily due to three successive 25-basis-point cuts. With expectations of at least two further cuts, the bill curve ended calendar year 2025 negatively sloped: one-month bills yielded around 3.70%, while one-year bills yielded 3.48%.

As expectations for additional cuts faded in the second half of the fiscal year, very front-end yields moved within a narrow range, ending the fiscal year near December 2025 levels. Bill maturities from two months to one year also traded in a narrow range but began pushing higher over the last two months as market expectations shifted from a dovish to a hawkish Fed. By fiscal year-end, yields on bills in this range rose by 10 to 50 basis points versus late 2025. Overall, yields in the one- to six-month range fell relative to fiscal year-end 2025, with the one-month down 62 basis points and the six-month down 28.

Further out the curve, in the one- to three-year range, yields generally declined in the first half on the back of Fed cuts and expectations of additional easing. Over this period, interest-rate volatility fell to its lowest levels since the Fed began hiking in March 2022. Conditions reversed in the second half, and yields became more volatile. Concerns about artificial intelligence disruption initially pushed yields lower, while rising geopolitical tensions and energy prices later drove them sharply higher. The two-year Treasury traded within a range exceeding 60 basis points during the third quarter alone. In the fourth quarter, one- to three-year yields rose steadily as markets priced in one or more near-term hikes to address inflation. By fiscal year-end, one-year yields were essentially unchanged from the start of the year, while three-year yields were 40 basis points higher.

In this environment, yields on the two money market pools fell relative to fiscal year 2025. Rising yields further out the curve were a drag on returns in the WV Short Term Bond Pool.

Performance across BTI's three investment pools declined from the prior fiscal year. Net-of-advisor-fee performance in the WV Money Market Pool fell from 4.96% in fiscal year 2025 to 4.11% in fiscal year 2026. The WV Government Money Market Pool fell from 4.82% to 3.96% over the same period. Yields on the two pools decreased steadily through the first seven months, primarily due to the three successive Fed cuts in the first half of the year. Returns leveled off in February 2026 as the cuts were fully reflected in holdings and then fluctuated within a narrow range for the remainder of the year as expectations shifted from cuts to hikes.

The WV Short Term Bond Pool's performance fell significantly from fiscal year 2025's 6.43%, coming in at 3.69% for fiscal year 2026. On a relative basis, performance was strong: the pool beat its benchmark return of 3.28% by 41 basis points and outperformed the Bloomberg U.S. Treasury 1–3 Year Index by more than 77 basis points. Despite repeated shocks from policy uncertainty, government dysfunction, rapid technological change, and geopolitical conflict, the U.S. economy proved more resilient than expected. Healthy growth, solid corporate earnings, strong consumer balance sheets, and persistent investor demand for income-producing assets supported risk markets and allowed corporate bonds, asset-backed securities, commercial mortgage-backed securities, and taxable municipals to outperform comparable U.S. Treasuries. The portfolio's income advantage over the benchmark, plus spread tightening across these sectors, was the primary driver of outperformance in fiscal year 2026.

Major Initiatives

- *Standard & Poor's AAAm Rating*

For the twentieth consecutive year, Standard & Poor's re-affirmed the BTI's AAAm rating on the WV Money Market and WV Government Money Market Pools. Funds with Principal Stability Fund ratings ("PSFRs"), such as the BTI, seek to maintain a stable net asset value. The AAAm PSFR rating is the highest money market rating assigned by Standard & Poor's. For a fund to be eligible for this rating, all investments must carry a Standard & Poor's short-term rating of A-1+ or A-1.

The AAAm rating is based on Standard & Poor's analysis of the fund's credit quality, investment policies, market price exposure, and conservative management. The rating signifies that the safety of the invested principal is excellent, and that there is superior capacity to maintain a stable net asset value at all times. This is achieved through conservative investment practices and strict internal controls.

- *Budget Surplus*

For fiscal year 2026, the BTI ended the year with a budget surplus of $671,000. The surplus was the result of conservative management of expenditures. With this surplus, the BTI operated in surplus territory for the nineteenth consecutive year.

- *Peer Group Benchmark*

Capital Cities, LLC, the BTI's investment consultant, maintains a peer group benchmark for the WV Money Market and WV Government Money Market Pools. The benchmark for the WV Money Market Pool is composed of a universe of prime money market funds, while the benchmark for the WV Government Money Market Pool comprises government money market funds.

The WV Money Market Pool peer group includes 127 discrete prime money market funds. The Pool ranked first out of the 127 funds for the 1-year, 3-year, and 5-year periods ending June 30, 2026. The high ranking was attributed to the low effective investment management fee paid to the Pool's investment managers. For the year ended June 30, 2026, the effective investment management fee was 3.15 basis points.

The WV Government Money Market Pool peer group comprises 663 discrete government money market funds. The Pool ranked first out of the 663 funds for the 1-year, 3-year, and 5-year periods ending June 30, 2026. As with the WV Money Market Pool, this high ranking versus the peer group was attributed to the favorable investment management fee schedule. For the year ended June 30, 2026, the effective investment management fee was 3.00 basis points.

- *Certificate of Achievement for Excellence in Financial Reporting*

The Government Finance Officers Association of the United States and Canada (the "GFOA") awarded a Certificate of Achievement for Excellence in Financial Reporting to the BTI for its Annual Comprehensive Financial Report for the fiscal year ended June 30, 2025. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized Annual Comprehensive Financial Report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current Annual Comprehensive Financial Report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments

We wish to express our appreciation to many individuals whose dedicated efforts have made this report possible. BTI's success would not be possible without the support and leadership of the Board members, the Legislature, the participants, and the citizens of West Virginia. The BTI's staff, Capital Cities, LLC, UBS Asset Management (Americas), Sterling Capital Management, and Federated Hermes provided diligent and dedicated service in building the BTI as a professional investment organization for the investment of short-term state funds.

Respectfully, I hereby submit the Annual Comprehensive Financial Report of the West Virginia Board of Treasury Investments for the Year Ended June 30, 2026.

Sincerely,

Karl V. Shanholtzer III, CFA, CPA

INVESTMENT PHILOSOPHY

The Board was established by the legislature to provide prudent fiscal administration, investment, and management for the Consolidated Fund. It is the investment philosophy of the Board to invest assets in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity.

OBJECTIVES

All assets shall be invested with the following objectives and priorities:

- Safety of principal. Investments shall be undertaken in a manner that seeks preservation of capital with reasonable investment risk, in the overall portfolio.
- Liquidity requirements of anticipated and unanticipated expenditures.
- Maximization of the yield allocated to participant investments consistent with all investment objectives.
- Recognition of differing objectives and needs of various participants.
- Conformance with State law and other pertinent legal restrictions.
- Diversification of assets by investment in various securities classifications and the use of various investment managers in order to smooth the volatility of returns.
- Realized gains and losses are recognized by the Funds as they occur.

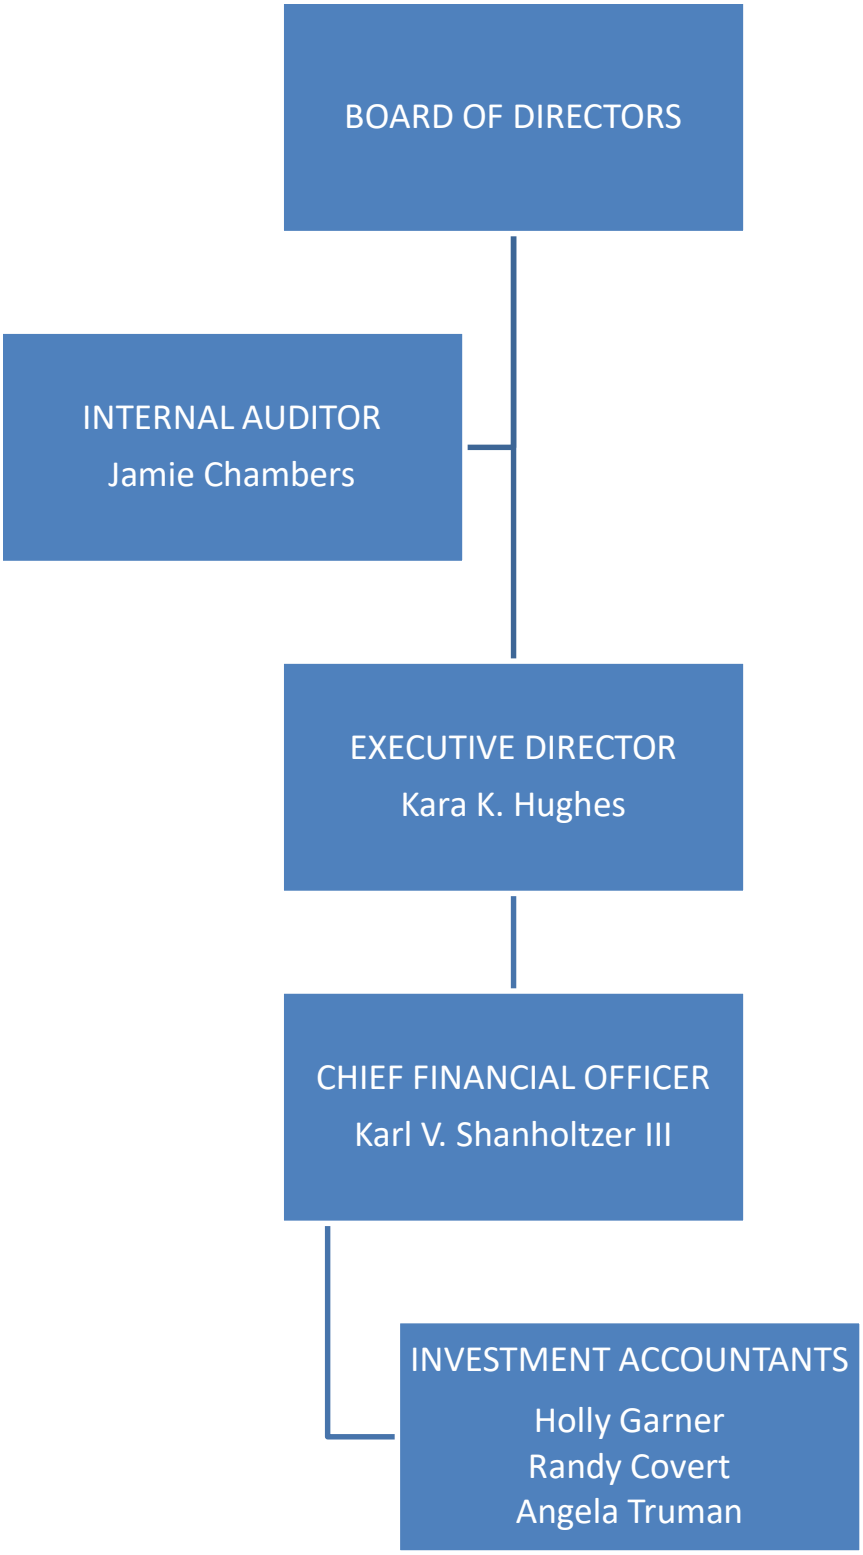

WEST VIRGINIA
BOARD OF TREASURY INVESTMENTS

MISSION STATEMENT

The Board of Treasury Investments' mission is to prudently invest the funds under its charge, for the benefit of its Shareholders, their constituents and citizens, and to achieve the best return possible for them, by providing focused investment management services, and utilizing financial professionals for the sound administration and oversight of its investment processes.

Independent Auditor's Report

To the Honorable Members of the
West Virginia Board of Treasury Investments
Charleston, West Virginia

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the business-type activities and the combined fiduciary funds of the West Virginia Board of Treasury Investments (BTI), a component unit of the State of West Virginia, as of and for the year ended June 30, 2026, and the related notes to the financial statements, which collectively comprise the BTI's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and the combined fiduciary funds of the BTI, as of June 30, 2026, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the BTI and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the BTI's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the BTI's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the BTI's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in

accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the BTI's basic financial statements. The supplementary information listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information listed in the table of contents. The other information listed in the table of contents (Introductory Section, Investment Section and Statistical Section) does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

West Virginia Board of Treasury Investments

Management's Discussion and Analysis

June 30, 2026

As management of the West Virginia Board of Treasury Investments (the "BTI"), we offer readers of the financial statements of the BTI this discussion and analysis of the BTI's financial performance for the fiscal year ended June 30, 2026. The purpose of management's discussion and analysis ("MD&A") is to help readers understand what the financial statements and notes in this financial report say about the financial health of the BTI and why it has changed since the last year. The MD&A contains information drawn from those other parts of the report, accompanied by explanations informed by management's knowledge of the BTI's operations and finances.

Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to Chief Financial Officer, West Virginia Board of Treasury Investments, 315 70th Street SE, Charleston WV 25304.

Overview of the Financial Statements

The BTI's financial report contains basic financial statements that present the BTI's financial results for the fiscal year and financial position as of the end of the fiscal year. These financial statements present the BTI's finances at an overall level and at a detailed level. The BTI financial statements include two groups of funds:

- *Proprietary fund financial statements* that report the services provided to the Consolidated Fund (*a fiduciary fund*). The proprietary fund is an internal service fund, or operating fund, used to account for activities that provide investment and administrative services to the State and other participants in the Consolidated Fund.
- *Fiduciary fund financial statements* that report resources for which the BTI acts as the trustee, or fiduciary. The fiduciary fund is used to account for the activities of the Consolidated Fund, which is made up of six legally separate investment pools and accounts. The fiduciary fund comprises three external investment pools, one special-purpose internal investment account, and two individual investment accounts.

The next section of this financial report contains notes to financial statements, which delve deeper into the BTI's finances as reported in the financial statements. The information in the notes is as important to understanding the BTI's finances as the information in the financial statements. The BTI uses notes to present information in greater detail than is possible within the financial statements themselves, explain the nature of amounts reported in the financial statements and how those amounts were determined, and report certain information that does not meet the requirements for inclusion in the financial statements (such as certain contingencies).

Finally, the commingled pools and individual investment accounts of the fiduciary fund, which are combined in a single column in the BTI's financial statements, are disaggregated in combining financial statements following the notes to the financial statements.

Types of Information in the Financial Statements

All of the BTI's financial statements are reported using the economic resources measurement focus and the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP") for governmental entities. The financial statements comprehensively report all types of financial statement elements:

- *Assets*, which are resources that the BTI controls, from short-term assets like cash or receivables, to long-term assets such as capital assets.
- *Liabilities*, which are amounts the BTI owes, from short-term liabilities, such as accounts payable or dividends payable, to long-term liabilities, which would represent obligations that are not due within one year of the financial statement date.
- *Revenues and expenses*, which are the inflows and outflows of economic resources, respectively, related to the current year.

The proprietary fund includes the following financial statements:

- *Statement of Net Position* which presents information on the proprietary fund's assets and liabilities, with the difference between the two reported as net position. This statement is categorized into current and non-current assets and liabilities.
- *Statement of Revenues, Expenses and Changes in Net Position* which reflects the operating and non-operating revenues and expenses of the proprietary fund for the operating year. Operating revenues primarily consist of investment service fees charged to the Consolidated Fund with significant operating expenses composed of salaries and benefits, investment advisor fees, investment management system expenses, professional service fees, and fiduciary bond fees.
- *Statement of Cash Flows* which reflects the proprietary fund's cash flows from operating activities. Cash collections and payments are reflected in this statement to arrive at the net increase or decrease in cash and cash equivalents for the year.

The fiduciary fund includes the following financial statements:

- *Statement of Fiduciary Net Position* which presents information on the fiduciary fund's assets and liabilities, with the difference between the two reported as net position held in trust for investment pool participants and individual investment account holders.
- *Statement of Changes in Fiduciary Net Position* which reports the additions and deductions to the fiduciary fund for the year. Additions are composed of investment income, such as interest, dividends, and accretion; investment expenses such as investment advisor fees, custodian bank fees, administrative fees; and purchases of pool units, reinvestments of pool distributions, and contributions to individual investment accounts. Deductions represent distributions to pool participants, redemption of units by pool participants, and withdrawals from individual investment accounts.

More detail about the measurement focus and basis of accounting can be found in **Note 2** to the financial statements, the summary of significant accounting policies, beginning on page 29.

The State of West Virginia reports the proprietary fund as an internal service fund in its Annual Comprehensive Financial Report. An internal service fund is used to report any activity that provides goods

or services to other funds, departments, or agencies of the State and its component units, or to other governments, on a cost-reimbursement basis. The State reports the portions of the Consolidated Fund pools and accounts held by state agencies and component units as investment holdings of those entities within the appropriate fund reporting categories for those entities. The State reports the portions of the Consolidated Fund held by local governments, municipalities, and other political subdivisions as investment trust funds, a type of fiduciary fund. Fiduciary fund reporting is used to account for resources held for the benefit of parties outside the governmental entity, and those resources are not available to support operations of that entity.

Analysis of the BTI's Finances – Business-Type Activities

The following is the condensed Statements of Net Position of the proprietary fund, which represents the assets, liabilities, and net position generated by the operating activities of the BTI, as of June 30, 2026, and 2025 (in thousands).

	2026	2025	Total Percentage Change
Current assets	$ 3,099	$ 3,107	-0.3%
Capital assets, net	4	4	0.0%
Total assets	3,103	3,111	-0.3%
Current liabilities	1,004	963	4.3%
Total liabilities	1,004	963	4.3%
Net position:			
Net investment in capital assets	4	4	0.0%
Unrestricted	2,095	2,144	-2.3%
Total net position	$ 2,099	$ 2,148	-2.3%

The net position of the Proprietary Fund decreased by approximately 2.3%, or $49,000, to $2,099,000 at the end of fiscal year 2026. The decrease in net position was the result of a decrease in current assets of $8,000 and an increase of $41,000 in current liabilities. Noncurrent assets did not change significantly during fiscal year 2026.

The majority of the proprietary fund's net position consists of current assets. Current assets are composed of cash and accounts receivable that will be used to pay investment advisor, custodian, and administrative costs. The current asset balance of $3,099,000 comprises $1,923,000 in cash and $1,176,000 in accounts receivable. The cash balance increased from fiscal year 2025 by $48,000, or 2.6%, while the accounts receivable balance decreased $56,000, or -4.6%.

The increase in the cash balance primarily resulted from accounts payable to State Street Global Exchange (SSGX) for maintenance and support on the BTI's investment accounting system. State vendors supplying goods or services in excess of $5,000 in any one fiscal year are required to register with the West Virginia Purchasing Division and pay a $125 registration fee. SSGX's vendor registration expired in January 2026 and was not renewed by fiscal year end. As a result, the BTI was unable to pay the $79,000 in invoices received from January to June 2026. Had these invoices been paid when presented, the cash balance would have decreased by $31,000, or -1.7%, primarily due to the operating loss of $49,000 for the fiscal year.

The accounts receivable balance of $1,176,000 represents fees that have been accrued but not withdrawn from the investment pools as of June 30, 2026, to pay investment advisor, custodian, and administrative

costs. In accordance with WV State Code §12-6C-19, the Board may charge fees to the pools for reasonable and necessary expenses incurred for rendering services. The fees charged to the pools are categorized into direct expenses (investment advisor and custodian fees) and indirect expenses (administrative costs). Administrative fees are accrued daily or monthly in the investment pools and accounts and are transferred on a quarterly basis to the BTI's proprietary fund to pay for all necessary and reasonable expenses. Investment advisor and custodial fees are accrued daily or monthly and transferred to the proprietary fund to coincide with the receipt of advisor and custodial invoices. The periodic nature of these transfers results in the accounts receivable balance. Accounts receivable decreased by $56,000, or -4.6%, from the fiscal year-end 2025 balance. This decrease was composed of a decrease in administrative fees receivable of $13,000 (-4.2% year-over-year), a decrease in advisor fees receivable of $40,000 (-4.6% year-over-year), and a decrease in custodian fees receivable of $3,000 (-5.5% year-over-year). Since the fee rates were unchanged from the prior fiscal year, these decreases were primarily caused by a lower level of assets under management ("AUM") in the WV Money Market Pool over the final quarter of the fiscal year. The WV Money Market Pool accounted for a $14,000 decline in admin fees receivable, a $42,000 decline in advisor fees receivable, and the entire decrease in custodian fees receivable. More information on changes in investment pool and account balances can be found later in the MD&A under **Analysis of the BTI's Finances – Fiduciary Activities**.

The balance of $1,004,000 in current liabilities represents $945,000 in accounts payable and $59,000 in reimbursements due to the West Virginia State Treasurer's Office (the "WVSTO") as of June 30, 2026. Current liabilities increased by $41,000, or +4.3%, as compared to the fiscal year-end 2025 balance. The increase in current liabilities was composed of an increase of $37,000 in accounts payable (+4.1% from prior fiscal year-end) and an increase of $4,000 in reimbursements due to the WVSTO (+7.3% from prior fiscal year-end). The accounts payable balance represents amounts due for services received from the BTI's investment advisors and custodian for the quarter ending June 30, 2026, and support and maintenance costs for January through June 2026 for the BTI's investment accounting system. The net increase of $37,000 in accounts payable was composed of a decrease of $39,000 (-4.6% year-over-year) in amounts payable to the BTI's investment advisors, a decrease of $3,000 (-4.9% year-over-year) in amounts payable to the BTI's custodian, and a $79,000 increase (+600.0% year-over-year) in payables for support and maintenance on the BTI's investment accounting system. The previously mentioned decline in the WV Money Market Pool's AUM over the final quarter of the fiscal year was responsible for the decline in advisor and custodian fees payable. The increase in amounts payable for investment accounting system support, discussed previously, was due to a vendor registration issue that prevented payment on the vendor's invoices. The $59,000 in reimbursements due to the WVSTO was for staffing services provided to the BTI, office space rental and utilities expenses, and the BTI's share of other office expenses paid on the BTI's behalf by the STO. The amount due to the WVSTO was $4,000 higher, or +7.3%, than at the end of fiscal year 2025, primarily due to an increase of $5,000 for staffing services. The increase in staffing services payable was due to staff pay increases granted during fiscal year 2026 and increases in benefits costs.

The following is the condensed Statements of Revenues, Expenses and Changes in Net Position of the proprietary fund for the periods ended June 30, 2026, and 2025 (in thousands).

	2026	2025	Total Percentage Change
Revenues			
Operating revenues:			
Management services	$ 1,156	$ 1,225	-5.6%
Advisor and custodian services	3,553	3,790	-6.3%
Total revenues	4,709	5,015	-6.1%
Expenses			
Operating expenses:			
General and administrative	1,202	1,178	2.0%
Advisor and custodian fees	3,553	3,790	-6.3%
Depreciation	3	3	0.0%
Total expenses	4,758	4,971	-4.3%
Increase (decrease) in net position	(49)	44	-211.4%
Net position at beginning of year	2,148	2,104	2.1%
Net position at end of year	$ 2,099	$ 2,148	-2.3%

Net Position of the proprietary fund decreased by $49,000 as a result of an operating loss for fiscal year 2026. This represented a 211.4%, or $93,000, decrease from fiscal year 2025's operating income of $44,000. The primary reason for the operating loss was a $69,000 decline in administrative fees and an increase of $24,000 in administrative expenses. While advisor and custodian fees/expenses decreased by a combined $239,000 as a result of changes in net position/AUM over the course of the fiscal year, the net effect on the operating income or loss is typically zero since the BTI only collects the amounts necessary to cover the direct expenses.

Operating revenues at June 30, 2026, consist of investment advisor, custodian, and management fees billed to the pools by the operating fund to cover the cost of providing investment management services. The fees charged to the pools are categorized into direct or indirect expenses. Direct expenses, which include investment advisor and custodian fees, are charged directly to the pools as they are incurred. Indirect expenses, such as staff costs, rent, and insurance, are charged to the pools based upon a fixed basis point fee against the net position of the pools and accounts. In accordance with West Virginia Code §12-6C-19, the fees collected are deposited in an account in the WVSTO designated as the Board of Treasury Investments Fee Fund

Operating revenues for fiscal year 2026 decreased by $306,000, or -6.1%. The decrease in revenue consisted of a decrease of $69,000 in management (administrative) fees charged to the pools, a decrease of $215,000 in advisor fee revenues, and a decrease of $22,000 in custodial fee revenue.

Administrative fees are computed based on the net position of pools and accounts in the Consolidated Fund. While the administrative fee rate was unchanged for fiscal year 2026, the average net position of pools and accounts in the Consolidated Fund for the fiscal year decreased by $703 million from prior year levels. The primary driver for the decrease in net position was a decrease of $830 million in the average net position of the WV Money Market Pool which resulted in a reduction of $82,000 in administrative fees. The remaining pools and accounts experienced increases in average net position over the fiscal year, resulting

in increases in admin fees of $13,000. More information on changes in investment pool and account balances can be found below under **Analysis of the BTI's Finances – Fiduciary Activities.**

Advisor fees are computed based upon the fair values of securities held in the investment pools. There are no advisor fees charged to individual investment accounts since the BTI does not contract with any investment advisors for the accounts. The decrease in advisor fees was composed of a $246,000 decrease in WV Money Market Pool advisor fees and increases of $17,000 and $14,000 in advisor fees for the WV Government Money Market and WV Short Term Bond Pools, respectively. The decrease in the advisor fees for the WV Money Market Pool was related to the previously mentioned decline of $830 million in average net position over the fiscal year. The average fair value of assets in the WV Government Money Market Pool increased by $57 million while the WV Short Term Bond Pool average increased $31 million, resulting in increases in advisor fees for the pools. More information on changes in investment pool and account balances can be found later in the MD&A under **Analysis of the BTI's Finances – Fiduciary Activities**.

Custody fees are computed based on a combination of an asset administration fee applied to the month-end market value of investments, individual transaction fees, and fixed administrative fees. Since the asset administration fee represents approximately 73% of total custodian fees, fluctuations in assets under custody will have a significant impact on overall custody fees. The previously mentioned decrease in fair value in the WV Money Market Pool resulted in a $25,000 decrease in custody fees, while the increased fair value for the WV Government Money Market and WV Short Term Bond Pools resulted in increases in custody fees of $2,000 and $1,000 respectively. More information on changes in investment pool and account balances can be found later in the MD&A under **Analysis of the BTI's Finances – Fiduciary Activities**.

Total operating expenses for the year decreased by $213,000 or -4.3%. The decrease was composed of an increase of $24,000 in general and administrative expenses (+2.0%) and a decrease in advisor and custodian fees of $237,000 (-6.3%).

General and administrative expenses represent costs associated with operating the BTI that are not considered directly applicable to investment management. Salary reimbursements, investment consulting fees charged by the BTI's investment consultant, and fiduciary bond expenses make up the majority of this expense line item. Salary reimbursements and related expenses increased by $9,000, or 1.3%, from the prior year. The increase was primarily the result of pay increases and increases in benefits costs during the fiscal year. Contractual and professional services increased by $22,000, or 7.8%, during fiscal year 2026. The increase was related to the design and printing of new informational and marketing materials (approximately $7,000), increases in contract costs for external audit and consulting (approximately $3,000), and a new subscription to Bloomberg Professional (approximately $12,000).

A large portion of the BTI's expenses represent investment advisor fees. The current investment advisors are Federated Hermes, Sterling Capital Management, and UBS Asset Management (Americas). All investment decisions and trade executions are performed by the investment advisors. The balance of custodian and advisor fee expense is composed of investment advisor fees of $3,294,000 and custodian fees of $259,000. Advisor fees decreased by $215,000 from fiscal year 2025 levels, a decrease of -6.3%, while custody fees decreased by $22,000 or -7.8%. These expenses decreased due to the previously mentioned changes in net position and AUM over fiscal year 2026. More information on changes in investment pool and account balances can be found later in the MD&A under **Analysis of the BTI's Finances – Fiduciary Activities**.

Analysis of the BTI's Finances – Fiduciary Activities

The following is combined, condensed Statements of Fiduciary Net Position of the Consolidated Fund fiduciary funds as of June 30, 2026 and 2025 (in thousands).

	2026	2025	Total Percentage Change
Assets			
Investments	$ 9,563,438	$ 10,011,941	-4.5%
Receivables	24,045	24,083	-0.2%
Total assets	9,587,483	10,036,024	-4.5%
Liabilities			
Accrued expenses	1,176	1,232	-4.5%
Dividends and purchases payable	36,665	8,900	312.0%
Total liabilities	37,841	10,132	273.5%
Net Position			
Held in trust for investment pool participants	9,437,102	9,931,376	-5.0%
Held in trust for individual investment account holders	112,540	94,516	19.1%
Net position	$ 9,549,642	$ 10,025,892	-4.8%

Net position is the excess of total assets over total liabilities. As of June 30, 2026, the Consolidated Fund had a total net position of approximately $9.5 billion. The net position consists of funds held in trust for investment pool participants and individual account holders. Investment pool participants are those participants investing in the WV Money Market, WV Government Money Market, and WV Short Term Bond Pools. The net position of the Consolidated Fund declined by $476.2 million, or -4.8%, from fiscal year 2025. The change in total net position was composed of a decrease of $494.3 in pooled investments and a $18.0 million increase in individual investment accounts. Significant changes in the net position of pools and accounts are discussed below.

The net position of the WV Money Market Pool fell by $493.4 million, which represented a 5.7% decrease in the pool's net position year-over-year. The decline was composed of net participant withdrawals totaling $837.6 million, which were partially offset by dividend and capital gain reinvestments totaling $344.2 million. Reversing the trend from the previous two years, local governments increased their investments by $74.2 million, primarily from increases in municipality investments totaling $72.6 million. State agency investments declined again, falling by $565.7 million over the fiscal year. The largest components of the change in state agency investments were decreases in investments by the Department of Transportation ($371.8 million), the Water Development Authority ($234.4 million), State Participation ($100.8 million), WV Economic Development Authority ($56.2 million), and the School Building Authority ($52.0 million). Offsetting these decreases were increases in investments in trust accounts held by the WVSTO ($90.8 million), West Virginia University ($68.4 million), and the Public Employees Insurance Agency ($58.6 million).

Net position of the WV Government Money Market Pool decreased by approximately $16.7 million, or 2.9% from fiscal year end 2025. The net decrease was composed of $41.0 million in net withdrawals which were partially offset by dividend and capital gain reinvestments totaling $24.3 million. State agency

deposits decreased by $20.1 million over fiscal year 2026 while local government deposits increased by $3.4 million. The decrease in state agency deposits was composed of a $20.3 million decrease in State Small Business Credit Initiative funds held in trust by the WVSTO, a $5.2 million decrease in investments of the Department of Environmental Protection , a $2.2 million decrease in amounts invested by the WV Housing Development Fund, and a $1 million in decreases in other state agency investments. Offsetting these declines was an increase in investments by the Municipal Bond Commission of $8.6 million. The majority of the increase in local government investments were from new investments by public service districts totaling $3.8 million. Other local government investments decreased by a net of $0.3 million.

The net position of the WV Short Term Bond Pool increased by $15.8 million from fiscal year-end 2025. The increase resulted from reinvestments of income and capital gain distributions totaling $37.4 million, a decline of $10.3 million in the fair value of investments, and net participant withdrawals of $11.3 million. The fair value of investments decreased by $10.3 million as yields rose over the second half of the fiscal year as expectations of continued easing by the Federal Reserve faded. There was minimal participant activity over the fiscal year, with some small contributions and withdrawals that resulted in a net increase in net position of $61 thousand through May 2026. In June 2026, the Department of Environmental Protection withdrew $11.3 million which resulted in net participant activity being negative for the year.

The increase of $18.0 million in the net position of individual investment accounts was due to an increase in investments of the State Loan Pool. The increase resulted from the WV Economic Development Authority ("WVEDA") drawing against the Broadband Loan to fund increases in broadband loan insurance commitments. The WV Term Deposit Account and School Fund Account experienced minimal changes in net position over the year.

The receivables balance is composed of accrued interest and dividends. Receivables were little changed over the year even though there were decreases in investments in the pooled accounts and an overall decline in interest rates over the fiscal year. Interest and dividends receivable in the WV Money Market and WV Government Money Market Pools fell by a combined $1 million due to decreases in assets resulting from net participant withdrawals and a 70 basis point decline in the average coupon rate on interest bearing securities. Additionally, in the WV Government Money, attractive yields in Treasury bills and agency discount notes led to the investment manager favoring discount securities over interest bearing securities over the last quarter of the fiscal year, decreasing holdings of interest-bearing securities in the pool. Interest and dividends receivable in the WV Short Term Bond Pool increased by approximately $0.7 million due to increases in investment balances and an increase of approximately 17 basis points in the average coupon on securities held by the pool. Interest receivable in the individual investment accounts increased by a combined $0.3, primarily due to increases in loan balances in the State Loan Pool and the reset of the rate on the Broadband loan from 3.28% to 4.28% for fiscal year 2026. Taken together, these changes resulted in a smaller decrease in interest and dividends receivable than what would have been expected given the decline in investments and interest rates from the prior year.

Total liabilities increased by approximately $27.7 million from June 30, 2025, levels. Total liabilities consist of accrued expenses, representing accrued manager fees, custodian bank fees and administrative fees, payables for security purchases that settle after fiscal year-end, and dividends payable to participants in the WV Short Term Bond Pool. Accrued expenses represented approximately $1.2 million of the total at fiscal year-end and were approximately $56 thousand less than at the end of fiscal year 2025. The changes to the accrued expense liabilities from fiscal year 2026 were previously discussed as a part of the financial analysis of the proprietary fund. Dividends and purchases payable comprises $2.6 million in dividends payable to participants in the WV Short Term Bond Pool and payables for securities purchased in the WV Money Market, WV Government Money Market and WV Short Term Bond Pools totaling $34.0 million. Dividends payable in the WV Short Term Bond Pool were approximately $0.4 million less than fiscal year end 2025 due to declines market yields related to Fed rate cuts in the first half of the fiscal year. Payables for securities purchased increased by $28.1 million as compared to fiscal year-end 2025. Since

the BTI uses trade date accounting, a liability is recorded when a security is purchased that has a settlement date in a future accounting period. There is no significance to the change as it only means that there were more securities purchased at fiscal year-end 2026 with T+1 or greater settlement than were purchased at the end of fiscal year 2025.

The following is a combined, condensed Statements of Changes in Fiduciary Net Position of the Consolidated Fund fiduciary funds for the years ended June 30, 2026 and 2025 (in thousands).

	2026	2025	Total Percentage Change
Additions			
Net investment income	$ 407,322	$ 512,410	-20.5%
Net realized gain	2,460	1,989	23.7%
Net increase (decrease) in fair value of investments	(10,338)	8,397	-223.1%
Unit purchases and contributions	16,347,134	14,321,315	14.1%
Total additions	16,746,578	14,844,111	12.8%
Deductions			
Distributions	405,581	511,268	-20.7%
Unit redemptions and withdrawals	16,817,247	15,173,813	10.8%
Total deductions	17,222,828	15,685,081	9.8%
Change in net position	(476,250)	(840,970)	-43.4%
Net position at beginning of year	10,025,892	10,866,862	-7.7%
Net position at end of year	$ 9,549,642	$ 10,025,892	-4.8%

Fiscal year 2026 net investment income decreased by approximately 20.5%, or $105.1 million, from fiscal year 2025 levels. The overall decline in net investment income was composed of decreases of $105.3 million in the WV Money Market Pool (-23.4% year-over-year), $2.0 million in the WV Government Money Market Pool (-7.6% year-over-year), and $0.2 million in the Term Deposit Account (-13.7% year-over-year). Offsetting these decreases were increases in net investment income of $1.1 million in the WV Short Term Bond Pool (+3.3% year-over-year) and $1.3 million in the State Loan Pool (+95.3% year-over-year).

Net investment income for the WV Money Market Pool declined by $105.3 million dollars primarily as a result of the previously discussed decrease in pool net position of $493.4 million and a decline in yields resulting from 75 basis points in rate cuts by the Federal Reserve Open Market Committee (“FOMC”) during the first half of the fiscal year. The FOMC enacted three consecutive rate cuts over the last three meetings of calendar year 2025 (first half fiscal year 2026), dropping the federal funds rate from a range of 4.25% to 4.50% to a range of 3.50% to 3.75%. Although there were expectations that the FOMC would enact one or two more rate cuts over the last half of fiscal year 2026, those expectations were not realized as rising inflation and stable labor markets put the Fed on hold. Pool yields, as measured by the annualized monthly return, bottomed out in April 2026 at around 3.78% before gradually rising to 3.81% by fiscal year-end. The slow rise in yields over the last two months were the result of markets pricing in a more hawkish Fed. Year-over-year, the return on the pool fell from 4.96% for fiscal year 2025 to 4.11% for fiscal year 2026. The decline in yields from the Fed rate cuts and the decline in pool investments from net

participant withdrawals were responsible for the decrease in net investment income in the WV Money Market Pool.

The reasons for the $2.0 million decrease in net investment income in the WV Government Money Market Pool are the same as with the WV Money Market Pool: the previously discussed decline in net position and a decline in market yields as a result of three FOMC rate cuts during fiscal year 2026. Returns in the WV Government Money Market Pool followed a similar pattern to those in the WV Money Market Pool, declining over most of the fiscal year before rising slightly over the last two months of the fiscal year. The overall return for fiscal year 2026 of 3.96% was approximately 82 basis points below fiscal year 2025's return of 4.79%.

The decline of $0.2 million in net investment income in the WV Term Deposit Account was due to lower market rates over the fiscal year. Term deposits in the Account have floating interest rates that reset the first of every month based on the effective federal funds rate ("EFFR"). EFFR fell from 4.33% at the beginning of the fiscal year to 3.63% by the end of December 2025, where it remained for the rest of the fiscal year. This decline in rates accounts for the decrease in net investment income over the year.

Net investment income of the WV Short Term Bond Pool rose $1.1 million from fiscal year 2025 levels, primarily due to the previously discussed changes in net position. Also contributing to the increase was an increase in the average coupon rates securities rose from fiscal year-end 2025. As the portfolio turned over during the year, new securities purchased had higher coupon rates than existing portfolio holdings. The average coupon rate at fiscal year-end increased from approximately 4.27% at the end of fiscal year 2025 to 4.46% by the end of fiscal year 2026. The combination of an increase in investments and increase in average coupon helped to increase interest earnings by $0.4 million. Net accretion income increased by $0.7 million from fiscal year 2025 levels. The increase was directly attributable to two securities called during the fiscal year that were originally purchased at significant discounts to par. The unamortized discounts on these securities at time of call totaled approximately $0.9 million. Absent these two transactions, accretion income would have decreased by approximately $0.2 million as new securities purchased over the fiscal year were purchased with smaller discounts or at small premiums to par.

Net investment income in the Loan Pool increased by $1.3, almost doubling fiscal year 2025's net investment income of $1.4 million. The increase in net income was the result of the previously discussed increase in the Broadband Loan and an increase in the broadband loan rate from 3.28% for fiscal year 2025 to 4.28% for fiscal year 2026. The rate on the broadband loan resets quarterly based on the trailing twelve-month return of the WV Money Market Pool. Under the terms of the loan, the annual change to the loan rate is capped at 1.00% per year, which resulted in the loan rate staying at 4.28% for the entire fiscal year. The Broadband Loan is more fully discussed in **Note 7** to the financial statements starting on page 40.

For the year, the investment pools had a combined net realized gain of $2.5 million. The net realized gain for fiscal year 2026 was approximately $0.5 million higher than fiscal year 2025's net realized gain of $2.0 million. An overwhelming majority of the net gains for the fiscal year were realized in the WV Short Term Bond Pool, which had a net realized gain for fiscal year 2026 of $2.4 million. The net realized gains were the result of trading activity by the portfolio manager to reposition the Pool in response to opportunities available in the market and to manage the Pool's duration within investment policy constraints. The WV Money Market and WV Government Money Market Pools had minimal net realized gains during fiscal year 2026. The realized net gains in these pools were the result of normal trading activity related to generating liquidity, taking advantage of opportunities, or repositioning the portfolio to stay within policy limits.

The net change in fair value swung from a contributor to pool performance in fiscal year 2025 to a detractor from performance in fiscal year 2026. The net change in fair value for fiscal year 2026 was $18.7 million , or -223.1%, lower than the net change in fair value for fiscal year 2025. The WV Short Term Bond Pool

accounted for the entire $10.3 million decline in fair value for fiscal year 2026. Over the first half of the fiscal year, the change in fair value was modest, with the pool increasing in fair value by approximately $0.2 million. The second half of the fiscal year was characterized by a more challenging environment due to the outbreak of war between the U.S. and Iran, rising inflation, and concerns related to leveraged loan defaults and private credit underwriting standards. As of the end of calendar year 2025, most market participants were expecting the FOMC to continue cutting rates, with two rate cuts priced in for the last half of the fiscal year. The steady stream of less-than-positive economic news, from inflation grinding higher and continued stability in the labor markets, led to a shift in rate expectations. By fiscal year end, the markets were pricing in two rate hikes over the second half of calendar year 2026. The small, unrealized gain of $0.2 million turned into an unrealized loss of $10.3 million as a result of changes in the expected future path interest rates and changes in market yields as a result of the changing expectations. The yield on the two-year Treasury, which had fallen from 3.72% at the end of fiscal year 2025 to 3.47% by December 31, rose significantly over the second half of the fiscal year, increasing by 67 basis points to 4.14% at fiscal year-end 2026. A tightening of credit spreads over the year helped to blunt some of the negative impact of rising Treasury yields. The decline in fair value in the pool was a headwind for pool performance since the pool's return is the result of net investment income and changes in fair value. The decline in fair value helped drag down the pool's investment return from 6.43% for fiscal year 2025 to 3.69% for fiscal year 2026.

Significant capital asset and long-term financing activity

The BTI reported net capital assets of $4,000 in the proprietary fund at the end of fiscal year 2026. The BTI does not typically engage in long-term financing activity, therefore there is no long-term financing activity reported in the BTI's financial statements. Capital assets are composed of office and computer equipment with a historical cost of $21,000, net of accumulated depreciation of $17,000. The BTI purchased new computer equipment during fiscal year 2026 at a cost of $3,000 and retired fully depreciated computer equipment with a historical cost of $2,000. Reported net capital assets were unchanged year over year as the increase of $1,000 in equipment was fully offset by a $1,000 increase in accumulated depreciation resulting from $3,000 in depreciation expense less $2,000 of accumulated depreciation on retired assets. Capital asset activity is reported in **Note 6** to the financial statements on page 40.

Currently known facts, decisions and conditions

The BTI is aware of the following items that will have an impact on the BTI and its investment pools over the next reporting period.

1) Assets under management are likely to decline from fiscal year-end 2026 levels. BTI management does not have an estimate for the magnitude of the decline. The following discusses the pools and accounts that may decrease over fiscal year 2027:

    a) Net position of the WV Money Market Pool is likely to continue to decline as agencies spend down invested funds. The following participants, which represent a significant portion of investments in the pool, are likely to experience declines in invested balances over fiscal year 2027:

        i) State Participation, which is the cash of the General Revenue fund and other cash of the state not invested for the benefit of a specific agency or program, represents approximately 41% of the pool's net position. State Participation declined over fiscal year 2026 by $100.8 million as General Revenue budget surpluses narrowed and re-appropriated General Revenue funds were spent down. Management of the BTI expects State Participation to decline further during FY 2027 but is uncertain of the magnitude of decline.

ii) Proceeds of the Roads to Prosperity bond issues declined by $294.0 million over the fiscal year from $835.4 million at the beginning of the fiscal year to $541.0 million at fiscal year-end. As of fiscal year-end 2026, these bond proceeds represent 6.6% of the pool's net position. Management of the BTI expects the spenddown to continue during fiscal year 2027 but is uncertain of the amount.

iii) The WVEDA has approximately $348.8 million in federal grant funds from the CARES Act ($3.2 million), American Recovery Plan Act ($269.7 million), and the Broadband Equity, Access, and Deployment program ($75.9 million). These funds will be withdrawn and expended over the next one to five years. Additionally, WVEDA has $297.8 million in funds appropriated by the legislature for economic development projects. The balance of this account decreased by $445.6 million from fiscal year-end 2025. The federal grant funds and project funds make up approximately 7.9% of the pool's net position as of fiscal year end. BTI management expects that WVEDA will continue to decrease their investments as they deploy funds for their intended purpose.

iv) The WV Water Development Authority ("WDA") has economic enhancement funds totaling $199.8 million invested in the pool. The balance of these investments declined by $188.7 million during fiscal year 2026 as WDA deployed these funds. BTI management expects that WDA will continue to spend these funds down in fiscal year 2027.

b) The net position of the WV Government Money Market Pool is likely to decrease over the course of fiscal year 2027. At the end of fiscal year 2026, there was approximately $191.2 million of municipal bond proceeds invested in the pool. Since these bonds were issued to finance specific projects, the funds will be drawn down as the projects get underway and progress towards completion. At the end of fiscal year 2025, there was approximately $192.2 million in bond proceeds invested. Approximately $52.7 million was drawn against these invested balances. The proceeds of two new bond issues totaling $51.7 were deposited during the fiscal year resulting in the $1.0 million decline over fiscal year 2026. For fiscal year 2027, BTI management expects that there will be similar drawdowns of invested bond proceeds but does not know if there will be new bond issuances that will be invested in the pool that could offset the drawdowns.

c) The net position of the State Loan Pool may decline during fiscal year 2027 as insured debt is repaid. Five of the seven insured loans are in repayment status for which the BTI received principal payments totaling $0.3 million during fiscal year 2026. Of the two remaining loans, one is fully funded but not yet in repayment, and the other is still being drawn against. Just over $0.4 million remains available to be drawn for the active loan. The remaining six loans are for insurance for letters of credit related to federal broadband grant awards. Grant recipients are required to maintain letters of credit payable to the federal government in an amount equal to a percentage of grant funds received. After achieving certain milestones, the letters of credit may be reduced, which would then reduce the amount necessary for insurance. Of the six insured letters of credit, two have not been fully funded and have $6.6 million available to be drawn. One fully funded project with insurance totaling $3.0 million, was able to reduce their letter of credit during the fiscal year. As a result of the reduction in the insured letter of credit, $2.0 million was repaid to the BTI. The three remaining insured projects, totaling $10.4 million, have been fully funded and may become eligible to reduce their letter of credit during fiscal year 2027.

2) As assets under management decrease and the BTI's proprietary cash balance declines, the administrative fee rate may have to be increased in future fiscal years. When setting the administrative fee, BTI's management factors in the cash balance of the proprietary fund, any

planned spending above normal levels, and future expected net position levels of the pools and accounts of the Consolidated Fund. BTI management intends to maintain cash reserves in the proprietary fund of around $1 million and as of the end of fiscal year 2026 the cash balance of the proprietary fund stood at $1.9 million. The current administrative fee of 1.0 basis points has been in effect since fiscal year 2024 and will remain unchanged in fiscal year 2027. In fiscal year 2027, the BTI will move from its current location to a new location. BTI management expects approximately $30 thousand to $40 thousand in additional expenditures related to the move. The majority of these expenditures will be for new office furniture, some of which may meet the $1,000 minimum threshold for capitalization. Additionally, salary and benefit reimbursements to the WVSTO are expected to increase by approximately $30 thousand due to across-the-board pay raises approved by the legislature and individual merit raises granted to employees. Management expects that the proprietary fund will experience a net operating loss for fiscal year 2027 and a decrease in the cash balance of the fund. The administrative fee for fiscal year 2028 may have to be increased from current levels. The increase will depend on the magnitude of the cash decrease in the proprietary fund and the magnitude of the decline in Consolidated Fund net position. A higher administrative fee will reduce the net-of-all-fees return for pool participants and individual account owners.

3) The Federal Reserve is under new leadership and is changing how it interacts with market participants. Newly appointed Fed chair Kevin Warsh has laid out a vision where the Fed communicates less and intervenes less in the market. After the Great Financial Crisis, the Fed moved towards greater transparency and more explicit signaling to investors about the Fed's intentions. Chair Warsh has expressed his opinion that this has resulted in market participants placing undue weight on Fed communications which can lock the Fed into fulfilling the expectations created by its forward guidance. By reducing the amount of forward guidance from the Fed, Chair Warsh is looking to give the FOMC more optionality around each meeting so they can react to the incoming data rather than being locked onto a set path. Chair Warsh also announced five task forces to review and modernize the Fed's operations and monetary policy frameworks. The announced task forces will review communications (how the Fed discloses its outlook and its policy reaction function), balance sheet (risks and benefits of the current ample reserves regime and optimal composition of assets), data (modernizing how Fed measures the economy), productivity and jobs (how long-term economic shifts drive efficiency), and inflation. In the near term, policy changes will likely be limited as the committee waits for recommendations from the task forces, which are due by the end of the fiscal year. The most immediate anticipated effect is that as the Fed reduces forward guidance, this will likely lead to more interest rate volatility around high-value data releases and Fed meetings.

4) The current outlook is for modest tightening in monetary policy which means that the next most likely rate action by the Fed will be a rate hike. At the press conference following his first meeting as Chair, Chair Warsh emphasized that the Fed's primary concern was price stability. While no action was taken at the June 2026 meeting, his post meeting statements signaled that the Fed is more hawkish and open to future rate hikes if price pressures do not sustainably subside. At fiscal year-end, the BTI's investment managers are of the opinion that Fed will hike rates at least once, possibly as early as September 2026. But the path of policy in fiscal year 2027 is by no means clear and will be determined in part by the state of global conflicts. To the extent that these disrupt supply chains, especially the transit of crude oil tankers, they may push US inflation upward, forcing the Fed to tighten further. In contrast, if geopolitical struggles abate, policymakers may feel comfortable remaining on hold. For most of the pools and accounts, rising rates are likely to be beneficial. Presented below are management's expectations of changes in pool performance:

   a) The two liquidity pools, which are the WV Money Market and WV Government Money Market Pools, generally benefit from rising yields. Both pools are required to maintain at least 10% of investments in daily liquid assets (investments maturing within one business day) and at least

30% in weekly liquid assets (investments maturing within five business days). Additionally, both pools are required to maintain a weighted average maturity of less than 60 days. In practice, the pool managers maintain higher levels of daily and weekly liquidity. In the WV Money Market Pool daily liquidity ranges between 20% and 25% and weekly liquidity between 30% and 35%. The daily and weekly liquidity ranges in the WV Government Money Market Pool are typically much higher. Because of the low average maturity and high levels of assets maturing within one week, increases in market rates and yields are rapidly incorporated in pool yields as investments turn over. More information on the weighted average maturity of the liquidity pools can be found in **Note 4** to the financial statements, starting on page 36.

b) WV Short Term Bond Pool performance is typically lower in a rising rate environment. The pool is a total return pool which means that an investor's return is composed of investment earnings, including interest, dividends and net amortization/accretion, and the change in the fair value of securities held in the pool. The price of security has an inverse relationship with the security's yield: as the yield rises the price falls. The sensitivity of the price of a security to changes in interest rates/yields is measured by effective duration. Effective duration estimates a bond's price change when interest rates change by 1%. As an example, if a bond's effective duration is 1.5, then a 1% increase in interest rates/yields would be expected to result in a 1.5% decrease in the bond's price. The pool's manager is required to maintain the effective duration of the pool within plus or minus 30% of the benchmark duration. If the manager expects that rates will fall, they may extend duration, as Sterling did in early fiscal year 2025 in expectation of an easing Fed. If the manager expects rates to rise, they may shorten duration, such as Sterling did when the Fed began hiking rates in 2022 to combat inflation. In fiscal year 2026, the manager maintained the pool's duration close to the pool's benchmark duration, which fluctuated between 1.81 and 1.84 over the fiscal year. Rates generally trended downward over the first eight months of the fiscal year. Through February 2026, the annualized fiscal-year-to-date return stood at 5.097%. As yields rose over the last four months of the fiscal year, performance dropped and ended the fiscal year at 3.681%. The pool's manager is expecting at least one rate hike in fiscal year 2027 and is not looking to deviate substantially from the benchmark duration. If there is only one rate hike over fiscal year 2027, the pool should perform better than it did in fiscal year 2026. However, if the Fed is forced to move aggressively to fight inflation, pool performance could be similar to, or worse than fiscal year 2026. Since the pool invests in credit and structured products, changes in credit spreads will also affect the pool's performance. At the end of the fiscal year, credit spreads were close to all-time lows and the manager sees little room for additional tightening, which would benefit performance. More information on the weighted average effective duration of the pool can be found in **Note 4** to the financial statements, starting on page 37.

Performance of the State Loan Pool is directly linked to the performance of the WV Money Market Pool. Performance will likely be lower in fiscal year 2027, but the magnitude of the decline will be determined by how the performance of the WV Money Market Pool evolves over the fiscal year. The interest rate on the WVEDA Broadband Loan, which is the only investment in the State Loan Pool, resets on a quarterly basis based on the trailing one-year

return of the WV Money Market Pool with a cap on the annual change of 1.00%. For the first rate reset of fiscal year 2027, the rate fell 15 basis points to 4.13%. If yields do not materially change over the first quarter of fiscal year 2027, the rate on the broadband loan is likely to be cut to around 3.95% to 4.00% for the September 2026 reset. The December 2026 and March 2027 rate resets will depend on how the performance of the WV Money Market Pool evolves. If the FOMC hikes rates, or front-end yields remain elevated, it could result in the broadband loan rate rising over the last two quarters of the fiscal year. More information on the Broadband Loan can be found in **Note 7** starting on page 40.

c) The performance of the WV Term Deposit Account will mostly be dictated by actions of the Federal Open Market Committee of the Federal Reserve. The term deposits in the account are floating rate with a monthly reset on the 1st business day of the month. The base rate for the term deposits is the effective federal funds rate ("EFFR") which is the volume-weighted median of overnight federal funds transactions reported to the Federal Reserve. EFFR typically falls between the upper and lower bound for the target federal funds rate set by the FOMC. Between FOMC meetings, the EFFR is remarkably stable, staying flat until the FOMC alters the target range. If the FOMC does implement rate hikes during the fiscal year, this will result in a higher level of earnings relative to fiscal year 2026. If there are no rate hikes, then fiscal year 2027 performance will be close to fiscal year 2026's performance.

West Virginia Board of Treasury Investments

Notes to Financial Statements

June 30, 2026

1. Organization and Operations

The West Virginia Board of Treasury Investments (the "BTI") is charged with managing the individual investment pools and accounts of the Consolidated Fund under authority of West Virginia State Code Chapter 12, Article 6C, West Virginia Treasury Investments Act. The West Virginia Legislature established the BTI as a public corporation of the State of West Virginia, to make short-term operating funds of the state more accessible to state government and to allow the West Virginia Investment Management Board (the "IMB"), which had managed the Consolidated Fund, to focus on the state's long-term trust investments. The Consolidated Fund is the statutory title of the fund that collectively refers to the investment pools and accounts that the BTI manages. The BTI operates on a fiscal year that begins July 1 and ends June 30. The BTI is considered a component unit of the State and its financial statements are presented in the State's annual comprehensive financial report.

The accompanying financial statements include the operations of the BTI as well as investment balances and transactions of the individual investment pools and accounts of the Consolidated Fund under management of the BTI. The BTI provides a business-type activity that charges fees on a cost-reimbursement basis and is shown in the separate proprietary fund financial statements. Investment activities of the Consolidated Fund are shown in the separate fiduciary fund financial statements.

The West Virginia State Treasurer's Office provides direct administrative and management services to the BTI. The BTI does not directly employ staff but reimburses the Treasurer's Office for all personnel expenses of Treasury employees assigned to administer and manage the BTI. The Treasurer's Office also provides various supplementary administrative services. A five-member Board of Directors governs the BTI. The State Governor, State Treasurer, and State Auditor serve as ex officio members of the Board. The Governor appoints the two remaining members subject to the advice and consent of the State Senate. Of the two members appointed by the Governor, one is required to be a certified public accountant and one is required to be an attorney, with both having experience in finance, investing and management. The State Treasurer is Chairman of the Board.

The Consolidated Fund provides for the investment of moneys not currently needed to fund state governmental operations, as well as providing the opportunity for local governments to participate in large investment pools, and for those funds statutorily required to be invested in the Consolidated Fund. The following investment pools and accounts make up the Consolidated Fund:

WV Money Market Pool – This pool consists of the operating funds of the State, funds held by State agencies, and funds from local governments who desire the opportunity to invest with the State. Its purpose is to provide for the investment of all surplus funds and to supply the daily cash needs of the State. The pool is co-managed by Federated Hermes and UBS Asset Management (Americas).

WV Government Money Market Pool – This pool consists of State agency and local government investors who wish to invest in a pool that restricts its investments to U.S. Government Obligations, U.S. Government Agency Obligations, or repurchase agreements backed by U.S. Government and Agency Obligations. The pool is managed by UBS Asset Management (Americas).

WV Short Term Bond Pool – This pool consists of the operating funds of the State that are not needed immediately to fund the State's liquidity requirements. The pool is managed by Sterling Capital Management.

Loan Pool – This account is composed of intergovernmental loans made by the Consolidated Fund to other state agencies. There are two loan programs authorized by statute that are accounted for in the Loan Pool: the WVEDA Broadband Loan and the WVDOT Infrastructure Investment Revolving Loan. The State is the sole participant in the account.

Participant Directed Accounts – The BTI also maintains accounts for individual State agencies with specific investment needs. These accounts are collectively referred to as Participant Directed Accounts and include the following: West Virginia Term Deposit Account and School Fund. Each agency is the sole owner of its account and is responsible for providing the BTI with investment guidelines that are consistent with the legal restrictions applicable to the assets in the account. The BTI manages these accounts in accordance with the accounts' investment guidelines and directions from the account owners.

The BTI is authorized by West Virginia Code Chapter 12, Article 6C, Section 9, to invest in United States government and agency obligations, commercial paper, corporate bonds, repurchase agreements, asset-backed securities, loans approved by the Legislature, and any other programs authorized by the Legislature. In addition to the restrictions in investment types, at no time shall more than seventy-five percent of the Consolidated Fund be invested in any bond, note, debenture, commercial paper or other evidence of indebtedness of any private corporation or association and at no time shall more than five percent be invested in securities issued by a single private corporation or association.

2. Significant Accounting Policies

Basis of Accounting

The financial statements of the BTI are reported using the economic resources measurement focus and the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America. Under this method of accounting, revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

An internal service fund, which is a type of proprietary fund, is used to account for investment management services provided by the BTI on a cost-reimbursement basis. An investment trust fund, which is a type of fiduciary fund, is used to account for each of the investment pools and accounts of the Consolidated Fund. At year-end, the Consolidated Fund is composed of three external investment pools (WV Money Market, WV Government Money Market, and WV Short Term Bond), one special-purpose investment account (Loan), and two individual investment accounts (WV Term Deposit and School Fund).

Budgetary Information

The Board's annual operating budget is appropriated by the Legislature from fees collected by the BTI.

Cash Equivalents

Cash equivalents are short-term investments with maturities when acquired of 90 days or less.

Capital Assets

Capital asset expenditures of $1,000 ($500 in the case of certain computer equipment) or more with a useful life greater than one year are capitalized at cost and reported net of accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The estimated useful lives are three years.

Wages, Compensated Absences, Retirement Plan and Other Postemployment Benefits

The BTI has no employees. The State Treasurer's Office provides administrative and management services to the BTI. As a result, the BTI does not accrue for compensated absences and other postemployment benefits or directly contribute to the state retirement plan. Management services provided are recorded as management fees paid to the State Treasurer's Office.

Income Taxes

The BTI is a public corporation organized under laws of the State of West Virginia and, as such, is exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the BTI is not subject to federal or state income taxes.

Revenues and Expenses – Proprietary Fund

Operating revenues of the BTI's proprietary fund are generated from services provided to the investment pools and accounts of the Consolidated Fund. Revenues of the proprietary fund also are derived from vendor fees charged directly to the investment pools and accounts and paid by the proprietary fund, such as investment advisor fees and custodian fees. Operating expenses of the proprietary fund represent payments for services provided under contract, such as investment advisors and consultants, fiduciary bond fees, and custodian fees; general and administrative expenses of the BTI, such as administrative and management services, trustee fees, office equipment, office supplies, and office space; and depreciation of capital assets. Revenues and expenses are recorded when earned and incurred in accordance with the economic resources measurement focus and the accrual basis of accounting.

Net Position – Proprietary Fund

The net position of the BTI's proprietary fund is composed of net investment in capital assets and unrestricted net position, which represent net position not restricted to use by legal, contractual or enabling legislation constraints.

Use of Estimates

Certain estimates and assumptions are required by management in the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America. Actual results could differ significantly from those estimates. The significant estimates and assumptions that affect the reporting of amounts of assets and liabilities at the statement of financial position date and revenues and expenses for the year then ended are those required in the determination of the allowance for loan losses and amortization of investments. Actual results in the near term could differ from the estimates used to prepare these financial statements.

Investment Accounting

Investment Carrying Value The BTI is an investment vehicle of the State, its component units, and local governments, all of which are government entities. The investments of the WV Money Market Pool, WV Government Money Market Pool, WV Term Deposit Account, and Loan Pool account are carried at amortized cost, as permissible under Governmental Accounting Standards Board ("GASB") Statement No. 31, as amended by GASB Statement Nos. 72 and 79. The WV Money Market and WV Government Money Market Pools measure all investments at amortized cost for financial reporting purposes in accordance with criteria established in GASB Statement No. 79. The criteria specify that the pools must transact with their participants at a stable net asset value per share and meet requirements for portfolio maturity, portfolio quality, portfolio diversification, portfolio liquidity, and shadow pricing. The BTI does not place any limitations or restrictions on participant withdrawals from the WV Money Market and WV Government Money Market pools, such as redemption notice periods, maximum transaction amounts, nor possess authority to impose liquidity fees or redemption gates.

The specific exceptions to fair value reporting for the other accounts referred to above are defined in professional standards as follows. The WV Term Deposit Account contains nonnegotiable time deposit accounts, which are nonparticipating interest-earning investment contracts. The Loan Pool contains loans receivable arising from lending activities of economic development authorities.

The investments of the remaining pool and participant accounts are reported at fair value, which is determined by third party pricing services based on asset portfolio pricing models and other sources. The BTI measures fair value at the end of each month. See Note 5 for a discussion and summary of the measurement of fair values. Investments in commingled investment pools are valued at the reported unit values of the individual funds. Commissions on the purchases of securities by the BTI are a component of the security price quoted by the seller and are included in the investment cost.

Repurchase Agreements The BTI uses only tri-party repurchase agreements. Under the terms of a tri-party repurchase agreement, the seller transfers collateral securities to an account of the BTI's manager/agent at the seller's custodian bank. This arrangement perfects the BTI's lien on the collateral and effectively protects the BTI from a default by the seller. The BTI requires sellers in repurchase transactions to pledge collateral of at least 102% of the cash borrowed from the BTI. If the seller defaults and the fair value of the collateral declines, realization of the collateral by the BTI may be delayed or limited.

Asset-Backed Securities Certain pools invest in various asset-backed securities and structured corporate debt. The pools invest in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and fair value of the underlying assets.

Investment Transactions Investment transactions are accounted for on a trade date basis.

Investment Gains and Losses Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income Interest income is recognized as earned on the accrual method.

Dividend Income Dividend income is recognized on the ex-dividend date.

Amortization Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. The effect of changing prepayment assumptions is reported in the Combined Statement of Changes in Fiduciary Net Position in the year of the change.

Allowance for Loan Losses The allowance for loan losses is available to absorb future loan losses. The allowance is increased by provisions charged against operations and reduced by charge-offs (losses), net of recoveries. The provision is based on several factors including: analytical reviews of loan loss experience in relationship to outstanding loans; a continuing review of problem loans and overall portfolio quality, including analysis of the quality of the underlying collateral; and management's judgment on the impact of current and expected economic conditions on the portfolio. At June 30, 2026, the Loan Pool had no allowance for uncollectible loans.

Distributions to Participants The net income of the WV Money Market and WV Government Money Market Pools are declared as dividends and distributed daily to the participants based upon their pro rata participation in the pools. The distributions of net investment income are credited to the participants' accounts in the form of dividend reinvestments in the Pools and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Fiduciary Net Position.

The monthly net income of the WV Short Term Bond Pool is declared as a dividend on the last day of the month and distributed to the participants in the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Fiduciary Net Position.

Expenses Each pool is charged for its direct investment-related cost and for its allocated share of other expenses. The other expenses are allocated to the pools based on asset size. Certain pools are not charged expenses or are charged a reduced expense. The BTI proprietary fund pays all expenses on behalf of the pools and is subsequently reimbursed by the pools.

Subsequent Events

Subsequent events have been evaluated through the independent auditor's report date, which is the date the financial statements were available to be issued.

3. Cash and Cash Equivalents

The proprietary fund's cash on deposit with the State Treasurer's Office was approximately $1,923,000 at June 30, 2026. The cash is pooled with other deposits from the State's agencies, departments, boards and commissions and is subject to coverage by the Federal Deposit Insurance Corporation ("FDIC") or collateralized by securities held by the State or its agents in the State's name. Cash equivalents are short-term, highly liquid investments having original maturities of 90 days or less. The proprietary fund did not hold any cash equivalents at June 30, 2026.

Custodial credit risk of cash deposits is the risk that in the event of failure of a depository financial institution, a government will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The BTI does not have a deposit policy for custodial credit risk. BTI management does not believe any of its proprietary fund's deposits are exposed to custodial credit risk.

4. Investments and Deposits

The BTI has adopted an investment policy in accordance with the "Uniform Prudent Investor Act." The "prudent investor rule" guides those with responsibility for investing the money for others. Such fiduciaries must act as a prudent person would be expected to act, with discretion and intelligence, to seek reasonable income, preserve capital, and, in general, avoid speculative investments. The BTI's investment policy is to invest assets in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity. The BTI recognizes that risk, volatility, and the possibility of loss in purchasing power are present to some degree in all types of investments. Due to the short-term nature of the Consolidated Fund, the BTI believes that it is imperative to review and adjust the investment policy in reaction to interest rate market fluctuations/trends on a regular basis and has adopted a formal review schedule. Investment policies have been established for each investment pool and account of the Consolidated Fund.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Two of the BTI's pools, the WV Money Market and WV Government Money Market Pools, have been rated AAAm by Standard & Poor's. A fund rated AAAm has extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit, market, and/or liquidity risks. AAAm is the highest principal stability fund rating assigned by Standard & Poor's. Neither the BTI itself nor any other Consolidated Fund pool or account has been rated for credit risk by any organization. Of the Consolidated Fund pools and accounts, six are subject to credit risk: WV Money Market Pool, WV Government Money Market Pool, WV Short Term Bond Pool, WV Term Deposit Account, Loan Pool, and School Fund Account.

The BTI limits the exposure to credit risk in the WV Money Market Pool by requiring all long-term corporate debt be rated A+ or higher by Standard & Poor's (or its equivalent) and short-term corporate debt be rated at A-1 or higher by Standard & Poor's (or its equivalent). The following table provides information on the credit ratings of the WV Money Market Pool's investments (in thousands):

Security Type	Rating	Carrying Value (in Thousands)	Percent of Pool Assets
Commercial Paper	A-1+	$ 3,617,649	44.37%
	A-1	2,475,863	30.37
Negotiable certificates of deposit	A-1+	299,300	3.67
	A-1	757,000	9.29
Money market funds	AAAm	2,885	0.04
Repurchase agreements (underlying securities):			
U.S. Treasury bonds and notes*	AA+	120,074	1.47
U.S. Agency bonds and notes	AA+	879,926	10.79
		$ 8,152,697	100.00%

* U.S. Treasury issues are explicitly guaranteed by the United States government and are not considered to have credit risk.

The BTI limits the exposure to credit risk in the WV Government Money Market Pool by limiting the Pool to U.S. Treasury issues, U.S. government agency issues, money market funds investing in U.S. Treasury issues and U.S. government agency issues, and repurchase agreements collateralized by U.S. Treasury issues and U.S. government agency issues. The following table provides information on the credit ratings of the WV Government Money Market Pool's investments (in thousands):

Security Type	Rating	Carrying Value (in Thousands)	Percent of Pool Assets
U.S. Treasury notes *	AA+	$ 27,998	5.00%
U.S. Treasury bills *	A-1+	201,162	35.95
U.S. agency bonds and notes	AA+	81,000	14.48
U.S. agency discount notes	AA+	143,297	25.61
Money market funds	AAAm	112	0.02
Repurchase agreements (underlying securities):			
U.S. Treasury bonds and notes*	AA+	45,914	8.21
U.S. Agency bonds and notes	AA+	60,086	10.74
		$ 559,569	100.00%

* U.S. Treasury issues are explicitly guaranteed by the United States government and are not considered to have credit risk.

The BTI limits the exposure to credit risk in the WV Short Term Bond Pool by requiring all long-term corporate debt be rated BBB- or higher by Standard & Poor's (or its equivalent) and all short-term corporate debt be rated A-1 or higher by Standard & Poor's (or its equivalent). Mortgage-backed and asset-backed securities must be rated AAA by Standard & Poor's (or its equivalent). The following table provides information on the credit ratings of the WV Short Term Bond Pool's investments (in thousands):

Security Type	Rating	Carrying Value (in Thousands)	Percent of Pool Assets
U.S. Treasury notes *	AA+	$ 80,322	10.86%
U.S. agency collateralized mortgage obligations			
U.S. government guaranteed*	AA+	1,251	0.16
Non-U.S. government guaranteed	AA+	483	0.07
Corporate bonds and notes	AA+	9,654	1.31
	AA	8,246	1.12
	AA-	29,169	3.94
	A+	27,919	3.78
	A	84,452	11.42
	A-	108,843	14.72
	BBB+	63,674	8.61
	BBB	71,033	9.61
	BBB-	35,133	4.75
	NR	13,326	1.80
Commercial Mortgage-Backed Securities	AAA	24,287	3.28
	NR	4,851	0.66
Municipal Securities	AAA	2,597	0.34
	AA	1,668	0.23
	AA-	796	0.11
	A	2,204	0.30
Asset-backed securities	AAA	79,516	10.75
	NR	83,425	11.28
Money market funds	AAAm	6,648	0.90
		$ 739,497	100.00%

NR = Not Rated. Securities are not rated by Standard & Poor's but are rated by Moody's, and/or Fitch.

* U.S. Treasury issues and securities explicitly guaranteed by the United States government are not considered to have credit risk.

The Loan Pool is composed of loans made by the State. The account holds intergovernmental loans and an investment in a government money market mutual fund of approximately $36,000. The mutual fund is rated AAAm by Standard & Poor's. The loans are not rated; however, because there is the potential for defaults on the loans, the account is subject to credit risk related to the loans. The BTI addresses this credit risk by establishing and regularly evaluating a reserve for uncollectible loans.

The WV Term Deposit Account is composed of term deposit accounts in state depositories. The account also holds an interest in a government money market mutual fund valued at approximately $50,000. The mutual fund is rated AAAm by Standard & Poor's. The term deposit accounts are not rated. The BTI addresses credit risk, with respect to depository accounts, by requiring balances in excess of insurance coverage provided by an agency of the federal government be collateralized in accordance with West Virginia Code. The BTI does not have a policy specifically addressing credit risk of other investments in WV Term Deposit Account.

The School Fund Account holds only an interest in a government money market mutual fund valued at approximately $1,032,000. The mutual fund is rated AAAm by Standard & Poor's. The BTI does not have a policy specifically addressing credit risk in the School Fund Account.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. All Consolidated Fund pools and accounts are subject to interest rate risk.

The overall weighted average maturity of the investments of the WV Money Market Pool cannot exceed 60 days. Maximum maturity of individual securities cannot exceed 397 days from date of purchase, except for government floating rate notes, which can be up to 762 days. The following table provides information on the weighted average maturities for the various asset types in the WV Money Market Pool:

Security Type	Carrying Value (In Thousands)	WAM (Days)
Commercial paper	$ 6,093,512	46
Negotiable certificates of deposit	1,056,300	90
Repurchase agreements	1,000,000	1
Money market funds	2,885	1
	$ 8,152,697	46

The overall weighted average maturity of the investments of the WV Government Money Market Pool cannot exceed 60 days. Maximum maturity of individual securities cannot exceed 397 days from date of purchase, except for government floating rate notes, which can be up to 762 days. The following table provides information on the weighted average maturities for the various asset types in the WV Government Money Market Pool:

Security Type	Carrying Value (In Thousands)	WAM (Days)
U.S. Treasury notes	$ 27,998	1
U.S. Treasury bills	201,162	90
U.S. agency bonds and notes	81,000	1
U.S. agency discount notes	143,297	50
Repurchase agreements	106,000	1
Money market funds	112	1
	$ 559,569	45

The overall effective duration of the investments of the WV Short Term Bond Pool is limited to a +/- 30 percent band around the effective duration of the portfolio's benchmark (the ICE BofAML 1-3 US Corporate & Government Index). As of June 30, 2026, the effective duration of the benchmark was 672 days. Maximum effective duration of individual securities cannot exceed 1,827 days (five years) from date of purchase. The following table provides information on the effective duration for the various asset types in the WV Short Term Bond Pool:

Security Type	Carrying Value (In Thousands)	Effective Duration (Days)
U.S. Treasury notes	$ 80,322	667
U.S. agency collateralized mortgage obligations	1,734	23
Corporate bonds and notes – fixed-rate	451,449	732
Commercial mortgage-backed securities	29,138	752
Municipal Securities	7,265	579
Asset-backed securities	162,941	494
Money market funds	6,648	-
	$ 739,497	664

The Loan Pool holds an interest in a government money market mutual fund valued at approximately $36,000 with a weighted average maturity of one day. The BTI's policy does not specifically address maturity restrictions as a means of managing exposure to fair value losses in this account arising from increasing interest rates.

The WV Term Deposit Account maintains funds totaling approximately $40,233,000 in bank depository accounts and holds an interest in a government money market mutual fund valued at approximately $50,000 with a weighted average maturity of one day. The BTI's policy does not specifically address maturity restrictions as a means of managing exposure to fair value losses in this account arising from increasing interest rates.

The School Fund Account holds only an interest in a government money market mutual fund valued at approximately $1,032,000 with a weighted average maturity of one day. The BTI's policy does not specifically address maturity restrictions as a means of managing exposure to fair value losses in this account arising from increasing interest rates.

Other Risks of Investing

Other risks of investing can include concentration of credit risk, custodial credit risk, and foreign currency risk.

Concentration of credit risk is the risk of loss attributed to the magnitude of a Consolidated Fund pool or account's investment in a single corporate issuer. The BTI investment policy prohibits those pools and accounts permitted to hold corporate securities from investing more than 5% of their assets in any one corporate name or one corporate issue.

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the BTI will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. Repurchase agreements are required to be collateralized by at least 102% of their value, and the collateral is held in the name of the BTI. The BTI or its agent does not release cash or securities until the counterparty delivers its side of the transaction.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. None of the Consolidated Fund's investment pools or accounts holds interests in foreign currency or interests valued in foreign currency.

Deposits

Custodial credit risk of deposits is the risk that in the event of failure of a depository financial institution, a government will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. Deposits include nonnegotiable certificates of deposit. The WV Term Deposit Account contains term deposit accounts valued at approximately $40,233,000. The BTI does not have a deposit policy for custodial credit risk.

5. Investments Measured at Fair Value

The BTI measures the WV Short Term Bond Pool and the School Fund Account at fair value for financial reporting purposes. Certain investments of the State Loan Pool and WV Term Deposit Account, such as investments in government money market funds, are also measured at fair value for financial reporting purposes. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is a market-based measurement, not an entity-specific measurement. The BTI categorizes fair value measurements within the fair value hierarchy established by accounting principles generally accepted in the United States of America.

The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels as follows:

> Level 1 inputs – Quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date.
>
> Level 2 inputs – Inputs – other than quoted prices included within Level 1 – that are observable for an asset or liability, either directly or indirectly.
>
> Level 3 inputs – Unobservable inputs for an asset or liability.

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

The following table summarizes the recurring fair value measurements of the investment securities in the WV Short Term Bond Pool in accordance with the fair value hierarchy levels as of June 30, 2026 (in thousands):

Investment Type	Level 1	Level 2	Level 3	Total
U.S. Treasury notes	$ 80,322	$ -	$ -	$ 80,322
U.S. agency collateralized mortgage obligations	-	1,734	-	1,734
Corporate bonds and notes – fixed-rate	-	451,449	-	451,449
Commercial mortgage-backed securities	-	29,138	-	29,138
Municipal Securities	-	7,265	-	7,265
Asset-backed securities	-	162,941	-	162,941
Money market funds	6,648	-	-	6,648
	$ 86,970	$ 652,527	$ -	$ 739,497

The valuation methodologies and inputs presented below are used in the fair value measurements for investments in securities in the WV Short Term Bond Pool classified as Level 2 in the preceding table.

U.S. Agency Collateralized Mortgage Obligations

Level 2 U.S. agency collateralized mortgage obligations are evaluated using predicted cash flows, adjusted by an applicable spread/yield/price adjustment incorporating benchmark yields, collateral performance, and prevailing market conditions.

Corporate Fixed-Rate Bonds and Notes

Level 2 corporate fixed-rate bonds and notes are priced using spread, yield and price-based evaluations. For spread- and yield-based evaluations, a bullet (non-call) spread scale is created for relevant maturities for each issuer. The spreads are based on the new issue market, secondary trading and dealer quotes. For price-based evaluations, evaluators use recently executed transactions of similar securities and dealer quotes to arrive at appropriate pricing.

Corporate Floating-Rate Bonds and Notes

Level 2 corporate floating-rate bonds are evaluated by calculating current and future coupons, then discounting each cash flow by an appropriate discount margin. A basic yield scale covering a range of quality ratings and maturities is established for the corresponding indices. The yield scale consists of discount margins obtained from primary and secondary dealers in the new issue market. Final yields are calculated by adding the appropriate discount margin to each forward rate plus special adjustments to capture issue-specific characteristics, as applicable. The resulting yields are then used to discount each expected cash flow.

Commercial Mortgage-Backed Securities

Level 2 commercial mortgage-backed securities are evaluated using predicted cash flows, adjusted by an applicable spread/yield/price adjustment incorporating benchmark yields, collateral performance, third-party real estate analysis, and prevailing market conditions.

Municipal Securities

Level 2 municipal securities are evaluated based on factors such as trading activity reported through the Municipal Securities Rulemaking Board's Real-time Transaction Reporting System, levels on bellwether issues, established trading spreads between similar issuers or credits, historical trading spreads over widely accepted market benchmarks, new issue scales and other relevant market data.

Asset-Backed Securities

Level 2 asset-backed securities are evaluated using predicted cash flows, adjusted by an applicable spread/yield/price adjustment incorporating benchmark yields, collateral performance, and prevailing market conditions.

The State Loan Pool holds a government money market fund reported at a fair value of $36,000 using Level 1 inputs.

The West Virginia Term Deposit Account holds a government money market fund reported at a fair value of $50,000 using level 1 inputs.

The School Fund Account holds a government money market fund reported at a fair value of $1,032,000 using Level 1 inputs.

6. Capital Assets

Capital asset activity in the proprietary fund was as follows (in thousands):

	June 30, 2025	Increases	Decreases	June 30, 2026
Equipment, at cost	$ 20	$ 3	$ 2	$ 21
Accumulated depreciation	(16)	(3)	(2)	(17)
Equipment, net of accumulated depreciation	$ 4	$ -	$ -	$ 4

7. Related Party Transactions

Intergovernmental Investments

The BTI is required by law to enter into certain investment transactions with other state entities. At June 30, 2026, the BTI's intergovernmental investments, which are assets of the Loan Pool, included the following:

a. The "WVEDA Broadband Loan" represents an obligation of the WVEDA. Under the statutory provisions governing the loan program, the BTI is required to make available to the WVEDA, from the Consolidated Fund, up to $80 million to insure the payment or repayment of any debt entered into by an entity for purposes of expanding broadband services to unserved and underserved areas of the state. The loan is structured as a non-recourse, revolving loan that is payable by the WVEDA solely from moneys received in respect to the insured debt instruments. The WVEDA may not insure more than $20 million per entity in one calendar year. The loan has a variable rate equal to the 12-month average yield on the WV Money Market Pool. The rate resets quarterly and the maximum annual adjustment may not exceed 1.00%. Since the rate reset for the quarter ending September 30, 2025, exceeded 1.00%, and the maximum annual adjustment may not exceed 1.00%, the rate did not change during the remainder of the fiscal year. The annualized rate for fiscal year

2026 was 4.28%. The WVEDA is required to make quarterly payments to pay all accrued interest on the loan for the prior quarter. On a quarterly basis, the WVEDA determines the outstanding balance of the insured debt covered by the loan and adjusts the outstanding balance of the loan to equal the outstanding balance of the insured debt. At June 30, 2026, the outstanding balance was $70,324,000.

As of June 30, 2026, the WVEDA has provided the BTI with Notices of Intent to Request Advance (the "Notices") indicating that the WVEDA has committed to provide insurance for broadband expansion related debt instruments totaling $77,376,000. The loan insurance commitments cover thirteen broadband expansion related debt instruments for five separate broadband service providers. The WVBTI has transferred $70,324,000 to the WVEDA for outstanding balances on insured debt instruments. The remaining $7,052,000 committed for loan insurance is held by the West Virginia State Treasurer's Office in an account in the West Virginia Money Market Pool. As of June 30, 2026, the insured debt instruments are in good standing and the likelihood of a default appears remote.

b. The "WVDOT Infrastructure Investment Revolving Loan" represents an obligation of the West Virginia Department of Transportation (the "WVDOT"). During the 2022 2nd Special Session, the Legislature passed Senate Bill 2001. Under the provisions of Senate Bill 2001, the BTI is required to make available to the WVDOT, from the Consolidated Fund, up to $200 million for deposit in the Infrastructure Investment Reimbursement Fund (the "Reimbursement Fund"). The WVDOT may make payment of expenses from the Reimbursement Fund that are eligible for cost reimbursement according to an agreement with the federal government pursuant to the Infrastructure Investment and Jobs Act. Reimbursements received by the WVDOT from the federal government are required to be deposited in the Fund. Any balance remaining in the Fund at the end of the fiscal year is required to be transferred back to the Consolidated Fund. Loans made to the WVDOT under this loan program will bear no interest. The loan program will terminate on June 30, 2027. By this date, 100 percent of any expenditures made from the Fund must be repaid. As of June 30, 2026, there is no outstanding balance in this loan program.

Transactions with State Treasurer's Office

The State Treasurer's Office provides various services to the BTI, some of which are reimbursed by the BTI, and others of which the Treasurer provides at no cost to the BTI. During the year ended June 30, 2026, the BTI reimbursed the Treasurer's Office $782,000 for services, which includes $717,000 for management services provided by Treasurer's Office employees. As of June 30, 2026, the BTI had an amount payable to the Treasurer's Office totaling $59,000, of which $56,000 was for management services provided by Treasurer's Office employees. Also, during the year, the Treasurer's Office provided legal and information technology support services valued at approximately $20,000 at no cost to the BTI.

8. Risk Management

The BTI is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters.

Board members are covered by a $5 million blanket bond and general liability and property coverage of $1 million per occurrence through the West Virginia State Board of Risk and Insurance Management ("BRIM"). The BTI has obtained additional coverage of $5 million faithful performance bond through an outside underwriter. There have been no claims since the inception of the BTI.

9. Effect of New Accounting Pronouncements

Adopted Pronouncements

The GASB has issued a statement to improve key components of the financial reporting model: Statement No. 103, Financial Reporting Model Improvements. The objective of Statement 103 is to enhance the effectiveness of the financial reporting model in providing information that is essential for decision making and to address certain applications issues identified by the GASB. The requirements of this statement take effect for financial statements starting with the fiscal year that ends June 30, 2026. Apart from the required revisions to the Management Discussion and Analysis, the adoption of this standard did not have a material impact on the financial statements.

The GASB has issued a statement to improve reporting on capital assets: Statement No. 104, Disclosure of Certain Capital Assets. The objective of Statement 104 is to provide users of government financial statements with essential information about certain types of capital assets in order to make informed decisions and assess accountability. The requirements of this statement take effect for financial statements starting with the fiscal year that ends June 30, 2026. The adoption of this standard did not have a material impact on the financial statements.

The GASB has issued an implementation guide: Implementation Guide 2025-1. The objective of the implementation guide is to provide guidance that clarifies, explains, or elaborates on GASB Statements. The requirements of this statement take effect for financial statements starting with the fiscal year that ends June 30, 2026. The adoption of this implementation guide did not have a material impact on the financial statements.

Pending Pronouncements

The GASB has issued a statement to improve financial reporting requirements for subsequent events: Statement No. 105, Subsequent Events. The objective of Statement 105 is to improve the financial reporting requirements for subsequent events, thereby enhancing consistency in their application and better meeting the information needs of financial statement users. The provisions of this statement are effective for reporting periods beginning after June 15, 2026. BTI management has not determined the effect, if any, this statement will have on its financial statements.

Investment Section

Consolidated Fund Overview at June 30, 2026

Investment Philosophy: It is the investment philosophy of the Board of Treasury Investments (the "BTI") to invest assets in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity.

Investment Objectives: It is the investment objective of the BTI to provide focused investment services for the Consolidated Fund, reduce costs for and increase returns to its participants.

Total Net Position at June 30, 2026: $ 9,549,642,000.

Description of the Consolidated Fund: The Consolidated Fund under the management of the BTI consisted of six investment pools and single participant accounts during the year. The 2005 West Virginia Legislature established the BTI, effective July 8, 2005, as a public corporation of the State of West Virginia to make short-term operating funds of the state more accessible to state government. The BTI employs a top-down approach to developing its investment strategy for the management of its funds. Starting with the objectives of the fund, the BTI considers constraints outlined in its investment policy, which includes among other parameters: safety, liquidity, and maximization of rate of return. The Investment Policy is summarized on Pages 82-87 of this Investment Section.

The Consolidated Fund provides for the investment of moneys not currently needed to fund state governmental operations, as well as providing the opportunity for local governments to participate in large investment pools, and for those funds statutorily required to be invested in the Consolidated Fund. The Consolidated Fund pools and accounts are described in detail following this overview.

Expense Ratios: The Board annually adopts a budget and fee schedule, which describes how fees are charged to each pool and account. The fees charged to the Consolidated Fund are categorized into direct or indirect expenses as follows:

(a). Direct Expenses - All investment advisor and custodian expenses will be charged directly to the pools and accounts as they are incurred.

(b). Indirect Expenses - All indirect expenses such as insurance, staff costs, investment consultant fees, and rent shall be allocated based upon the percentage of net position under management.

Expense ratios for the pools and accounts are detailed in Table 2: Financial Highlights on Page 94 in the Statistical Section.

Basis of Presentation: Rates of return use a time-weighted rate of return methodology based upon fair values.

Economic Environment: U.S. economic growth was estimated at 2.7% for the fiscal year. Inflation rose during the fiscal year with the Consumer Price Index ("CPI") rising from 2.7% at the end of fiscal year 2025 to 3.5% year-over-year in June 2026. The FOMC was active early in the fiscal year, cutting rates by 75 basis points over their last three meetings of calendar year 2025. After the last rate action in December 2025, markets had priced in one to two more rate cuts over calendar year 2026. A resurgence in inflation in early calendar year 2026 due to energy shocks from the conflict in the Middle East reversed these

expectations. By the end of the fiscal year, markets were pricing in one rate hike over the last half of calendar year 2026.

Although the Fed cut rates 75 basis points over the first half of the fiscal year, a resurgence in inflation from the war in the Middle East as well as growing concerns about problems in private credit markets and heavy AI-related infrastructure debt issuance weighed on US bond markets. The returns for the U.S. bond market, as measured by the Bloomberg US Aggregate Bond Index, were significantly lower than fiscal year 2025's return of 6.08%. For the fiscal year, the overall bond market turned in an annual return of 3.83% for fiscal year 2026. Domestically, equity market returns rose from fiscal year 2025 levels. The broad U.S. equity market, as measured by the Russell 3000 index, returned 22.87% for fiscal year 2026, which was an improvement over fiscal year 2025's return of 15.30%. Emerging markets equity performance jumped significantly from fiscal year 2025 levels. Foreign equity returns, as measured by the MSCI Emerging Markets Index, posted a return of 43.35% for the fiscal year versus fiscal year 2025's return of 15.29%. Commodity markets surged ahead in 2026, driven by increases in energy costs and rising precious and base metal costs. For fiscal year 2025, commodity market performance, as measured by the S&P GSCI Total Return Index, came in at 30.12%, well above fiscal year 2025's return of 0.25%.

Pool and Account Overviews: The following pages present overviews of the investment pools and accounts of the Consolidated Fund.

The reports on the investment activities of each pool and account are prepared by staff of the BTI with assistance from pool and account managers and the BTI's investment consultant.

The Schedule of Investments in Securities is presented in the Financial Section on Pages 48-59, and Participant Net Asset Values are presented in the Statistical Section on Page 102.

West Virginia Money Market Pool

❑ Investment Objectives and Policy Guidelines

Objectives

The West Virginia Money Market Pool was created to invest participants' operating funds. The objective of the pool is to maintain sufficient liquidity to meet the daily disbursements of participants while striving to earn a return above inflation. The pool is structured as a money market fund with the goal of preservation of principal. The pool risk factor is low, and the pool is managed under numerous maturity restrictions, diversification guidelines, and credit limits.

Participants include state agencies and local governments throughout the state.

Benchmarks

The performance of the West Virginia Money Market Pool (net of external investment manager fees) will be measured against iMoneyNet First Tier Retail Average. Prior to July 15, 2021, performance was measured against a blended benchmark composed of 15% iMoneyNet Treasury & Repo Institutional Average + 85% iMoneyNet First Tier Institutional Average.

Investment Managers

The West Virginia Money Market Pool is managed by Federated Hermes and UBS Asset Management (Americas).

Maturity Restrictions, Diversification Guidelines and Credit Limits

All restrictions are based upon total dollar percentages of pool holdings using an amortized cost basis. Securities that fall out of compliance may be held to maturity based upon recommendation of the investment manager and investment consultant. The Board may require the investment manager to sell non-compliant securities. Where noted, the date of purchase shall mean the settlement date.

- Weighted average maturity of the West Virginia Money Market Pool shall not exceed 60 days.
- Weighted average final maturity of the pool shall not exceed 90 days.
- Maximum maturity of individual securities cannot exceed 397 days from the date of purchase except for certain variable rate and floating rate U.S. Government securities.
- Variable rate and floating rate securities shall be based on a money market index and shall not have a final maturity longer than 762 days if they are U.S. Government securities, or 397 days if they are not U.S. Government securities.
- Repurchase agreements must comply with the requirements of the Repurchase Agreement Policy.
- Money market funds utilized by the pool must be approved in advance by the Board.
- Maximum 5% of the pool may be invested in any one corporate name.
- Maximum 5% of the pool may be invested in any one supranational name.
- Maximum exposure in money market funds is limited to 10% of any individual rated fund at the pool level. The aggregate exposure at the pool level may not exceed 30%.
- Maximum 75% of the pool may be invested in notes with floating rates.
- All corporate securities must be rated A+ or higher (or its equivalent) if long term and A-1 or higher (or its equivalent) if short term.

- All supranational securities must be rated AA or higher (or its equivalent) if long term and A-1 or higher (or its equivalent) if short term.
- Maximum 15% of the Pool may be invested in U.S. dollar denominated Euro Commercial Paper, Euro Certificates of Deposit, and Euro Time Deposits. Investments in U.S. dollar denominated Euro securities are subject to other policy requirements applicable to the specific investment type.
- Maximum of 20% of the pool may be invested in asset-backed and mortgage-backed securities. Asset-backed commercial paper is not considered an asset-backed security under this limitation.
- Non-government asset-backed and mortgage-backed securities must be rated AAA (or its equivalent).
- Asset-backed commercial paper programs that are eligible for purchase should be fully or partially supported programs that provide adequate diversification by asset type (trade receivables, credit card receivables, auto loans, etc.)
- The pool may not hold inverse floaters.
- The pool may not be leveraged in any manner.
- The pool may not hold unregistered securities or private placements with the exception of securities issued pursuant to the SEC Rule 144A and commercial paper issued pursuant to Rule 4(2) of the Securities Act of 1933.
- The pool shall not acquire any illiquid security if, after acquisition, more than 5% of the pool would be invested in illiquid securities.
- The pool shall not acquire any other security other than daily liquid assets if the fund would have less than 10% of its total assets in daily liquid assets.
- The pool shall not acquire any other security other than weekly liquid assets if the fund would have less than 30% of its total assets in weekly liquid assets.
- If the pool is rated by a nationally recognized statistical rating organization ("NRSRO"), each investment manager is required to comply with any additional maturity, concentration, credit or other restrictions or requirements of the NRSRO for maintenance of the rating.

❑ BTI Role

The role of the BTI for the West Virginia Money Market Pool is as follows:

- Develop investment guidelines.
- Select and oversee investment managers.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Distribute daily earnings to participants.
- Calculate monthly net income and net asset value.
- Prepare monthly a statement of net position, a statement of changes in net position, and a detailed list of securities.

❑ Income Allocation

Net investment income and realized gains and losses are declared as dividends and distributed daily to the participants. If the pool incurs an extraordinary loss and distributing the loss would decrease the share value below one dollar ($1), the Investment Committee will be notified immediately for development of an action plan.

❑ Asset Allocation – Permissible vs. Actual

Permissible Allocation		Actual Allocation June 30, 2026

Manager returns are net of manager fees.
Total pool returns are net of all fees.

❑ Investments

For a detailed list of investments in the West Virginia Money Market Pool, see the Schedule of Investments in Securities in the Supplementary Information on Pages 48-52.

West Virginia Government Money Market Pool

❑ Investment Objectives and Policy Guidelines

Objectives

The West Virginia Government Money Market Pool was created to invest restricted moneys of participants in U.S. Treasury and U.S. government agency obligations. The investment objective of the pool is to preserve capital and maintain sufficient liquidity to meet the daily disbursement needs of participants, while striving to earn a return above inflation. The pool is structured as a money market fund with an emphasis on maintaining a stable dollar value. The risk factor on this pool is low and managed through maturity restrictions. The default risk is minimal due to the types of securities held.

Participants include state agencies and local governments throughout the state.

Benchmarks

The performance of the West Virginia Government Money Market Pool (net of external investment manager fees) will be measured against the iMoneyNet Government & Agencies Institutional Average. Prior to July 15, 2021, performance was measured against a blended benchmark composed of 15% iMoneyNet Treasury & Repo Institutional Average + 85% iMoneyNet Government & Agencies Institutional Average.

Investment Manager

The West Virginia Government Money Market Pool is managed by UBS Asset Management (Americas).

Maturity Restrictions, Diversification Guidelines and Credit Limits

All restrictions are based upon total dollar percentages of the pool holdings using an amortized cost basis. Securities that fall out of compliance may be held to maturity based upon recommendation of the investment manager and investment consultant. The Board may require the investment manager to sell non-compliant securities. Where noted, the date of purchase shall mean the settlement date.

- Weighted average maturity of the pool shall not exceed 60 days.
- Weighted average final maturity of the pool shall not exceed 120 days.
- Maximum maturity of individual securities held cannot exceed 397 days from the date of purchase except for certain variable rate and floating rate U.S. government securities.
- Variable rate and floating rate U.S. government securities shall be based on a money market index and shall not have a final maturity longer than 762 days.
- Repurchase agreements must comply with the requirements of the Repurchase Agreement Policy.
- Money market funds utilized by the pool must be approved in advance by the Board.
- Maximum exposure in government money market funds is limited to 10% of any individual rated fund at the pool level. The aggregate exposure may not exceed 30%.
- The pool may not hold private placements, or inverse floaters, or be leveraged in any manner.
- The pool shall not acquire any illiquid security if, after acquisition, more than 5% of the pool would be invested in illiquid securities.
- The pool shall not acquire any other security other than daily liquid assets if the fund would have less than 10% of its total assets in daily liquid assets.

- The pool shall not acquire any other security other than weekly liquid assets if the fund would have less than 30% of its total assets in weekly liquid assets.
- If the pool is rated by a Nationally Recognized Statistical Rating Organization ("NRSRO"), the investment manager is required to comply with any additional maturity, concentration, credit or other restrictions or requirements of the NRSRO for maintenance of the rating.

❑ BTI Role

The role of the BTI for the West Virginia Government Money Market Pool is as follows:

- Develop investment guidelines.
- Select and oversee investment managers.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Distribute daily earnings to participants.
- Calculate monthly net income and net asset value.
- Prepare monthly a statement of net position, a statement of changes in net position, and a detailed list of securities.

❑ Income Allocation

Net investment income and realized gains and losses are declared as dividends and distributed daily to the participants. If the pool incurs an extraordinary loss and distributing the loss would decrease the share value below one dollar ($1), the Investment Committee will be notified immediately for development of an action plan.

❑ Investments

For a detailed list of investments in the West Virginia Government Money Market Pool, see the Schedule of Investments in Securities in the Supplementary Information on Pages 52-54.

West Virginia Short Term Bond Pool

❑ Investment Objectives and Policy Guidelines

Objectives

The West Virginia Short Term Bond Pool was created to invest restricted moneys of the State which have a longer-term investment horizon. The goal of the pool is to earn an incremental return over the West Virginia Money Market Pool with an objective of asset growth rather than current income. The pool is structured as a mutual fund and is limited to monthly withdrawals and deposits by participants. The risk factor on this pool is higher than the West Virginia Money Market Pool.

Participants include state agencies and local governments throughout the state.

Benchmark

The performance of the West Virginia Short Term Bond Pool (net of external Investment Manager fees) will be measured against the ICE BofAML 1-3 Year US Corporate & Government Index + 10 basis points. Prior to November 1, 2018, performance was measured against the BofA Merrill Lynch US Corporate & Government, 1-3 Years, A Rated and Above Index + 10 basis points.

Investment Manager

The West Virginia Short Term Bond Pool is managed by Sterling Capital Management. Prior to November 1, 2018, the Pool was managed by Federated Hermes.

Maturity Restrictions, Diversification Guidelines and Credit Limits

All restrictions are based upon percentage of the pool holdings on a fair value basis at the time of the securities purchase. Securities that fall out of compliance may be held to maturity based upon recommendation of the investment manager and investment consultant. The Board may require the investment manager to sell non-compliant securities. Where noted, the date of purchase shall mean the settlement date.

- Effective duration of the West Virginia Short Term Bond Pool shall not deviate from the effective duration of the benchmark index by more than +/- 30 percent.
- Effective duration of securities cannot exceed five years (1,827 days).
- Effective duration of commercial paper or asset backed commercial paper will not exceed 397 days.
- Maximum 5% of the pool may be invested in any one corporate name or one corporate issue.
- Maximum 5% of the pool may be invested in any one supranational name.
- All long-term corporate securities must be rated BBB- or higher (or its equivalent), provided that no more than 30% may be invested in securities rated A-2 or BBB- to BBB+ (or its equivalent).
- All long-term supranational securities must be rated AA or higher (or its equivalent).
- Commercial paper or asset-backed commercial paper must be rated A-2 or higher (or its equivalent). Commercial paper or asset-backed commercial paper rated A-2 shall be included in the 30% limit for investment in securities rated BBB- to BBB+.
- Short-term securities other than commercial paper or asset-backed commercial paper must be rated A-1 or higher (or its equivalent).

- Non-government asset-backed and mortgage-backed securities must be rated AAA (or its equivalent).
- Maximum 75% of the pool may be invested in floating rate notes.
- Floating rate notes shall be based on a money market index and shall not have an effective duration longer than five years.
- Maximum of 50% of the pool may be invested in asset-backed and mortgage-backed securities. Asset-backed commercial paper is not considered an asset-backed security under this limitation.
- Asset-backed commercial paper programs that are eligible for purchase should be fully or partially supported programs that provide adequate diversification by asset type (trade receivables, credit card receivables, auto loans, etc.)
- Maximum 15% of the Pool may be invested in U.S. dollar denominated Euro Commercial Paper, Euro Certificates of Deposit, and Euro Time Deposits. Investments in U.S. dollar denominated Euro securities are subject to other policy requirements applicable to the specific investment type.
- The pool may not hold unregistered securities or private placements with the exception of securities issued pursuant to the SEC Rule 144A, public or municipal securities exempt from registration under Section 3(a)(4) of the Securities Act of 1933, and commercial paper issued pursuant to Rule 4(2) of the Securities Act of 1933.
- The pool may not invest in inverse floaters or be leveraged in any manner.
- Money market and fixed income funds utilized by the pool must be approved in advance by the Board.
- Repurchase agreements must comply with the requirements of the Repurchase Agreement Policy.
- If the pool is rated by a Nationally Recognized Statistical Rating Organization ("NRSRO"), the investment manager is required to comply with any additional maturity, concentration, credit or other restrictions or requirements of the NRSRO for maintenance of the rating.

❑ BTI Role

The role of the BTI for the West Virginia Short Term Bond Pool is as follows:

- Develop investment guidelines.
- Select and oversee investment managers.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Distribute monthly earnings to participants.
- Calculate monthly net income and net asset value.
- Prepare monthly a statement of net position, a statement of changes in net position, and a detailed list of securities.

❑ Income Allocation

Net investment income and realized gains and losses are declared as dividends on the last day of the month and distributed to the participants in the pool on the first day of the following month. Gains and losses (realized and unrealized) are reflected in the net asset value calculated each month.

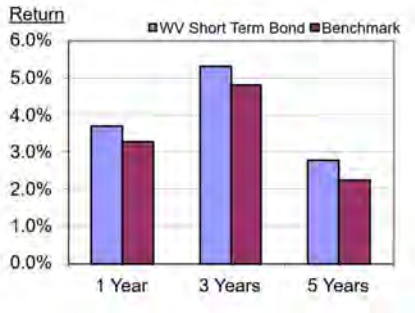

❑ Asset Allocation – Permissible vs. Actual

Permissible Allocation		Actual Allocation June 30, 2026	
Security Type	Maximum Percent of Pool	Carrying Value *(Thousands)*	Percent of Pool

Loan Pool

❑ Investment Objectives and Policy Guidelines

Objectives

The State Loan Pool is composed of loans made to/by the West Virginia Economic Development Authority (the "EDA"). The State is the sole participant in this pool. The Directors of the BTI Board shall bear no fiduciary responsibility with regard to any of the loans contemplated under §12-6C-11.

Under the State Code, the BTI is required to make available to EDA, subject to a liquidity determination, the following:

- A Revolving Loan up to $200 million for business and industrial development projects; and
- A Revolving Loan up to $80 million to provide loan insurance for debt instruments to expand broadband within West Virginia

Benchmarks

None.

Investment Manager

None.

Maturity Restrictions, Diversification Guidelines and Credit Limits

None.

❑ BTI Role

The role of the BTI for the overall Loan Pool is as follows:

- Receive and post loan payments.
- Open an account on behalf of the State Loan Pool.
- Develop investment guidelines.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Provide cash flow information regarding securities held by the pool.
- Record contributions and withdrawals.
- Provide monthly statements regarding pool activity
- Calculate monthly net income and net asset value.
- Prepare monthly a statement of net position, a statement of changes in net position, and a detailed list of securities.

The role of the BTI for the Broadband Debt Guarantee Revolving Loan is as follows:

- Provide EDA with quarterly interest rate to be charged on the loan
- Facilitate the transfer of funds to EDA via the State Treasurer's Office
- Invoice the EDA on a quarterly basis for interest and principal due on outstanding balances

The role of the BTI for WVDOT Infrastructure Investment Revolving Loan is as follows:

- Facilitate the transfer of funds to DOT via the State Treasurer's Office
- Collect periodic repayment of principal from DOT

❑ Income Allocation

Net investment income is declared as dividends and distributed on the last day of the month. If the pool incurs a loss resulting in negative income, the loss will be distributed to participants on the last day of the month.

❑ Asset Allocation – Permissible vs. Actual

Permissible Allocation		Actual Allocation June 30, 2026	
Security Type	Maximum Percent of Pool	Carrying Value *(Thousands)*	Percent of Pool
Other investments	100.0%	$ 70,324	99.9%
Money market funds	100.0%	36	0.1%
Depository accounts	5.0%	-	-
		$ 70,360	100.0%

❑ Actual Returns

The BTI does not maintain rates of return for the Loan Pool.

❑ Investments

For a detailed list of investments in the Loan Pool, see the Schedule of Investments in Securities in the Supplementary Information on Page 58.

West Virginia Term Deposit Account

❑ Investment Objectives and Policy Guidelines

Objectives

Under West Virginia Code § 12-1-13, the WV Board of Treasury Investments, at the request of the State Treasurer, may establish within the Consolidated Fund an investment pool which will generate sufficient income to pay for all banking services and goods and services ancillary to the banking services provided to the state. This account is a part of a diversified portfolio of investments managed by the State Treasurer to generate income to pay for banking services and goods and services ancillary to the banking services provided to the state. The State Treasurer is the sole participant in this account.

Benchmarks

None.

Investment Manager

None.

Maturity Restrictions, Diversification Guidelines, Credit Limits and Other Guidelines

- Only financial institutions that are a Designated State Depository are eligible to participate in auctions and receive deposits. The State Treasurer, under West Virginia Code § 12-1-5 is responsible for designating State Depositories.
- Deposits in excess of insurance coverage provided by an agency of the federal government must be collateralized in accordance with the West Virginia Code. The State Treasurer is the sole authority for determining acceptable collateral, collateralization methods, and collateralization levels.
- Funds shall be placed at Designated State Depositories through a competitive auction.
- The Board shall establish rules and guidelines for the competitive bidding process. Such rules shall be made available to all interested, qualified financial institutions prior to participation. Qualified, interested financial institutions must agree to the rules and guidelines to participate.
- The rules and guidelines for auctions shall specify the applicable base rate, minimum spread for bids, minimum total rate, minimum bid amount, minimum bid increment and maximum amount that can be awarded per parent organization.

❑ BTI Role

The role of the BTI for the West Virginia Term Deposit Account is as follows:

- Open an account on behalf of the State Treasurer.
- Develop Investment Guidelines.
- In conjunction with the State Treasurer's Office staff, develop and maintain procedures and guidelines for competitive auctions.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Provide cash flow information regarding Securities held by the Account.
- Record contributions and withdrawals based upon State Treasurer's Office authorization.

- Charge fees for management of Account.
- Invoice State Treasurer's Office periodically for fees charged for management of the Account.
- Calculate monthly net income and net asset value.

❑ Income Allocation

Net investment income is declared as dividends and distributed on the last day of the month. If the pool incurs a loss resulting in negative income, the loss will be distributed to the participant on the last day of the month.

❑ Asset Allocation – Permissible vs. Actual

Permissible Allocation		Actual Allocation June 30, 2026	
Security Type	Maximum Percent of Pool	Carrying Value *(Thousands)*	Percent of Pool
Depository accounts	100.0%	$ 40,233	99.9%
Money market funds	100.0%	50	0.1%
		$ 40,283	100.0%

❑ Actual Returns

The BTI does not maintain rates of return for the West Virginia Term Deposit Account.

❑ Investments

For a detailed list of investments in the West Virginia Term Deposit Account, see the Schedule of Investments in Securities in the Supplementary Information on Page 59.

School Fund Account

❑ Investment Objectives and Policy Guidelines

Objectives

The School Fund was established by State Code §18-9-5 to contribute toward supporting state public schools. The investment objective is to maintain the irreducible $1 million principal as defined in State Code §18-9A-16.

Benchmarks

None.

Investment Manager

None.

Maturity Restrictions, Diversification Guidelines and Credit Limits

None.

❑ BTI Role

The role of the BTI for the School Fund Account is as follows:

- Open an account on behalf of the School Fund Board.
- Develop investment guidelines.
- Prohibit commingling of funds with any other account in the Consolidated Fund.
- Provide monthly statements regarding School Fund activity.
- Calculate monthly net income and net asset value.
- Prepare monthly a statement of net position, a statement of changes in net position, and a detailed list of securities.

❑ Income Allocation

Net investment income and realized gains and losses are posted to the account monthly. Unrealized gains and losses are reflected in the net asset value calculated each month.

❑ Asset Allocation – Permissible vs. Actual

The School Fund shall be invested in interest-bearing securities of the United States, or securities, the payment of which as to both principal and interest, has been guaranteed by the United States, or of West Virginia, or of any county, city, town or village, or school district of West Virginia, or if such interest-bearing securities cannot be obtained, then such fund shall be invested in such other solvent interest-bearing securities as shall be approved by the School Fund Board. At June 30, 2026, 100.0% of the School Fund

Account's investments, totaling $1,032,000, were invested in a money market fund that invests in U.S. Treasury and agency securities.

❑ Actual Returns

The BTI does not maintain rates of return for the School Fund Account.

❑ Investments

For a detailed list of investments in the School Fund Account, see the Schedule of Investments in Securities in the Supplementary Information on Page 59.

Total investment management fees	$ 4,709

INVESTMENT POLICY SUMMARY

I. PURPOSE

The investment policy of the West Virginia Board of Treasury Investments (the "BTI") is adopted pursuant to Article 6C of Chapter 12 of the West Virginia Code and specifically outlines the investment philosophy and practices of the BTI. It has been developed to provide a fiscal administration, investment, and management plan for the assets entrusted to the Board. The Board has adopted this investment policy to serve as that plan and to provide:

- A clear direction to investment managers and consultants, staff, participants, and any other outside service provider as to the objectives, goals, and restrictions with regard to investment of assets;
- A methodology which allows assets to be structured and invested in a prudent manner; and
- A meaningful basis for the evaluation of asset classes, investment managers and the strategies used to achieve the various investment objectives.

II. INVESTMENT PHILOSOPHY

The BTI was established by the State Legislature to provide prudent fiscal administration, investment, and management for the assets entrusted to the BTI. It is the investment philosophy of the BTI to invest assets in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity. Due to the short-term nature of the funds, the BTI believes it is imperative to review and adjust the policy in reaction to interest rate market fluctuations/trends on a regular basis. In order to accomplish this, the BTI has adopted the following formal review schedule:

Agenda Item	Review Schedule
Investment Performance	Quarterly
Investment Manager Rebalancing	Quarterly
Investment Policy	Annually
Fee Schedule and Budget	Annually
Select Rating Agencies	Annually
Stress Testing of Portfolios	Monthly

When required, the BTI may react to trends in the market more quickly by itself or through actions of its Investment Committee.

The BTI will employ investment managers to implement this policy. The BTI shall monitor the performance of, and supervise all investment managers.

In determining its philosophy toward risk, the BTI considers its fiduciary obligations, statutory requirements, and current market conditions. Additionally, the BTI will consider the participants' purposes and characteristics, financial conditions, liquidity needs, sources and level of contributions, income and general business conditions. Based upon these many factors, the BTI identifies when either a more conservative or more aggressive investment approach is warranted.

III. INVESTMENT OBJECTIVES

The BTI's objective is to provide focused investment services for the funds, reduce costs for, and increase returns to its participants. Realizing the majority of the funds are for operating expenses, the policy is designed to address the short-term liquidity needs of the participants and limit risk, but still permitting for a better rate of return than participants may be able to obtain on their own.

All available funds shall be invested with the following objectives and priorities:

- Safety of principal. Investments shall be undertaken in a manner that seeks preservation of capital with reasonable investment risk in the overall portfolio.
- Liquidity requirements of anticipated and unanticipated expenditures.
- Maximization of the yield allocated to participants' investments consistent with all investment objectives.
- Recognition of differing objectives and needs of various participants.
- Conformance with state law and other pertinent legal restrictions.
- Diversification of assets by investment in various securities classifications and the use of various investment managers in order to smooth the volatility of returns.

IV. INVESTMENT/ADMINISTRATIVE RESPONSIBILITIES

The BTI is responsible for the prudent investment and administration of the funds. In order to properly carry out the policy, the BTI will rely on staff and outside service providers. Due to the number of parties involved, their roles as fiduciaries must be clearly identified to ensure operational efficiency, clear lines of communication, and accountability in all aspects of operations. The following describes the parties and the roles they assume as fiduciaries.

A. BOARD OF DIRECTORS

The Board has the responsibility of establishing and maintaining the policy and determining the objectives for all aspects of BTI operations.

The Board shall adopt by-laws and delegate the implementation of the policy to the Investment Committee and staff. The Board shall focus on important policy level issues, maintaining the proper fiduciary perspective and time horizon for analysis of the progress of the policy and the investment returns on the funds, and develop, adopt, review or modify the asset rebalancing plan, investment policy, fee schedule, and budget for the funds at least annually.

The Board may establish committees of its members as required to effectively implement the policy. Currently, the Board has established the Investment, Audit, and Personnel and Governance Committees as described below. Committees shall be briefed as required on any topic or issue pertinent to the Board's operations, and shall make reports regarding those topics to the Board at its meetings.

B. INVESTMENT COMMITTEE

The primary objective of the Investment Committee is to implement this policy and to do so effectively, prudently, and in a cost efficient manner in full compliance with all applicable laws, rules, and regulations.

The Investment Committee shall have the following specific responsibilities to be performed with the advice and assistance of staff and the investment consultant, and shall make recommendations to the Board for action as necessary regarding:

- Policies for preservation of capital, risk tolerance, credit standards diversification, rate of return, stability and turnover, liquidity, reasonable costs and fees, permissible investments, maturity ranges, internal controls, safekeeping and custody, valuation methodologies, and calculation of earnings and yields;
- Evaluation, selection, and termination of the investment managers and investment consultant;
- Regular review of and revisions to the investment policy;
- Investigate any reported investment problems or non-compliance;
- Evaluation of investment results to ensure compliance with the investment policy and to determine success of investment activities; and
- Other investment related issues as necessary for the prudent and cost effective investment of the funds.

C. INVESTMENT CONSULTANT

The investment consultant will be selected by and serve at the will and pleasure of the Board, based upon recommendations from the Investment Committee. The consultant must have and assign an employee to work directly with the BTI, who has a Chartered Financial Analyst or a Certified Treasury Professional designation. The consultant works with the Board and staff to implement this policy. This requires regular meetings with staff, the Investment Committee and/or the Board, to provide an independent perspective on various issues and make recommendations as appropriate.

D. INVESTMENT MANAGERS

Investment managers will be selected by and serve at the will and pleasure of the Board, based upon recommendations from the Investment Committee. The managers will have demonstrated expertise with the type of portfolio in their charge. The managers will be provided explicit written instructions detailing their particular assignment, and will construct and manage the portfolio consistent with the policy.

E. CUSTODIAN

The custodian holds directly, through its agents, its sub-custodians, or designated clearing systems, securities held as investments by the BTI. The custodian is accountable for registration of those securities in good delivery form, collection of income generated, and any corporate action notification. The custodian is responsible for delivery, receipt, tracking, and reporting of securities transactions. The BTI may opt to delegate other duties to the custodian.

F. INTERNAL AUDITOR

The Board shall retain an internal auditor to report directly to the Board. As minimum qualifications, the internal auditor shall be a certified public accountant with at least three years' experience as an auditor. The internal auditor shall develop an internal audit plan, with Board approval, for the testing of procedures, internal controls and security of transactions.

G. External Auditor

The BTI shall be audited annually by an independent certified public accounting firm selected by the Board. The certified public accounting firm must have a minimum staff of ten certified public accountants, be a member of the American Institute of Certified Public Accountants and, if doing business in West Virginia, a member of the West Virginia Society of Certified Public Accountants. The Board shall have financial and compliance audits of the Board's books, accounts and records with respect to its receipts, disbursements, investments, contracts and all other matters relating to its financial operations.

H. Nationally Recognized Statistical Rating Organization

The BTI shall annually select Nationally Recognized Statistical Rating Organizations ("NRSRO") whom it deems suitable to rely upon for credit ratings. Currently the BTI has selected the following NRSRO's:

- Moody's Investor Services
- Standard & Poor's
- Fitch Ratings

V. STANDARD OF CARE

Any investment made pursuant to this policy shall be made in accordance with the "Uniform Prudent Investor Act" and shall be further subject to the following:

- The Directors shall diversify the investment of the funds so as to minimize the risk of large losses unless, under the circumstances, it is clearly prudent not to do so;
- The Directors shall defray reasonable expenses of investing and managing the funds by charging fees; and
- The Directors shall discharge their duties in accordance with the documents and instruments consistent with the State Code.

VI. GENERAL INVESTMENT GUIDELINES

The BTI recognizes that risk (i.e., the uncertainty of future events), volatility (i.e., the potential for variability of asset values), and the possibility of loss in purchasing power (due to inflation) are present to some degree in all types of investments. Due to the short-term nature of the funds, high levels of risk should be avoided, but the assumption of risk may be warranted if it is needed in order to allow the investment managers the opportunity to achieve satisfactory results consistent with the policy and the investment guidelines for the pool/portfolio they manage.

All securities must have a readily attainable fair value, and must be readily marketable. Listed within the investment guidelines for each pool and account are the securities specifically permitted by the policy.

VII. CONFLICT OF INTEREST AND ETHICS

The Directors, staff, and any outside service provider shall refrain from those circumstances that could be considered a conflict of interest with BTI operations and transactions. A conflict of interest is a circumstance that creates an actual conflict with any fiduciary duty owed and a personal or business activity that could conflict with, could give the appearance of a conflict with, or could impair the ability to make impartial decisions in matters affecting BTI operations and transactions.

Additionally, the Directors and staff shall maintain knowledge of, and shall comply with, all applicable laws, rules and regulations of any governmental or regulatory entity governing the management of the funds and shall not knowingly participate in, assist or fail to report to the BTI any acts in violation of those laws, rules and regulations. This requirement includes, but is not limited to, compliance with the "West Virginia Governmental Ethics Act" in the State Code. Any actual or perceived violation of the Ethics Act shall be reported in writing to the Personnel and Governance Committee of the Board for action.

VIII. AUDITOR ACCESS TO RECORDS

An investment manager or custodian which holds securities for the account of, in trust of, in trust for, or pledged to the BTI, shall be required to allow the BTI or its agents to conduct an audit with respect to such securities or securities transactions for a period of two years after date of any trade executed on behalf of the BTI.

IX. OTHER BTI POLICIES

The policy incorporates policies that govern the day-to-day practices of the BTI, including:

- Pricing Policy
- Net Asset Value Monitoring Policy
- Dividend Reinvestments Policy
- Record Retention Policy
- Outside Service Provider Policy
- Repurchase Agreement Policy
- Securities Lending Program Policy
- Bank Account Collateral Policy
- Investment Manager Due Diligence and Watch List Policy
- Securities Litigation Policy
- Shareholder Voting Policy

X. MISCELLANEOUS PROVISIONS

A. AMENDMENTS

Any modification or amendment of this policy may be made by an action adopted at any duly constituted Board meeting; provided, however, that no such modification or amendment shall abrogate the rights and duties of then existing BTI contracts with outside service providers, unless required by operation of law or agreed to by the outside service providers.

B. NO RECOURSE

No provision in this policy shall be the basis for any claim against any director or staff, in his individual or official capacity, or against the BTI itself.

C. EFFECT UPON EXISTING CONTRACT

This policy shall not abrogate the rights and duties of the BTI under contracts with outside service providers executed prior to the effective date of this policy, unless required by operation of law or agreed to by the outside service provider.

D. EFFECT OF FAILURE TO COMPLY AS TO INVESTMENTS

Failure to comply with this policy shall not invalidate any investment or affect the validity of the authorization of the Board, or their designee, to make such investments, unless required by the Board.

Statistical Section

INTRODUCTION TO STATISTICAL SECTION

The Statistical Section of the BTI's ACFR presents information as a historical perspective and a context for understanding what the information in the financial statements, note disclosures, supplementary information, and other financial information says about the BTI's overall financial health.

Table 1: Schedules of Additions, Deductions, and Changes in Net Position – Consolidated Fund

This table presents historical information showing trends in the changes in Consolidated Fund net position and the components of those changes.

Table 2: Financial Highlights – Consolidated Fund State Operating Pools

This table presents historical information showing per share data and ratios for the state operating pools of the Consolidated Fund for the past ten years. The ratio of expenses to average net position represents the percentage of net position used to operate the pool. The ratio of net investment income to average net position represents financial performance of the pool, or the extent to which operations have resulted in changes in net position. The portfolio turnover rate is a measurement of how frequently assets within a fund are bought and sold by the managers.

Table 3: Rates of Return – Consolidated Fund State Operating Pools

This table presents historical information showing the rates of return for the Consolidated Fund State Operating Pools for the past ten years.

Table 4: Participation in Consolidated Fund State Operating Pools

This table presents historical information for the past ten years showing the participation in the Consolidated Fund State Operating Pools that are open to all state agencies and local governments in the state. Many state agencies and local governments have multiple accounts.

Table 5: Net Position – Consolidated Fund

This table presents historical information showing the total net position of the Consolidated Fund for the past ten years.

Table 6: Net Position and Changes in Net Position – Operating Fund

This table presents historical information showing the total net position and changes in net position of the Operating Fund (a proprietary fund) for the past ten years.

Table 7: Schedule of Net Asset Values—Consolidated Fund Operating Pools

This table presents components of total net asset values of the Consolidated Fund Operating Pools at June 30, 2026, as well as investment unit data.

Table 8: Portfolio Statistics – Consolidated Fund Operating Pools

This table presents weighted average days to maturity, maximum weighted average investment maturity term per BTI investment policy, and money market yields for the Consolidated Fund Operating Pools at June 30, 2026.

Table 9: Participant Net Asset Values—Consolidated Fund Operating Pools

This table presents major investors in the Consolidated Fund Operating Pools at June 30, 2026.

Glossary of Financial and Investment Terms

A glossary of financial and investment terms is presented to help readers understand the basic concepts and information provided in this Annual Comprehensive Financial Report.

Glossary of Financial and Investment Terms

Agency Security – A security issued by a U.S. federal government agency, such as the Government National Mortgage Administration, or a government-sponsored enterprise, such as the Federal National Mortgage Association. Securities issued by government agencies typically are backed by the full faith and credit of the U.S. government. Securities issued by government-sponsored enterprises carry an implicit guarantee of U.S. government support and are not explicitly guaranteed.

Asset-Backed Commercial Paper (ABCP) – A form of commercial paper that is collateralized by other financial assets such as trade receivables, auto loans and credit cards. Similar to commercial paper, maturities range from one to 270 days.

Asset-Backed Security (ABS) – A financial security that is collateralized by a pool of assets such as loans, leases, credit card debt, royalties or receivables.

Banker's Acceptance – A high quality, short-term negotiable discount note drawn on and accepted by banks that are obligated to pay the face amount at maturity.

Basis Point – The smallest measure used in quoting yields or returns. One basis point is 0.01% of yield. One hundred basis points equals 1%. For example, a yield that changed from 8.75% to 9.50% increased by 75 basis points.

Benchmark – A standard unit used as the basis of comparison; a universal unit that is identified with sufficient detail so that other similar classifications can be compared as being above, below, or comparable to the benchmark.

Capital Gain (Loss) – Also known as capital appreciation (depreciation), capital gain (loss) measures the increase (decrease) in value of an asset over time.

Certificate of Deposit (CD) – A debt instrument issued by banks, usually paying interest, with maturities ranging from seven days to several years.

Commercial Paper (CP) – Short-term obligations with maturities ranging from one to 270 days. They are issued by banks, corporations, and other borrowers to investors with temporarily idle cash.

Compounded Annual Total Return – Compounded annual total return measures the implicit annual percentage change in value of an investment, assuming reinvestment of dividends, interest, and realized capital gains, including those attributable to currency fluctuations. In effect, compounded annual total return smooths fluctuations in long-term investment returns to derive an implied year-to-year annual return.

Consumer Price Index (CPI) – A measure of change in consumer prices, as determined by a monthly survey of the U.S. Bureau of Labor Statistics. Components of the CPI include housing costs, food, transportation, electricity, etc.

Cumulative Rate of Return – A measure of the total return earned for a particular time period. This calculation measures the absolute percentage change in value of an investment over a specified period, assuming reinvestment of dividends, interest income, and realized capital

gains. For example, if a $100 investment grew to $120 in a two-year period, the cumulative rate of return would be 20%.

Derivative – Derivatives are generally defined as contracts whose value depends on, or derives from, the value of an underlying asset, reference rate, or index. For example, an option is a derivative instrument because its value derives from an underlying stock, stock index, or future.

Discount Rate – The interest rate that the Federal Reserve charges banks for loans, using government securities or eligible paper as collateral.

Expense Ratio – The amount, expressed as a percentage of total investment, that shareholders pay for mutual fund operating expenses and management fees.

Federal Funds Rate – The interest rate charged by banks with excess reserves at a Federal Reserve district bank to banks needing overnight loans to meet reserve requirements. The federal funds rate is one of the most sensitive indicators of the direction of interest rates because it is set daily by the market.

Federal Open Market Committee (FOMC) – A committee within the Federal Reserve System that is responsible by law for overseeing the nation's open market operations (the Fed's buying and selling of securities in the market). The FOMC makes key decisions about interest rates and the growth of the United States money supply.

Federal Reserve Board – The governing body of the Federal Reserve System (twelve regional Federal banks monitoring the commercial and savings banks in their regions). The board establishes Federal Reserve System policies on such key matters as reserve requirements and other regulations, sets the discount rate, and tightens or loosens the availability of credit in the economy.

Floating Rate Note – Securities with a variable coupon rate that is adjusted at set intervals, such as daily, weekly, or monthly. The coupon rate is based on a benchmark interest rate, such as LIBOR, Fed Funds, and Treasury Bills plus or minus a spread.

Gross Domestic Product (GDP) – Total final value of goods and services produced in the United States over a particular period of time, usually one year. The GDP growth rate is the primary indicator of the health of the economy.

Index – A benchmark used in executing investment strategy which is viewed as an independent representation of market performance. An index implicitly assumes cost-free transactions; some assume reinvestment of income. Examples: S&P Index, Lehman Brothers Aggregate Index, Russell 2000 Index.

Inflation – A measure of the rise in price of goods and services, as happens when spending increases relative to the supply of goods on the market, i.e. too much money chasing too few goods.

Investment Income – The equity dividends, bond interest, and/or cash interest paid on an investment.

Maturity Date – The date on which the principal amount of a bond or other debt instrument becomes payable or due.

Money Market Fund (MMF) – An open-ended mutual fund that invests in commercial paper, bankers' acceptances, repurchase agreements, government securities, certificates of deposit, and other highly liquid and safe securities and pays money market rates of interest. MMF's are managed to maintain a net asset value of $1 per share.

Mortgage-Backed Security (MBS) – A mortgage-backed security is a type of ABS that is secured by a mortgage or collection of mortgages. There are multiple sub-types of MBS, such as pass-through securities, collateralized mortgage obligations, and commercial mortgage-backed securities. MBS are classified as agency, or government, MBS and non-agency, or private label, MBS. Agency MBS are issued by government sponsored enterprises such as Fannie Mae, Freddie Mac or Ginnie Mae. Certain agency MBS are fully guaranteed as to repayment of principal and interest by the U.S. government. Non-agency MBS are issued by non-governmental issuers such as trusts and other special purpose entities.

Net Asset Value (NAV) – The total assets minus total liabilities, including any valuation gains or losses on investments or currencies, and any accrued income or expense.

Par Value – The stated or face value of a stock or bond. It has little significance for common stocks; however, for bonds it specifies the payment amount at maturity.

Principal – Face value of an obligation, such as a bond or a loan, that must be repaid at maturity.

Realized Gain (Loss) – A gain (loss) that has occurred financially. The difference between the principal amount received and the cost basis of an asset realized at sale.

Repurchase Agreements (Repos) – An agreement to purchase securities from an entity for a specified amount of cash and to resell the securities to the entity at an agreed upon price and time. Repos are widely used as a money market instrument.

Reverse Repurchase Agreements (Reverse Repos) – An agreement to sell securities to an entity for a specified amount of cash and to repurchase the securities from the entity at an agreed upon price and time.

Secured Overnight Financing Rate (SOFR) – SOFR is a benchmark interest rate for dollar-denominated derivatives, loans and securities that is replacing LIBOR. SOFR is based on transactions in the Treasury repurchase market and is seen as preferable to LIBOR since it is based on data from observable transactions rather than on estimated borrowing rates.

Treasury Bill (T-Bill) – Short-term, highly liquid government securities issued at a discount from the face value and returning the face amount at maturity.

Treasury Bond or Note – Debt obligations of the Federal government that make semi-annual coupon payments and are sold at or near par value in denominations of $1,000 or more.

Turnover – The minimum of security purchases or sales divided by the fiscal year's beginning and ending fair value for a given portfolio.

Unrealized Gain (Loss) – A profit (loss) that has not been realized through the sale of a security. The gain (loss) is realized when a security or futures contract is actually sold or settled.

Volatility – A statistical measure of the tendency of a market price or yield to vary over time. Volatility is said to be high if the price, yield, or return typically changes dramatically in a short period of time.

Yield – The return on an investor's capital investment.

Yield Curve – A graphical representation of the interest rates on debt for a range of maturities. The shape of the yield curve refers to the relative difference, or spread, between longer-term and shorter-term interest rates. Yield curves are used to assess the expected future state of the economy and play a crucial role in credit modeling, including bond valuation and risk and rating assessment.

Yield to Maturity – The total return anticipated on a bond if it is held until maturity. Yield to maturity is expressed as an annual rate.
