#### **Expenditure Summary:**

The general practice is that a supplemental appropriation will provide the funding necessary to pay court-appointed counsel for the remainder of a fiscal year. Accordingly, the agency requests a supplemental in the amount of twenty million (\$20,000,000) for the remainder of Fiscal Year 2024.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The supplemental appropriation fulfills the State of West Virginiaâ¿Ś sobligations under the Sixth and Fourteenth Amendments of the United States Constitution to provide counsel to individuals who cannot afford to retain counsel when facing the loss of liberty due to state prosecution. By statute, this obligation also extends to providing representation to indigent parties in child abuse and neglect proceedings seeking the termination or restriction of parental rights.

#### Anticipated cost savings to budget if improvement is approved:

If funding is not available to pay claims for compensation for legal services by court-appointed counsel, the governing statute provides for the payment of interest. Six (6) percent to seven (7) percent per annum on a deficiency in funding of twenty million dollars or more is significant. Moreover, the timely payment of claims should reduce the need for attorneys to factor their receivables with third parties resulting in a 10% to 20% discount on the face of the voucher. The agency¢Â¿Â¿s experience is that this practice increases the instances of overbilling. Finally, failure to timely pay compensation will result in fewer attorneys taking appointments which will significantly affect the criminal justice process and substantially increase the costs of detaining individuals pending resolution of their matters.

#### **Expenditure Summary:**

The Supplemental will provide DOP the ability to maintain current level services to State Agencies.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The DOP provides services such as training and consulting; serves as a central recruitment and applicant collection and distribution point; and provides employee and employer assistance with federal and state policies pertaining to complex human resources matters. Without this funding, the DOP would be unable to perform the duties set forth in WVC §29-6. Additionally, the DOP has reduced office space and has not filled positions through attrition to cut back on expenditures as much as possible. The DOP would have to lay off a minimum of half of the current staff if not funded. In 2017, the DOP lost funding (1.4 million) as a result of House Bill 2003 which exempted the Department of Transportation from the DOP's merit system. HB 2006 from the 2023 Regular Session exempts the DHHR Health Facilities and another bill exempts the Bureau of Social Services from the DOP which will result in additional revenue loss for the DOP that has created a need for funding.

#### Anticipated cost savings to budget if improvement is approved:

No Cost Savings

#### **Expenditure Summary:**

IN FISCAL YEAR 2019 WVDACH TOOK A CUT OF \$688,725 IN PERSONAL SERVICES AND BENEFITS. THE DIVISION PREPARED FOR THE CUT AND GAVE UP 5 POSITIONS. THE CUT WAS GREATER THAN ANTICIPATED AND FORCED THE AGENCY TO MOVE FTES FROM GENERAL TO CULTURAL FACILITIES. THIS REQUEST IS TO SHIFT 13.5 EXISTING FTES FROM SPECIAL REVENUE BACK TO GENERAL REVENUE

#### Anticipated benefits to the program or the effects if improvement is not funded:

WITHOUT THIS IMPROVEMENT WVDACH WILL HAVE TO CONTINUE FUNDING NUMBEROUS POSITIONS OUT OF CULTURAL FACILITIES TO THE DETRIMENT OF ALL FACLITIES UNDER WVDACH.

#### Anticipated cost savings to budget if improvement is approved:

IF WVDACH CAN HAVE ITS PERSONAL SERVICES RESTORED IT CAN MOVE POSITIONS BACK TO GENERAL REVENUE AND FREE UP CULTURAL FACILITIES FUNDING AS INTENEDED FOR CAPITAL IMPROVEMENTS AND GENERAL MAINTENACE.

#### **Expenditure Summary:**

INCREASE THE FUNDING BACK TO HISTORICAL LEVEL OF 1.5 MILLION - OVER A NUMBER OF YEAR, THIS LOTTERY COMMISSION DISTRIBUTION TO STATUTORY FUND AND PURPOSE HAS DECREASED FROM ITS HISTORICAL NORM OF 1.5 MILLION DOWN TO 1.25 MILLION. THIS REQUEST IS TO RESTORE THIS FUNDING.

#### Anticipated benefits to the program or the effects if improvement is not funded:

NOT FUNDING THIS REQUEST HINDERS THE MAINTENANCE OF THE STATE MUSEUM AND OFF SITE LOCATIONS, INCREASING THE DEFFERED MAINTENANCE OF ALL FACILITIES.

#### Anticipated cost savings to budget if improvement is approved:

AN INCREASE TO THIS FUND WILL ALLOW CULTURAL FACILITIES FUNDING TO BE USED FOR INCREASED PREVENTATIVE MAINTENACE, DECREASED DEFFERRED MAINTENANCE, AND LESSON THE NEED FOR FUTURE SUPPLEMENTAL APPROPRIATIONS FOR DIRE NEEDS. SINCE THIS FUNDING IS USED BOTH FOR MAINTAINING THE FACILITIES OWNED AND OPERATED BY THE STATE AS WELL AS GRANTED OUT THROUGH THE ARTS SECTION OF THE DEPARTMENT IN THE FORM OF CULTURAL FACILITIES GRANTS TO THE PUBLIC, ANY INCREASE TO THIS FUND BENEFITS BOTH PURPOSES.

#### **Expenditure Summary:**

Constructing district offices for Wildlife Resources and Law Enforcement Staff. New district office construction is planned for Districts 4 and 1 (in that order.)

#### Anticipated benefits to the program or the effects if improvement is not funded:

New facilities in accessible areas will make serving the public more efficient. No general revenue is required.

#### Anticipated cost savings to budget if improvement is approved:

Secure, safe and ADA compliant office facilities are necessary for the effective administration of the state's fish and wildlife conservation program and to meet federal requirements.

#### **Expenditure Summary:**

The Randolph Sheppard program is a federally mandated program giving priority to blind individuals to operate vending programs on federal property. Due to the increase in federal vending contracts throughout West Virginia, the Division is in need of increased spending authority to allow for the payment to vendors where the Division is the primary authority.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded, the agency will not be able to pay the vendors and partners for services rendered under the Randolph Sheppard Highways Program.

#### Anticipated cost savings to budget if improvement is approved:

No additional costs will be incurred or saved by the agency.

#### **Expenditure Summary:**

WVCDHH proposes a budget increase for the vital position of Advocate Coordinator catering to the deaf residents of West Virginia. The current allocation does not adequately address the unique needs and challenges faced by this community. With an enhanced budget, we can significantly expand outreach efforts, organize targeted educational workshops, provide accessible resources, and establish a more robust communication network. This increased investment will empower the Advocate Coordinator to better support the deaf population in navigating legal matters, ensuring equitable access to services, and fostering a more inclusive environment across the state.

#### Anticipated benefits to the program or the effects if improvement is not funded:

This additional funding would allow WVCDHH to better serve the Deaf/Hard of Hearing community. Additionally it would allow for dedicated staff to carryout specific needs.

Anticipated cost savings to budget if improvement is approved:

Granting a budget increase for the Advocate Coordinator dedicated to the deaf residents of West Virginia will have a transformative impact on the community. With enhanced resources, the Advocate Coordinator can facilitate greater accessibility to legal services, improved communication with public institutions, and heightened awareness of the rights and resources available to the deaf population. This will result in increased empowerment, reduced barriers to justice, and a more inclusive society where deaf individuals can fully participate and contribute, ultimately fostering a stronger and more cohesive West Virginia for all.

#### **Expenditure Summary:**

In recent years, the Board of Review (BOR) has taken on an increase in case types for the various DHHR Bureaus. Additionally, due to a recent Food and Nutrition Service (FNS) review, the BOR is now required to set all requests for a pre-hearing for fair hearing. With this additional caseload, the BOR will need to hire an additional Administrative Law Judge at \$100,750 (DHHR average salary \$81,176 and fringe benefits \$19,574). Current expense for this position is estimated at \$8,000 (includes office supplies, rent/utilities, and training). Additionally, there is a one-time cost of \$1,800 for the purchase of computer equipment. The total supplemental request is \$110,550.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the additional position is not approved, there could be a significant delay in the provision of hearings and issuance of final decisions to appellants which could result in litigation against the Department for failing to provide a timely hearing process within the timeframes set forth by state and federal rules and regulations.

Anticipated cost savings to budget if improvement is approved:

#### **Expenditure Summary:**

In recent years, the Board of Review (BOR) has taken on an increase in case types for the various DHHR Bureaus. Additionally, due to a recent Food and Nutrition Service (FNS) review, the BOR is now required to set all requests for a pre-hearing for fair hearing. With this additional caseload, the BOR will need to hire a Health and Human Resources Associate at at \$51,660 (DHHR average salary \$39,093 and fringe benefits \$12,567). Current expense for this position is estimated at \$8,000 (includes office supplies, rent/utilities, and training). Additionally, there is a one-time cost of \$1,800 for the purchase of computer equipment. The total supplemental request is \$61,460.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the additional positions is not approved, there could be a significant delay in the provision of hearings and issuance of final decisions to appellants which could result in litigation against the Department for failing to provide a timely hearing process within the timeframes set forth by state and federal rules and regulations.

Anticipated cost savings to budget if improvement is approved:

N/A

#### **Expenditure Summary:**

With the addition of Human Rights Commission, pursuant to HB2006, the OIG will need to hire an Executive Assistant at \$72,250 (DHHR average salary \$56,744 and fringe benefits \$15,506). Current expense for this position is estimated at \$8,000 (includes office supplies, rent/utilities, and training). Additionally, there is a one-time cost of \$1,800 for the purchase of computer equipment. The total supplemental request is \$82,050.

Anticipated benefits to the program or the effects if improvement is not funded:

Over the past several years, the OCME has been unable to fully fund the expenses associated with County Medical Examiner / County Coroner fees and decedent providers without the transfer of funding from other offices and/or funding sources across the Bureau for Public Health (BPH) and the Department of Health and Human Resources (DHHR). This has at times caused delays to payments while alternative funding sources are identified, funding on contracts is changed, funding on invoices is changed, etc. In some cases, the OCME has lost the ability to utilize some of the vendors due to the delay in receiving payment for the services that they render. Loss of vendors can cause delays in the arrival of the decedent at the OCME and the placement of remains into appropriate cold storage. Such delays can have a negative impact upon the medicolegal death investigation and determination of the cause and manner of a death.

The predictability of decedent transportation costs is almost impossible due to the infinite number of variables associated with OCME cases. Accurately predicting the number and location of where deaths may occur across the state and whether those deaths may result in OCME jurisdiction is not possible, therefore the solution is to utilize past trends in expenses to try and anticipate future expenses. The one predictable element that has surfaced is that OCME caseload has steadily risen over the past fifteen (15) years with a total increase over 150% and current trends indicate that the increase will continue for the foreseeable future. In addition, the amount paid per mile for decedent transportation services is directly tied to the average fuel prices in the state. In both May and June 2022, the OCME was required to increase its per mile rate to the highest tier associated with the contract. The per mile cost remained at the highest tier from June 8th until August 1st due to gasoline prices averaging in excess of \$4.50 per gallon. The price must be increased again if the gasoline prices increase again.

The OCME is requesting both supplemental and improvement funding to ensure that the OCME budget has enough funding to cover these costs without necessitating that funding be transferred from another entity to cover the shortfall. The OCME predicts that the total caseload for FY 2025 will be 10% higher than FY 2024 and that a similar increase will be realized in subsequent years to come.

Additionally, increases in salaries for hard to recruit forensic pathologists has necessitated the need to shift funding from current expense to cover these salaries.

Restoration of funding received through HB3553 of \$250,000 for a One-time purchase, delivery and installation of two columbariums to be utilized for temporary interment of unclaimed and unidentified decedents. The two columbariums will provide capacity to temporarily inter 768 remains. Reappropriation language was not included and funding expired.

One-time contract to complete construction elements required for installation of the LODOX full-body scanner system (a \$1 million asset purchased nearly four years ago) that requires completion of room renovations at the OCME.

Funding to add two Physician Specialist (Deputy Chief Medical Examiner) positions and to increase the base salaries for incumbent medical examiners to be competitive with the current national average of \$306,206 in an attempt to recruit and retain board certified forensic pathologists, for which there is a nationwide shortage. The OCME must compete directly with all other medical examiner systems across the nation to recruit these professionals to WV. This amount includes raising 6 current physician specialist positions to \$306,000; The First Deputy Chief Medical Examiner Physician Director position to \$329,820; The CME Physician Director position to \$425,000; and the addition of 2 Deputy Chief Medical Examiner Physician Specialist positions at \$306,000 each.

Funding to establish a student loan repayment incentive to be offered to forensic pathologists in an effort to recruit and retain these medical professionals in the face of a nationwide shortage.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If approved, the OCME will be able to pay for County Medical Examiner / Coroner fees and decedent transportation services in a timely manner without negatively impacting the budget of any other entity. In turn, the OCME may be able to recruit and retain vendors to provide additional statewide coverage, resulting in a more timely provision of these services, a quicker release of first responder agencies from death scenes, and the ability to reduce the number of cases where no County Medical Examiner / Coroner is assigned, thereby avoiding negative impacts to the OCME mission.

Anticipated cost savings to budget if improvement is approved:

#### **Expenditure Summary:**

This request is to provide the expired funds for SFY2023 to allow for the Department to pay for vaccine purchases that were made in SFY2023 for the safety net program. The Department of Health and Human Resources (DHHR) has contracted with the Children's Health Insurance Program (CHIP) to provide vaccine for those children not eligible to receive vaccine through the DHHR immunization grant. This agreement allows the CHIP eligible children to receive vaccine purchased off a federal contract by the DHHR. The Vaccines for Children (VFC) entitlement program provides vaccines to children based on specific eligibility criteria. Funding for the VFC program is provided by the Centers for Medicaid and Medicare Services (CMS) to Centers for Disease Control (CDC) and CDC purchases the vaccines through federal contracts with vaccine manufacturers at a discounted price. Vaccines are also provided to children who are enrolled in CHIP. Children enrolled in the Medicaidexpansion CHIP programs can receive VFC vaccine whereas children enrolled in separate CHIP programs are considered insured and are not eligible for VFC vaccines. However, state immunization programs can purchase vaccines for children enrolled in separate CHIP programs using the CDC federal vaccine contracts which will save money for the CHIP program. The Department has sufficient credit with CDC to cover the vaccines purchased on behalf of the WVCHIP program until reimbursement is received from WVCHIP. The CDC stipulates the State immunization programs must then be reimbursed for the vaccine purchase costs by the state CHIP program. Therefore, DHHR replenishes the supply of vaccines at the warehouse once the funding is received from WVCHIP in the following guarter for the amount of vaccines ordered for the CHIP program. In 2011, the VFC program was selected by CDC to be reviewed as part of a Department-wide Program Integrity Initiative to ensure that each DHHS program prioritizes the identification of systemic vulnerabilities for waste or exploitation and implements heightened oversight to prevent these occurrences. One of the risks identified by ISD staff that needed addressed was the potential for misuse of VFC vaccines. Specifically, if sufficient funding for the purchase of vaccines for separate CHIP children is not provided by state CHIP programs that are using the VFC vaccine contracts, then there is a risk that VFC vaccine would supplant CHIP-purchased vaccines. A multi-step mitigation plan was developed and one of the pivotal elements of the plan was the development and deployment of the Vaccine Purchase Estimator Tool (VPET) to address this risk and assure VFC program integrity. The VPET was based on a tool in current use by the WV state immunization program to bill its state CHIP program for vaccines used for separate CHIP children. The only way to accomplish this CHIP payment is to code as a reimbursement to a state account 0407-55100 (whereby, the particular vaccine replacement has not yet been made). The number and types of vaccines used by CHIP children is not known until the end of each quarter, therefore CHIP reimbursement cannot be requested until the end of each quarter. Because the funding is needed by CHIP in order to place the order, this causes issues in the current process as the 0407-55100 account is expiring and if the funding is not received from CHIP until late, then there is a very small window of time to make the replacement vaccine purchase prior to closeout and the funds are expired. The past fiscal year, the replacement purchase was made, however payment was not finalized and this funding expired.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If funds expire, this causes inability to replenish the stock utilized or CHIP, therefore causing misuse of federal CDC VFC vaccines.

#### Anticipated cost savings to budget if improvement is approved:

These funds will allow us to vaccinate at-risk individuals against vaccine preventable diseases. This process allows CHIP to utilize the lower cost options available to the Department

#### **Expenditure Summary:**

The BFY2024 Spending Authority for the Office of Maternal, Child and Family Health (OMCFH) is \$5,7794,267. It is projected that BFY2024 current expenses will exceed the Current Expense (13000) appropriation of \$5,794,267 for Federal Fund (8750) by \$1,500,000. OMCFH is requesting a Spending Authority increase for 8750-13000 in the amount of \$1,500,000 to ensure that the Office of Maternal, Child and Family Health are funded through BFY2024. This fund is utilized to receive and disburse federal funds from the Maternal and Child Health Block Grant. Since the federal and state fiscal year are not the same, estimates can be difficult due to timing of release of federal funding.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If a Spending Authority increase is not approved, OMCFH will have a shortage of funds to cover payments for all of BFY2024.

#### Anticipated cost savings to budget if improvement is approved:

No anticipated cost savings.

#### Expenditure Summary:

The WV Department of Health and Human Resources (DHHR) serves as the lead agency responsible for implementing Part C of the Individuals with Disabilities Education Act (IDEA). The BFY2024 Spending Authority for the Office of Maternal, Child and Family Health (OMCFH) Birth to Three (BTT) Program is \$33,372,684. It is projected that BFY2024 current expenses will exceed the Current Expense (13000) appropriation of \$33,372,684 for Special Revenue Fund 5214 by \$2,320,450. OMCFH is requesting a Spending Authority increase for 5214-13000 in the amount of \$2,320,450 to ensure that BTT practitioner payments are funded through BFY2024.

#### Anticipated benefits to the program or the effects if improvement is not funded:

No anticipated cost savings.

#### Anticipated cost savings to budget if improvement is approved:

If a Spending Authority increase is not approved, BTT will have a shortage of funds to cover practitioner payments for all of BFY2024.

### **Expenditure Summary:**

The electronic environmental health reporting system, also known as Healthspace or EH Cloud, costs \$214,400 for warranty, hosting and technical support. This cost includes unlimited users of the system. State mandate has directed the Radiological Health Program within BPH to begin the process of becoming an agreement state which means WV will begin regulating radioactive material at a state level. These materials are currently regulated federally by the Nuclear Regulatory Commission. This program will be an ongoing budgetary need for the following positions 3 field staff salary \$60,000 (classification TBD), 1 supervisor/chief salary \$70,000 (classification TBD), 1 environmental program manager 1 salary \$77,000, ASA2 salary \$40,000 for administrative support. Fringes \$47,486, One time costs will include computers (6x\$1,500), cell phones (5x\$1,000), radiation meters (5x\$5,000)

Anticipated benefits to the program or the effects if improvement is not funded:

This cost supports local health departments having a web based cloud system for data collection, permitting, and inspecting of environmental health facilities under their jurisdiction. It also provides complaint and animal encounter tracking and provides reports of environmental health activities conducted in the system. The program provides a way for the local boards of health to meet the requirement set in 64CSR73 5.1.3.c. The board shall report environmental health data electronically in a format or system specified by the Bureau.

### Anticipated cost savings to budget if improvement is approved:

Loss of funding for this project would result in health departments who have been using the system for data collection, permitting and inspections having to potentially purchase a similar system for themselves or developing a system for tracking and reporting their environmental health data electronically to the state. This could also lead to data inconsistencies and loss of tracking data that could be used to identify environmental health trends in the state.

### **Expenditure Summary:**

Drinking Water is requesting this funding for use during the transition of Drinking Water grants from DHHR to DEP. DHHR retains most of the drinking water programs and staff that are funded with these grants. The process is being set up for DHHR to seek reimbursement from DEP for eligible expenses including salaries. This funding would provide DHHR support while the reimbursement process is being set up.

DHHR could also consider using a portion of this funding to provide support to small or disadvantaged communities during emergency situations such as providing point of use filters in communities with elevated lead or bottled water in communities with contamination. There is also an occasional need to collect confirmation samples in communities with suspected contamination or in emergency situations. This funding could provide support for this sampling.

### Anticipated benefits to the program or the effects if improvement is not funded:

#### **Expenditure Summary:**

Request for 3 FTEs at a personnel salary cost of \$190,870 and a fringe cost of \$54,479 for a total request of \$245,349. There are currently five (5) full-time Laboratory Scientist positions being funded by the Public Health Emergency Preparedness (PHEP) cooperative agreement. PHEP can no longer support all five (5) FTEs needed for the Threat Preparedness program, nor can it support funding necessary for laboratory testing supplies, preventative maintenance agreements for laboratory instruments, quality control material, and sentinel laboratory training and outreach. Because PHEP requires two (2) FTEs as part of the cooperative agreement activities, the three (3) additional FTEs must be moved to general revenue funds. The funds remaining on PHEP after this reallocation will allow OLS to fund additional supply needs for the Threat Preparedness program at OLS.

### Anticipated benefits to the program or the effects if improvement is not funded:

While this request may not result in any direct cost savings associated with the overall state budget allocated to the Office of Laboratory Services, it will alleviate the shortfall in federal grant dollars allocated to OLS and help OLS maintain Laboratory Scientist staff to respond to chemical and biological threats.

Anticipated cost savings to budget if improvement is approved:

| Number of FTEs:                          |                |         |          |                 |            |       |            |         |          |           |       |       |           |

The three (3) FTEs in this request are currently funded through the Public Health Emergency Preparedness (PHEP) cooperative agreement with the Centers for Disease Control and Prevention (CDC). There are a total of five (5) FTEs to support the entire Threat Preparedness Division at the Office of Laboratory Services (OLS). This includes two (2) Laboratory Scientists in the Chemical Threat Preparedness Section and three (3) Laboratory Scientists in our Biological Threat Preparedness Section. PHEP is required to support only two FTEs. The Threat Preparedness staff not only respond to chemical and biological threats, they are also cross-trained to provide support for emerging threats, such as with SARS-CoV-2 and the COVID-19 pandemic. They provide additional surge capacity for laboratory testing that allows OLS to more readily respond to new diseases that may emerge. OLS cannot afford to lose any of our Laboratory Scientists and therefore are requesting this budget improvement to maintain our emergency response staff through state funded resources.

#### **Expenditure Summary:**

The West Virginia Human Rights Commission administers and enforces the State Human Rights Act, the Fair Housing Act, and the Pregnant Workers Fairness Act as created by Chapter 5, Articles 11, 11A, and 11B of the West Virginia Code to eradicate discrimination in employment, housing, places of public accommodation, and against pregnant workers.

As the Commission continues to address recruitment and retention, positions have been approved to hire at increased salaries. This has helped in attracting staff to fill several vacant positions.

The Commission operates with federal funds and general revenue funding. The Commission has been successful in prioritizing the expenditure of funds in the past and therefore has a balance of federal funds that can be utilized.

Some of the increases that have occurred have required positions to move from general revenue funding to federal funding to allow these funds to be utilized. The current appropriations do not accommodate the use of the federal funding balance available, therefore, this spending authority request is being made to support these increases.

### **Expenditure Summary:**

Reclassifying the Family Support Specialist position to a paygrade 12, which is a more appropriate paygrade for this position. Increase includes moving all positions to new minimum and providing 7% increase to current filled positions.

### Anticipated benefits to the program or the effects if improvement is not funded:

This will help us with recruitment but more importantly will help us with retention. This also gives the Economic Service Workers two different paths for a career ladder. If they are interested in supervision or management they have the ESW Sr position or if they are are not really interested in supervision and would prefer to work more closely with families they will have the Family Support Specialist position for a career ladder.

### Anticipated cost savings to budget if improvement is approved:

### **Expenditure Summary:**

Increased costs associated with multiple contracts related to the administration of such services as Aged and Disabled Waiver (ADW), school-based health services, the fiscal intermediary contract, Medicaid Management information System (MMIS), etc. Increases in the past have been sustained within the budget. However, collectively they have reached an overall impact necessitating the need for additional funding.

Increased costs are primarily related to contracts for required services coming in higher than previous contracts for the same service, contracts based on utilization or enrollment that have increased, additional expense due to additional hours being

### Anticipated benefits to the program or the effects if improvement is not funded:

Receipt of funds will benefit the bureau by continuing to make timely payments to vendor contracts each month

expended to meet additional requirements that had to be met, cost escalations that were bid into contracts.

#### Anticipated cost savings to budget if improvement is approved:

None anticipated

#### **Expenditure Summary:**

A cost study of the bureaus building lease costs was made encompassing the state fiscal years of 2020 through 2024. Based on the cost study, escalation of annual lease costs was noted. A comparison of the annual lease costs for state fiscal year 2020 was compared to the annual lease costs for state fiscal year 2024 and an annual increase of \$500,000 was determined. This request is to account for the various yearly increases to the DHHR/BFA county offices.

### Anticipated benefits to the program or the effects if improvement is not funded:

BCF/BFA has been absorbing the lease increases over the past several years by shifting funding, this has reduced funds available for other area of current expense such as training and upgrades to offices. By increasing the budget to account for the prior and current increases in lease costs, the Bureau will be able to restore funding for other current expenses.

### Anticipated cost savings to budget if improvement is approved:

State of West Virginia

wvOASIS Advantage Budgeting

**Current Year Supplemental Request** 

### **Expenditure Summary:**

The Bureau is providing a 6% across the board increase to salaries. This equates to \$1,616,165 in personal services and \$269,000 in benefits. The majority of the increase is being covered by elimination of 36 positions totaling over \$1 million. The increase in salaries along with the approved raise effective 7/1 has created the need for additional spending authority to annualize salary and benefits.

### Anticipated benefits to the program or the effects if improvement is not funded:

The ability to provide a competitive pay scale would aid with employee recruitment and retention. Retaining knowledgeable employees is a benefit to BCSE internal and external customers.

### Anticipated cost savings to budget if improvement is approved:

No Anticipated cost savings

### **Expenditure Summary:**

To increase spending authority for fund 8723 to cover grant awards from SAMHSA for Treatment for Pregnant Woman and Postpartum Women, WV Integration of Primary and Behavioral Health Care, 988 Cooperative Agreement to Build Capacity, Certified Community Behavioral Health Clinic Planning and other grant opportunities applied for and received.

## Anticipated benefits to the program or the effects if improvement is not funded:

If not funded, it could result in the inability of the department to award new federal funds to behavioral health providers.

### Anticipated cost savings to budget if improvement is approved:

It would allow for programs normally funded with state general revenue funds to be possibly funded with new federal dollars.

### **Expenditure Summary:**

CHIP administrative expenditures are estimated at approximately \$7.8M. These costs include all administrative costs such as payroll and other contract administration. Many administrative costs are based on program enrollment.

CHIP's available cash balance has depleted now that the pandemic is winding down and the program has experienced increased utilization trends. The program projects a need for increased federal spending authority of \$1.9 million to cover projected total costs in SFY24. The Federal Match rate decreased from 85.0% in SFY23 to a blended rate of 82.52% in SFY24.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If not approved, program will not be able to cover increase in expenses.

## Anticipated cost savings to budget if improvement is approved:

No cost savings

### **Expenditure Summary:**

CHIP expenditures are projected to be \$68.4 million in SFY24 based on a projected 14.7% increase in average monthly enrollment over SFY23 levels, and combined costs and utilization trends of 5%. CHIP's available cash balance has depleted now that the pandemic is winding down and the program has experienced increased utilization trends. The program projects a need of an additional federal spending authority of \$2 million to cover projected total costs in SFY24. CHIP expenditures costs will cover all medical claims, Cap payments, Drug claims, vaccine payments, and Birth to Three payments. The Federal Match rate decreased from 85.0% in SFY23 to a blended rate of 82.52% in SFY24.

### Anticipated benefits to the program or the effects if improvement is not funded:

Program will continue to serve increase membership.

### Anticipated cost savings to budget if improvement is approved:

No anticipated cost savings at higher enrollment.

### **Expenditure Summary:**

Agency has been awarded new federal grants of 955,000.00 for EOCP, 2,764,565.00 for CYBR and 3,633,000.00 for LDPM. These require additional matching dollars of 1,836,508.00. The current amount of Fund 0443 Appropriation 74900 State Matching Grant Appropriation is only enough to cover the match requirement for our EMPG and CAPS grants.

## Anticipated benefits to the program or the effects if improvement is not funded:

Failure to have enough match will result in the loss of over 7,352,565.00 federal grant dollars that cannot be replaced with other funding sources.

## Anticipated cost savings to budget if improvement is approved:

### **Expenditure Summary:**

Increase in budget is needed to adequately replace aging equipment and perform needed repairs to maintain the SIRN communication network.

### Anticipated benefits to the program or the effects if improvement is not funded:

There is not currently adequate funding to perform needed repairs and to replace aging equipment. The current appropriation is 600,000.00 which pays for current expenses and a limited amount of repairs and alterations. At any point in time a SIRN tower equipment failure can render part of the SIRN network inoperable which places the public at increased risk during a state of emergency.

### Anticipated cost savings to budget if improvement is approved:

### **Expenditure Summary:**

Increase Federal Fund 8727 Appropriation 00100. The increased amount of federal grant awards that the agency receives allows for an increased amount of employee's salaries or a portion of their salaries to be paid with Federal grant dollars.

## Anticipated benefits to the program or the effects if improvement is not funded:

Increase will allow the agency to continue to fund and staff positions with federal grant dollars without requesting additional State General Revenue Funding.

## Anticipated cost savings to budget if improvement is approved:

### **Expenditure Summary:**

There is an executive order to utilize the National Guard for the staffing crisis. DCR anticipates 31 million for FY 24 and they are anticipating being able to cover approximately 16 million of that costs. There is a pay plan in place but that will not be full realized till probably FY 2025.

## Anticipated benefits to the program or the effects if improvement is not funded:

Allow the agency to pay its operating costs and pay the national guard in a timely manner.

## Anticipated cost savings to budget if improvement is approved:

### **Expenditure Summary:**

This improvement seeks to increase the spending authority in 8741-00100 by \$750,000 in order to pay for overtime given through various federal initiatives and the Adam Walsh Grant. Due to federal task force cases received from the US Marshall's office and the FBI on an as needed basis, overtime can vary from year to year. These are not federal grants, but rather cooperative agreements through the Office of Justice Programs that consists of drug buys, wiretapping, and sex offender roundup initiatives. Hourly rate increases of 32% for State Troopers and Forensic Laboratory Employees since FY2020 have resulted in accelerated spending of federal dollars without a permanent increase in spending authority for this fund. Additionally, the Adam Walsh grant, obtained in FY2023, provides for \$376,800 in overtime for the purpose of scanning over 6500 sex offenders files to digit form to become real time. It provides overtime for Troopers to collect GPS coordinates of sex offenders for mapping and tracking and to become SORNA compliant also.

### Anticipated benefits to the program or the effects if improvement is not funded:

Full use of available federal funding for overtime for critical law enforcement initiatives.

If increased spending authority is not granted, federal overtime will cease 1-3 months before the end of the fiscal year; the agency could potentially lose federal dollars.

### Anticipated cost savings to budget if improvement is approved:

## **Expenditure Summary:**

To remain compliant with statutory compensation requirements established by WVC 18-4-2 for teachers not covered by the Public School Support Program.

### Anticipated benefits to the program or the effects if improvement is not funded:

Staff at the Diversion and Transition facilities would be out of compliance with WVC 18-4-2. Failure to fund would also create an inequity between county Board of Education employees and those employed by the WVDE in comparable positions.

### Anticipated cost savings to budget if improvement is approved:

The supplement completes the one step teacher pay increases for adult teachers not under the state aid formula but paid on state minimum salary schedules in accordance with state code.

#### **Expenditure Summary:**

To increase federal spending authority to utilize carry over funds made available to the state by the US government prior to SFY 2024. These funds will be spent by the county boards of education on a reimbursement basis. These funds were previously authorized and due to lower prior years' expenditures and a 27 month obligation period, are expected to exceed the amount currently authorized.

### Anticipated benefits to the program or the effects if improvement is not funded:

This supplemental will allow the WVDE to flow additional federal funds to the counties for the purchase of goods and services. Items may include services to improve student learning loss, electronic devices, personal protective equipment, and additional staffing in accordance with each county's plan. If the supplemental is not granted, funds will be surrendered and returned to the federal government and possibly reallocated to entities other than West Virginia.

### Anticipated cost savings to budget if improvement is approved:

Granting this supplemental allows the state to acquire resources without the appropriation of new state funding. The funding has been made available to the state via a federal appropriation.

State of West Virginia

wvOASIS Advantage Budgeting

### **Expenditure Summary:**

The purpose of this Supplemental Request is to increase spending authority only in account 8736-13000 in anticipation of new Federal funds the Department of Agriculture will receive in FY 2024. (Note: These funds will not be COVID related, but will be subject to additional reporting)

### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement request is approved, the local communities will benefit from the additional Federal dollars spent in the local economy. If not approved, these communities will lose this potential funding source and the Department of Agriculture may have to refuse or scale back the acceptance of these anticipated Federal funds.

### Anticipated cost savings to budget if improvement is approved:

The majority of these funds will be used in various programs at a local level. While direct cost savings to the State is not anticipated if the improvement request is approved, the local communities may be able to find efficiencies or cost avoidance opportunities in the implementation of local projects.

**Current Year Supplemental Request** 

#### **Expenditure Summary:**

The purpose of this Supplemental Request is to secure a General Revenue appropriation (with reappropriation language) to finalize the design and being construction of a building, which will modernize the Department of Agriculture's laboratory facilities (currently housed in an outdated structure at the Guthrie Agricultural Center complex, located north of Charleston). An evaluation process facilitated by an architect and laboratory facilities to better serve the citizens of West Virginia. The total amount requested is based upon current estimates for site preparation and facility expenses. An Improvement Request has been submitted in the event that funding of this priority request is not available in the current fiscal year.

#### Anticipated benefits to the program or the effects if improvement is not funded:

Funding provided for capital improvements would allow WVDA to take the opportunity to establish modernized laboratories and administrative support facilities. There is a need to undertake such upgrades not only to improve existing outdated facilities (which fall to meet modern laboratory standards, in many cases), but to consolidate and streamline laboratory operations for monitoring public safety and properly utilize available space. With the help of short-term federal funding, WVDA has worked toward achieving multiple national laboratory accreditations. However, the federal funding has a finite life, with the understanding that recipient agencies must utilize their own funding sources to keep equipment and facilities at a level sufficient to continue the accreditation after federal funding is discontinued. Loss of accreditation would also mean a loss of revenues to support various other programs in WVDA.

#### Anticipated cost savings to budget if improvement is approved:

Modernized facilities will result in greater efficiency of agency operations and provide infrastructure for better detection and management of livestock diseases, food-borne illnesses, and other threats to the economic and physical health of the public and agricultural operations in West Virginia, the region, or even a national scale. As current facilities age, there is exponentially increased risk of incurring significant repair and maintenance expenses to maintain minimum operations; as laboratory and related food/animal safety standards evolve, there is also an increased risk of existing facilities not being able to meet those standards, which would disrupt laboratory operations, jeopardize federal agricultural safety funding, and leave the agricultural community and citizens of West Virginia under-protected from various threats.

#### **Expenditure Summary:**

This ongoing Supplemental Request will increase the Special Revenue Agriculture Fees Fund Personal Services appropriation to support four (4.00) new FTEs required to properly manage the Select Plant-Based Product Regulation Acts for Hemp and Kratom established by 2023 RS SB220. This is an increase to spending authority only with no General Revenue resources required.

### Anticipated benefits to the program or the effects if improvement is not funded:

To properly carry out the various manufacturer, wholesaler, and retailer permitting requirements of SB220, a Hemp/Kratom Registration Specialist, Compliance Officer, and Regulatory Officers are required. These dedicated staff will oversee vendor and product registration, compliance, and enforcement activities, as well as participate in multi-agency training and reporting activities related to the Select Plant-Based Production Regulation Acts.

#### Anticipated cost savings to budget if improvement is approved:

These positions will be funded by the registration fees and retail tax established for both Hemp and Kratom in lieu of General Revenue support. Without these programmatic staff positions to oversee various registrations and retail compliance, there are potential ramifications ranging from loss of retail sales tax from unlicensed sales to endangering public health due to the sale of unregulated Select Plant-Based Derivative Products. Without sufficient spending authority to support the positions in the Agriculture Fees Fund, other unrelated agency funding sources would be required to bear the cost of implementing and maintaining this program.

#### **Expenditure Summary:**

This ongoing Supplemental Request will create a new appropriation line to the Spay Neuter Assistance Special Revenue Fund for Personal Services. This will allow a portion of the fund's resources to be used for program administration, in accordance with WV Code 19-20C. This is an increase to spending authority only with no General Revenue resources required.

### Anticipated benefits to the program or the effects if improvement is not funded:

The addition of a Personal Services appropriation will allow the Spay Neuter Assistance Program to properly support and reflect the true cost of program administration. For the 2023 program cycle (January - November), 75 grantees have received funding for spay/neuter activities, resulting in over 8,000 procedures completed to-date in calendar year 2023. Additional staff may be required to carry out program administration and oversight activities, which will support animal health and prudent population management across the state.

#### Anticipated cost savings to budget if improvement is approved:

Without this appropriation line, there is currently no way to recover the staff time and associated expense associated with the management, outreach, compliance, and data analysis required by this program. Despite recent expansion of the program, other agency funding sources are still being used to bear the cost of program administration.

#### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Hopemont:

- \$117,600 Replacement of old resident furniture (nightstands, chests, and chairs) current furniture is aged and resulting in citations. It is also too large for the rooms resulting in reduced usable space and reduced resident safety.
- \$25,000 Replace 25 resident beds current beds are aged and parts are either significantly back ordered or unavailable for purchase.
- \$80.000 Replacement of 4 HVAC units all four 5-ton units are in need of replacement due to their age and difficulty locating repair parts.
- \$47,000 Replace kitchen floor current floor has cracked and missing tiles resulting most recently cited in an Office of Environmental Health Services Food Establishment Inspection Report dated February 14, 2023. Continued non-compliance could result in fines or loss of certification.
- \$12,600 Replace flooring in solarium current floor has cracked and missing tiles. Continued non-compliance could result in citations for failure to maintain a homelike environment required according to the CMS Operations Manual: F584: 483.10(i) Safe Environment. The resident has a right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely.
- \$45,000 Replace 3 tub rooms with showers tub rooms are aged and no longer the preferred method of bathing in long-term care. Showers will result in increased safety due to reduced need to transfer patients from chair to tub.
- \$50,000 Repair brick exterior bricks are cracked and/or disconnecting from building resulting in deterioration of the exterior.
- \$85,000 Pave upper parking lot parking lot parking lot is cracked, has pot holes in many locations, and is in significant need of replacement. Failure to repair/replace will result in continual deterioration which could lead to more costly repairs.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Lakin:

\$500,000 - Generator - the current generator does not provide full facility coverage. An additional generator would provide full coverage including resident room HVAC units. Power outages during summer/winter have the potential to result in dangerous temperatures within resident rooms.

\$150,000 - New roof over Dietary/Storeroom Building - the current roof has several areas that leak, which has the potential to result in additional structural damage if not replaced.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Manchin:

- \$35,000 Steam Table replacement (Dietary) replacement is needed due to age and the difficulty/inability to locate parts for repair. The inability to maintain proper food temperatures could lead to citations.
- \$14,000 Condensate Tank needs to be replaced as part of a larger pneumatic compressor project to maintain the facilities aging systems.
- \$50,000 Chiller Pipe Insulation needs to be replaced in order to maintain the facilities aging chiller system.
- \$25,000 Security Cameras needed to ensure resident and staff safety.
- \$75,000 Badge System will improve resident safety by ensuring only authorized individuals have the ability to access the facility and/or areas of the property that should only be accessed by authorized staff.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

#### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Withrow:

\$100,000 - Boiler replacement - boiler system is aged which results in expensive repairs with extended lead times. Most recent repairs cost \$45K for parts.

\$50,000 - Expansion of Overhead Paging System - current system does not cover all areas of the facility. Needs to be expanded to provide proper coverage. The system is used to announce vital messages including codes and emergencies. \$100,000 - Flooring throughout Hallways - current flooring is beyond life expectancy and is a trip hazard to residents and staff alike. This has been cited by OHFLAC on surveys, the most recent being on 08/29/2023. Not repairing/replacing the flooring could result in citations for failure to maintain homelike environment required according to the CMS Operations Manual: F584: 483.10(i) Safe Environment. The resident has a right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

#### **Expenditure Summary:**

Contract nursing costs are the primary driver for increased costs in the facilities. When the need for contract nursing began to significantly increase, the contract was structured as a hierarchical contract where multiple vendors bid through DHHR Purchasing Bid Process and are awarded, then ranked from lowest to highest cost. Every time a staff resource is requested, it must be requested from the lowest cost vendor first, then down the list accordingly. This was necessary because it was determined that a contract with one vendor was unable to provide sufficient staffing resources to support the needs of the hospitals. Significant increases have occurred due to usage of higher cost vendors and the implementation of the emergency nursing contract at Sharpe, Bateman, and Hopemont that was put in place during the Covid19 pandemic. As the pandemic began and continued, these vendors were unable to provide staffing resources. The contracts have been rebid multiple times in an effort to contain costs. Additionally, the sitter program was implemented at Sharpe in 2022 and Bateman in the spring of 2023 to mitigate use of RNs with a lower cost health service worker. OHF is currently working on a number of initiatives to manage and control contract nursing costs, however, cost savings will not begin to be realized until the end of the fiscal year. The initiatives being put into place include the following:

- 1) Contract nursing was rebid in 2023 with an effective date of October 1, 2023. This was done in order to mitigate the cost of the emergency contract, which the department allowed to expire on the effective date. Contracts that were in effect prior to October 1 were extended as far as March 2024 in order to allow for an effective transition period that would not negatively impact patient care. However, new contracts cannot be added to the expired emergency contract.
- 2) The department is implementing FTE analysis to create and manage effective and efficient staffing ratios and Hours Per Resident Day calculations.
- 3) With the passage of HB2006, a new compensation structure is being developed by OHRM that will be effective January 1, 2024, with the goal of making the facilities more competitive to hire and retain permanent staff, thereby mitigating use of the significant number of contract staff.
- 4) The department is in the process of evaluating a benchmarking study of all facilities in comparison to other healthcare facilities, both within the state and nationally to benchmark the facilities in comparison to healthcare norms.
- 5) The department is initiating a psychiatric bed needs assessment to determine the appropriate number of psychiatric beds needed per capita in West Virginia.
- 6) The department has engaged other healthcare systems within West Virginia regarding learning how to strategically manage contract nursing.
- 7) The department has issued a Request for Proposal (RFP) to provide consulting services to assist with operational due diligence and provide turnaround solutions for the facilities owned and operated by DHHR.

The supplemental and improvement request are to request funding in order to continue to be able to support the cost until the time that these efforts begin to realize cost savings.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded, the hospital will not be able to provide inpatient psychiatric services for individuals committed to our care.

#### Anticipated cost savings to budget if improvement is approved:

#### **Expenditure Summary:**

The State psychiatric facilities currently utilize a version of the Veterans administration VISTA Electronic Health Record (EHR) originally The State psychiatric facilities currently utilize a version of the Veterans administration VISTA Electronic Medical Record (EMR) originally developed in 1983 and adopted by DHHR in 2006-2007. The EMR, now named Careview, wasn't designed specifically for psychiatric hospitals. There is difficulty in modifying workflows, is time intensive to utilize, is limited in its ability to interface with other healthcare systems and does not efficiently provide billing/revenue cycle services. In addition, multiple regulatory surveys have resulted in citations and deficiencies as a result of the inefficiencies and shortcomings of the platform. This funding will allow for updates to the modules to the current system in an effort to address the issues, while a full analysis is being done on the cost benefit to evaluate existing capabilities and potential of the current system versus the purchase of a completely new system.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded, the hospital may continue to receive citations and deficiencies from regulatory agencies which may result in fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no projected cost savings however the improvement will allow the hospital to meet their state mandated mission to provide behavioral treatment services for the citizens of West Virginia.

#### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Sharpe:

\$1,825,000 - Window Replacement - Facility has a significant number of windows that need to be replaced. Currently, numerous windows in the facility leak and/or are permanently foggy. This is resulting in deterioration of the structural areas around the windows and a reduced homelike environment within the facility. Failure to fund will result in additional deterioration of the facility.

### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

#### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for Sharpe:

\$225,000 - Camera System Replacement - system is aged and needs to be replaced with a more high definition system that is more clear and can result in more efficient usage.

\$15,000 - Patient Storage Building - patient belongings are currently being held in areas of the facility that could otherwise be used as (and needed for) patient areas and/or office space.

\$6,000 - Backhoe Attachment for John Deere Tractor - facility has a tractor capable of being used as a backhoe for external repairs/projects with this purchase but currently has to rent a backhoe when needed.

\$115,000 - Brick Dome Repair - dome entrance to the hospital has developed leaks between the brick leading to additional deterioration of the facility.

\$200,000 - Carpet Replacement in Hallways - Carpet in the facility is beyond the life expectancy of the carpet and needs to be replaced to provide a homelike environment and to avoid citations by regulators for failure to maintain homelike environment as required according to the CMS Operations Manual: F584: 483.10(i) Safe Environment. The resident has a right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely.

\$5,000 - Carpet Extractor - this will extend the life of the carpets in the facility and will provide for a better patient experience in a more homelike environment.

\$50,000 - Gravel Parking Lots - Current gravel parking lots are down to the base and need more gravel. Failure to fund could result in additional deterioration to the base

#### **Expenditure Summary:**

Contract nursing costs are the primary driver for increased costs in the facilities. When the need for contract nursing began to significantly increase, the contract was structured as a hierarchical contract where multiple vendors bid through DHHR Purchasing Bid Process and are awarded, then ranked from lowest to highest cost. Every time a staff resource is requested, it must be requested from the lowest cost vendor first, then down the list accordingly. This was necessary because it was determined that a contract with one vendor was unable to provide sufficient staffing resources to support the needs of the hospitals. Significant increases have occurred due to usage of higher cost vendors and the implementation of the emergency nursing contract at Sharpe, Bateman, and Hopemont that was put in place during the Covid19 pandemic. As the pandemic began and continued, these vendors were unable to provide staffing resources. The contracts have been rebid multiple times in an effort to contain costs. Additionally, the sitter program was implemented at Sharpe in 2022 and Bateman in the spring of 2023 to mitigate use of RNs with a lower cost health service worker. OHF is currently working on a number of initiatives to manage and control contract nursing costs, however, cost savings will not begin to be realized until the end of the fiscal year. The initiatives being put into place include the following:

- 1) Contract nursing was rebid in 2023 with an effective date of October 1, 2023. This was done in order to mitigate the cost of the emergency contract, which the department allowed to expire on the effective date. Contracts that were in effect prior to October 1 were extended as far as March 2024 in order to allow for an effective transition period that would not negatively impact patient care. However, new contracts cannot be added to the expired emergency contract.
- 2) The department is implementing FTE analysis to create and manage effective and efficient staffing ratios and Hours Per Resident Day calculations.
- 3) With the passage of HB2006, a new compensation structure is being developed by OHRM that will be effective January 1, 2024, with the goal of making the facilities more competitive to hire and retain permanent staff, thereby mitigating use of the significant number of contract staff.
- 4) The department is in the process of evaluating a benchmarking study of all facilities in comparison to other healthcare facilities, both within the state and nationally to benchmark the facilities in comparison to healthcare norms.
- 5) The department is initiating a psychiatric bed needs assessment to determine the appropriate number of psychiatric beds needed per capita in West Virginia.
- 6) The department has engaged other healthcare systems within West Virginia regarding learning how to strategically manage contract nursing.
- 7) The department has issued a Request for Proposal (RFP) to provide consulting services to assist with operational due diligence and provide turnaround solutions for the facilities owned and operated by DHHR.

The supplemental and improvement request are to request funding in order to continue to be able to support the cost until the time that these efforts begin to realize cost savings.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded, the hospital will not be able to provide inpatient psychiatric services for individuals committed to our care.

#### Anticipated cost savings to budget if improvement is approved:

There are no projected cost savings however the improvement will allow the hospital to meet their state mandated mission to provide behavioral treatment services for the citizens of West Virginia

#### Expenditure Summary:

The State psychiatric facilities currently utilize a version of the Veterans administration VISTA Electronic Medical Record (EMR) originally developed in 1983 and adopted by DHHR in 2006-2007. The EMR, now named Careview, wasn't designed specifically for psychiatric hospitals. There is difficulty in modifying workflows, is time intensive to utilize, is limited in its ability to interface with other healthcare systems and does not efficiently provide billing/revenue cycle services. In addition, multiple regulatory surveys have resulted in citations and deficiencies as a result of the inefficiencies and shortcomings of the platform. This funding will allow for updates to the modules to the current system in an effort to address the issues, while a full analysis is being done on the cost benefit to evaluate existing capabilities and potential of the current system versus the purchase of a completely new system.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded, the hospital may continue to receive citations and deficiencies from regulatory agencies which may result in fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no projected cost savings however the improvement will allow the hospital to meet their state mandated mission to provide behavioral treatment services for the citizens of West Virginia.

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for the Bateman:

\$156,271 - New Phone System - Phone system is currently working on a "temporary fix" due to POE switches being backordered and no ETA for delivery. Failure to fund could result in total loss of phone system.

\$230,000 - Reception Connector Between Bldg 2 & 3 - To create an enclosed breezeway between buildings in order to safely transport patients from one building to the other. The current underground tunnel has previously been cited by the Bureau of Public Health (Indoor Air Quality report) due to a leak resulting in mold and mildew in the area. The leak is being controlled but cannot be completely repaired.

\$100,000 - Replacement of Bldg 4 Fire Alarm - fire alarm is extremely aged. Vendor has indicated that the system is not repairable and needs to be replaced. Unit currently functions but will not be repaired if the system breaks down, which could result in either shutdown of building 4 or significantly more expensive emergency cost for replacement.

\$200,000 - Replacement of Electrical Poles - Cited by AEP on multiple inspections of the property. All electric poles on the property are showing indication of major rot. Failure to fund could result in AEP no longer servicing the facility, which would result in shut down of the property.

\$50,000 - Remove Transformers from behind Bldg 5 - Cited by AEP due to fire on electric pole. Failure to fund could result in AEP no longer servicing the facility, which would result in shut down of the property.

\$150,000 - Repair Basement Leak between Buildings - Cited by Bureau of Public Health Indoor Air Quality report. Leak is resulting in mold and mildew in the area. Failure to fund could result in additional steps taken by BPH.

\$30,000 - Exterior Lighting - Identified by Workers Compensation and Disability Rights Advocates as needed to provide improved safety lighting for employees, patients, and visitors. Failure to fund could result in additional steps being taken by regulators to force completion.

\$160,000 - Dietary Flooring - Cited by Cabell County health department for cracked and missing tiles. Failure to fund could result in shutdown of the hospital kitchen.

\$68,000 - Parking Lots Sealed - parking lot is cracked or has pot holes in many locations and is in significant need of replacement. Failure to repair/replace will result in continual deterioration which could lead to more costly repairs.

\$172,500 - Extend Fresh Air Area - Cited by state and federal surveyors as not being significant enough space. Continual non-compliance could result in fines from CMS and loss of Medicare/Medicaid certification.

\$207,000 - Replace Perimeter Fencing - Current perimeter fencing is in disrepair and does not provide significant enough patient safety. Failure to fund could result in patient incidents and citations from regulators.

\$200,000 - Repair Sidewalk Front/Rear of Bldg 5 - Concrete has deteriorated beyond repair. Hospital is currently using cold patch blacktop to repair sidewalks to provide a safe walking path. Failure to fund will result in continual deterioration of sidewalks.

\$34,500 - Remove Trees from 40-foot Right-of-Way of Electric Lines - Cited by AEP on multiple inspections of the property. Failure to fund could result in AEP no longer servicing the facility, which would result in shut down of the property.

\$160,000 - Secure Front Gate/Control Access - Front gate/control access will improve patient safety and ensure only authorized individuals accessing the property.

\$650.000 - Replace Roof on Bldg 1 - has multiple areas that leak and could result in additional structural damage if not funded.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

### **Expenditure Summary:**

The majority of the hospitals are in excess of twenty-five years old and historically have not had sufficient funding to adequately address facility repair or preventative maintenance issues as they arise. Due to the age of these facilities, there is a significant increased need for both minor and major repairs and continued maintenance. Most minor maintenance issues are covered as part of the annual operating budget of the facilities. However, funding for major items such as HVAC system replacements and repairs is not available within current revenues. These are the needs for the Sharpe TLF:

\$50,000 - HVAC Replacement - the unit is aged and needs to be replaced to avoid significant delays in repair due to lengthy lead times in getting repair parts.

\$80,000 - Air Handler Replacement - air handler is aged and needs to be replaced to avoid significant delays in repair due to lead times.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If these projects are not done, the hospital faces citations by regulatory agencies in addition to fines and possible loss of certification.

#### Anticipated cost savings to budget if improvement is approved:

There are no cost savings.

State of West Virginia

### **Expenditure Summary:**

At this time, the Board is unsure how long it may take to hire a Director; therefore, the Board is requesting a supplemental appropriation in "00100" to pay for temp services until a Director is hired. It is anticipated that this will be before the end of fiscal year 2024.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The supplemental will allow the Board to continue utilizing the services of a temporary employee until a Director can be found and hired. If it is not approved then the current appropriation amount in "00100" may not be sufficient to allow for the payment of temporary services until a Director may be hired.

### Anticipated cost savings to budget if improvement is approved:

No anticipated cost savings at this time.

#### **Expenditure Summary:**

Currently, the Board has overages on several line items.

### Anticipated benefits to the program or the effects if improvement is not funded:

The Board is currently is operating in the negative on several line items. The Board staff is also using outdated computers that WVOT has stated does not perform and is hindering day to day operations.

### Anticipated cost savings to budget if improvement is approved:

There are no savings because a review of the lines items showed several overages.

### **Expenditure Summary:**

The PSC has received the Governor's Office approval to more fully implement not only its pay ranges but its own pay plan to address escalating recruitment and retention challenges, growing number of vacancies, and costs associated with use of outside consultants due to loss of staff and expertise. This request will move the PSC's appropriation for Debt Service payments (52000) to Personal Services (00100) to support the new pay plan. The PSC no longer needs the 52000 appropriation because the Bond was paid off in FY 2023.

#### Anticipated benefits to the program or the effects if improvement is not funded:

In addition to significant cost savings, the benefit to the program is the ability to retain institutional knowledge and history and greater efficiency with qualified staff accountants who can manage several cases at one time.

#### Anticipated cost savings to budget if improvement is approved:

The PSC's cost savings will be to its Current Expense budget (13000). As discussed above, the PSC has found it necessary to hire expert witnesses to process rate cases. Using consultants is not an optimal way to manage caseloads as an ongoing strategy, in part due to increasing consultant fees and increasing caseloads. The recruitment and retention of qualified staff will reduce consultant fees.

#### **Expenditure Summary:**

The PSC has received the Governor's Office approval to more fully implement not only its pay ranges but its own pay plan to address escalating recruitment and retention challenges, growing number of vacancies, and costs associated with use of outside consultants due to loss of staff and expertise. This request will accommodate the PSC's development and implementation of its pay plan, including anticipated salary adjustments to address pay inequities, additional retention incentives and sufficient hiring levels to attract and retain the necessary expertise.

#### Anticipated benefits to the program or the effects if improvement is not funded:

In addition to significant cost savings, the benefit to the program is the ability to retain institutional knowledge and history and greater efficiency with qualified staff accountants who can manage several cases at one time. This benefit also extends to other professional, technical and personnel supporting the unique mission of the agency.

#### Anticipated cost savings to budget if improvement is approved:

As discussed above, the PSC has found it necessary to hire expert witnesses to process rate cases. Using consultants is not an optimal way to manage caseloads as an ongoing strategy, in part due to increasing consultant fees and increasing caseloads. The recruitment and retention of qualified staff will reduce consultant fees.

Severe turnover in additional critical staffing areas have added to the toll on the agency in recent years.

#### **Expenditure Summary:**

The PSC has received the Governor's Office approval to more fully implement not only its pay ranges but its own pay plan to address escalating recruitment and retention challenges, growing number of vacancies, and costs associated with use of outside consultants due to loss of staff and expertise. This request will accommodate the PSC's development and implementation of its pay plan, including anticipated salary adjustments to address pay inequities, additional retention incentives and sufficient hiring levels to attract and retain the necessary expertise.

#### Anticipated benefits to the program or the effects if improvement is not funded:

In addition to significant cost savings, the benefit to the program is the ability to retain institutional knowledge and history and greater efficiency with qualified staff accountants who can manage several cases at one time. This benefit also extends to other professional, technical and personnel supporting the unique mission of the agency.

#### Anticipated cost savings to budget if improvement is approved:

As discussed above, the PSC has found it necessary to hire expert witnesses to process rate cases. Using consultants is not an optimal way to manage caseloads as an ongoing strategy, in part due to increasing consultant fees and increasing caseloads. The recruitment and retention of qualified staff will reduce consultant fees.

Severe turnover in additional critical staffing areas have added to the toll on the agency in recent years.

#### **Expenditure Summary:**

The PSC has received the Governor's Office approval to more fully implement not only its pay ranges but its own pay plan to address escalating recruitment and retention challenges, growing number of vacancies, and costs associated with use of outside consultants due to loss of staff and expertise. This request will accommodate the PSC's development and implementation of its pay plan, including anticipated salary adjustments to address pay inequities, additional retention incentives and sufficient hiring levels to attract and retain the necessary expertise.

#### Anticipated benefits to the program or the effects if improvement is not funded:

In addition to significant cost savings, the benefit to the program is the ability to retain institutional knowledge and history and greater efficiency with qualified staff accountants who can manage several cases at one time. This benefit also extends to other professional, technical and personnel supporting the unique mission of the agency.

#### Anticipated cost savings to budget if improvement is approved:

As discussed above, the PSC has found it necessary to hire expert witnesses to process rate cases. Using consultants is not an optimal way to manage caseloads as an ongoing strategy, in part due to increasing consultant fees and increasing caseloads. The recruitment and retention of qualified staff will reduce consultant fees.

Severe turnover in additional critical staffing areas have added to the toll on the agency in recent years.

#### **Expenditure Summary:**

The Office of Tax Appeals is slated to move to the Capitol Complex, Building 4 on the 7th floor in the summer of 2024. This request is for new furniture, as the Agency is currently using furniture that is twenty (20) years old. In addition, this request includes the cost to move IT Equipment, as well as the box truck rental to move filing cabinets and office documents to the new office.

#### Anticipated benefits to the program or the effects if improvement is not funded:

If the supplemental request is not funded, the Office of Tax Appeals will have to move the older furniture and incur that moving cost. In addition, it would be more expensive to replace the furniture in the future.

#### Anticipated cost savings to budget if improvement is approved:

The current furniture will not have to be moved as it will go to Surplus; therefore, saving moving costs.

#### **Expenditure Summary:**

Request to increase spending limit to account for increased media cost.

#### Anticipated benefits to the program or the effects if improvement is not funded:

To continue growth in the state's tourism industry, it's imperative that West Virginia maintains level funding to continue our high-caliber, wide-reaching advertising and promotional strategy.

### Anticipated cost savings to budget if improvement is approved:

West Virginia is well poised for continued growth and development in the tourism industry heading into FY2025 and beyond. These funds have a proven benefit and any cut would be detrimental to the industry as a whole.

#### **Expenditure Summary:**

The Federal Appalachian Programs (9017-28000) requires an additional \$50 million of spending authority for FY24 to ensure that the Division of Highways can make timely payments to vendors and employees as well as capture the maximum amount of federal funding available.

Approximately \$32 million of invoices for work completed in FY23 rolled over to FY24. The spending authority utilized to make these payments needs to be replaced so that all planned FY24 expenditures can be made.

In addition, the State Auditor's Office implemented new requirements on payments for consultant services provided to the Division of Highways. These new requirements result in unplanned encumbrances that reduce the unobligated amount available to conduct normal business. Additional spending authority in this appropriation will allow the Division of Highways to make payments to consultants and all vendors in a timely and efficient manner.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The additional spending authority will allow the Division of Highways to continue large federal projects and capture additional reimbursement from the federal government.

If the additional spending authority is not approved, the Division of Highways will be at risk of failing to pay vendors on time and possibly delay federally funded infrastructure projects.

#### Anticipated cost savings to budget if improvement is approved:

This is a federal appropriation with ability to be reimbursed approximately 90% of the additional \$50 million of spending authority. This results in an estimated \$45 million of federal dollars being captured and deposited in the Sate Road Fund.

#### **Expenditure Summary:**

The Federal Appropriation Interstate Construction (9017-27800) requires an additional \$50 million of spending authority for FY24 to ensure that the Division of Highways can make timely payments to vendors and employees as well as capture the maximum amount of federal funding available.

Approximately \$20 million of invoices for work completed in FY23 rolled over to FY24. The spending authority utilized to make these payments needs to be replaced so that all planned FY24 expenditures can be made.

In addition, the State Auditor's Office implemented new requirements on payments for consultant services provided to the Division of Highways. These new requirements result in unplanned encumbrances that reduce the unobligated amount available to conduct normal business. Additional spending authority in this appropriation will allow the Division of Highways to make payments to consultants and all vendors in a timely and efficient manner.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The additional spending authority will allow the Division of Highways to continue large federal projects and capture additional reimbursement from the federal government.

If the additional spending authority is not approved, the Division of Highways will be at risk of failing to pay vendors on time and possibly delay federally funded infrastructure projects.

#### Anticipated cost savings to budget if improvement is approved:

This is a federal appropriation with ability to be reimbursed approximately 90% of the additional \$50 million of spending authority. This results in an estimated \$45 million of federal dollars being captured and deposited in the Sate Road Fund.

#### **Expenditure Summary:**

The Federal Appropriation for Other Federal Aid (9017-27900) requires an additional \$50 million of spending authority for FY24 to ensure that the Division of Highways can make timely payments to vendors and employees as well as capture the maximum amount of federal funding available.

Approximately \$42 million of invoices for work completed in FY23 rolled over to FY24. The spending authority utilized to make these payments needs to be replaced so that all planned FY24 expenditures can be made.

In addition, the State Auditor's Office implemented new requirements on payments for consultant services provided to the Division of Highways. These new requirements result in unplanned encumbrances that reduce the unobligated amount available to conduct normal business. Additional spending authority in this appropriation will allow the Division of Highways to make payments to consultants and all vendors in a timely and efficient manner.

#### Anticipated benefits to the program or the effects if improvement is not funded:

The additional spending authority will allow the Division of Highways to continue large federal projects and capture additional reimbursement from the federal government.

If the additional spending authority is not approved, the Division of Highways will be at risk of failing to pay vendors on time and possibly delay federally funded infrastructure projects.

#### Anticipated cost savings to budget if improvement is approved:

This is a federal appropriation with ability to be reimbursed approximately 90% of the additional \$50 million of spending authority. This results in an estimated \$45 million of federal dollars being captured and deposited in the Sate Road Fund.

#### **Expenditure Summary:**

The Department is requesting an on-going increase in the General Revenue budget for the Veterans Nursing Facility in Clarksburg in order to cover the increase in contract nursing expenses. Even prior to the COVID-19 pandemic, hospitals and nursing facilities faced nursing shortages. The situation placed an unprecedented burden on our Veterans Nursing Facility. There has been a nationwide nursing shortage during one of the worst public health crises in recent history. Our facility has felt these effects. Though we have rounded the corner in the battle against COVID-19, the challenges our nursing facility faces are predicted to last much longer as the demand for health care workers continues to grow post-pandemic.

Though contract nurses have always been a short-term solution for staffing needs, the need for contract staff has now become the norm. Nursing facilities struggle to fill vacant and difficult-to-fill positions. Industry trends across the country are consistent north, south, east and west. Nurses are going for short-term employment and are willing to travel for work. The West Virginia Department of Veterans Assistance has offered both pay increases and bonus incentives for 24-month employment contracts, but the responses have been lukewarm at best. Roughly 70 percent of the WVVNF's nursing staff is employed via contract agencies. More troubling, the cost of contract nurses has become exorbitant and is not sustainable with the existing level of funding. Our pay to contract agencies represents an increase of more than 70 percent over what we were paying prior to the pandemic. From FY2021 to FY2023, contractual medical services increased by \$2.6M - an 87.54% increase.

#### Anticipated benefits to the program or the effects if improvement is not funded:

Our veteran residents comprise a vulnerable population that requires significant nursing care. Federal VA regulations stipulate that our facility is to provide a minimum of 2.50 hours of direct patient care, per patient, per day. This is the absolute minimum. Additionally, the acuity level within the facility also plays a determining factor in the amount of medically related support needs an individual resident requires. Some residents' conditions result in a decreased ability to perform activities of daily living, including their ability to be mobile. Some residents may require assistance to move around in bed or to transfer from bed to wheelchair or bed to stretcher. Others may need assistance to ambulate. These are examples of high-level care that require two qualified nursing staff members in order to participate in activities of daily living. It is critical to have the right level of staffing in order to maintain compliance and provide consistent, quality medical care to our veteran residents. For instance, our facility has residents that are required to have a two-person assist when lifting and transporting the resident to therapy, the dining room, and all other activities. Our facility is also home to residents who are "total care" meaning they require full-time attention.

The pay gap between the facility's nursing staff and the contract nurses is enormous and negatively impacts hospital employee morale. Our Department has worked to address the shortage and retention of nurses by working with West Virginia Division of Personnel for retention increases, as well as raising the minimum hiring rate. Additionally, through funding made available through HEPC, we have been able to offer financial incentives to our health care workers with a one-time bonus, as well as recruitment bonuses for new hires. Even after these efforts, our facility currently has more than 30 vacant health care worker positions (LPN's, RN's and CNA's). To maintain quality of life care that our veteran residents rightfully deserve, our facility must rely on contract nurses to provide care.

Anticipated cost savings to budget if improvement is approved:

Our primary focus remains our residents and providing the best care to our Veterans. Sustaining adequate nurse-to-patient ratios is paramount in maintaining patient safety and the delivery of quality care. In order to admit new residents, the nursing facility must have adequate staffing ratios. Decreasing resident volume lowers revenues - both in terms of the monthly resident maintenance fee and the Federal per diem reimbursement. Without admitting new residents, revenues will remain stagnant while contract nursing costs continue to increase.

#### **Expenditure Summary:**

The Department is requesting a current year spending authority increase and one temporary FTE within Fund 6703. This position will be for a construction manager to oversee the construction of the Beckley Veterans Nursing Facility.

#### Anticipated benefits to the program or the effects if improvement is not funded:

An on-site construction manager will observe the quality and progress of the construction project as well as provide the Department with progress reports. Through broad knowledge of the construction process, the construction manager will be able to provide valuable guidance and insight on cost-savings and enable the Department to make educated decisions regarding how the facility is constructed.

#### Anticipated cost savings to budget if improvement is approved:

Hiring an on-site construction manager is a critical, as well as a cost-effective, way to monitor the progress of the facility's construction. This position will conduct regular inspections and check that building plans are being followed correctly and conforming to legal and safety standards, which will help to avoid costly delays.
